Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 20, 2017 (18 issues):
Internet/print package: £1367/\$2621 Americas only/€2190 EU only
Internet only: £989/\$1877 Americas only/€1573 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Level of implementation of best practice policies for creating healthy food environments: assessment by state and non-state actors in Thailand
S Phulkerd, S Vandevijvere, M Lawrence, V Tangcharoensathien and G Sacks 381

Temporal trends, regional variation and socio-economic differences in height, BMI and body proportions among German conscripts, 1956–2010
A Lehmann, J Floris, U Woitek, FJ Rühli and K Staub 391

A cross-sectional observation on habitual non-alcoholic beverage consumption among adolescents from four Irish post-primary schools
S Millar, M O'Donoghue, B McNulty, L Kirwan and A McKevitt 404

Gluten contamination in gluten-free bakery products: a risk for coeliac disease patients
P Farage, YK de Medeiros Nóbrega, R Pratesi, L Gandolfi, P Assunção and RP Zandonadi 413

Assessment and methodology

A systematic review of methods to assess intake of fruits and vegetables among healthy European adults and children: a DEDIPAC (DEterminants of Diet and Physical Activity) study
F Riordan, K Ryan, IJ Pery, MB Schulze, LF Andersen, A Geelen, P van't Veer, S Eussen, P Dagnelie, N Wijckmans-Duysens and JM Harrington 417

Assessing the relative validity of the Scottish Collaborative Group FFQ for measuring dietary intake in adults
JL Hollis, LCA Craig, S Whybrow, H Clark, JAM Kyle and G McNeill 449

Nutritional status and body composition

Diet quality as measured by the Diet Quality Index–International is associated with prospective changes in body fat among Canadian children
S Setayeshgar, K Maximova, JP Ekwaru, K Gray-Donald, M Henderson, G Paradis, A Tremblay and P Veugelers 456

Behavioural nutrition

Relationship between the home environment and fruit and vegetable consumption in children aged 6–12 years: a systematic review
JX Ong, S Ullah, A Magarey, J Miller and E Leslie 464

BMI-specific associations between health-related behaviours and overweight – a longitudinal study among Norwegian adolescents
IM Oellingrath and MV Svendsen 481

Nutritional epidemiology

Practices, predictors and consequences of expressed breast-milk feeding in healthy full-term infants
DL Bai, DYT Fong, KYW Lok, JYH Wong and M Tarrant 492

School lunches in the Republic of Ireland: a comparison of the nutritional quality of adolescents' lunches sourced from home or purchased at school or 'out' at local food outlets
S Browne, A Staines, C Barron, V Lambert, D Susta and MR Sweeney 504

Economics and environment

The economic burden of inadequate consumption of vegetables and fruit in Canada
JP Ekwaru, A Ohinmaa, S Loehr, S Setayeshgar, NX Thanh and PJ Veugelers 515

Differences in expenditure and amounts of fresh foods, fruits and vegetables, and fish purchased in urban and rural Scotland
B de Roos, F Binacchi, S Whybrow and AA Sneddon 524

Community nutrition

Simple dietary criteria to improve serum *n*-3 fatty acid levels of mothers and their infants
U Hautero, T Poussa and K Laitinen 534

Interventions

The European School Fruit Scheme: impact on children's fruit and vegetable consumption in North Rhine-Westphalia, Germany
S Methner, G Maschkowski and M Hartmann 542

Effects of initiating moderate wine intake on abdominal adipose tissue in adults with type 2 diabetes: a 2-year randomized controlled trial
R Golan, I Shelef, E Shemesh, Y Henkin, D Schwarzfuchs, Y Gepner, I Harman-Boehm, S Witkow, M Friger, Y Chassidim, IF Liberty, B Sarusi, D Serfaty, N Briel, M Rein, N Cohen, S Ben-Avraham, U Ceglarek, M Stumvoll, M Blüher, J Thiery, MJ Stampfer, A Rudich and I Shai 549

Public policies

How do we actually put smarter snacks in schools? NOURISH (Nutrition Opportunities to Understand Reforms Involving Student Health) conversations with food-service directors
LE Rosenfeld, JFW Cohen, MT Gorski, AJ Lessing, L Smith, EB Rimm and JA Hoffman 556

A cross-sectional assessment of food- and nutrient-based standards applied to British schoolchildren's packed lunches
CEL Evans and JE Cade 565
