
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication.

The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs) which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGS include: Animal Navigation Group (ANG), Civil and Military Aviation Group (CMAG), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Land Vehicle Navigation Group (LVNG), Marine Traffic Navigation Group (MTNG), Navigation On Foot (NOF), Small Craft Group (SCG) and Satellite Special Interest Group (SATSIG).

The Institute publishes *The Journal of Navigation* four times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is co-ordinated with that of similar organizations in other countries.

Membership

There are seven classes of Membership of the Institute:

(1) HONORARY FELLOWS: Distinguished persons upon whom the Council may see fit to confer an honorary distinction.

(2) FELLOWS: Members, of at least three years' standing, holding certain qualifications laid down in the by-laws; these qualifications include having made a contribution of value to navigation.

(3) ASSOCIATE FELLOWS: Individuals who satisfy the Council of their high level of professional achievement or experience in the advancement of navigation operations, concepts or equipment.

(4) MEMBERS: Persons over twenty-one years of age who satisfy the Council of their interest in navigation.

(5) STUDENT MEMBERS: Persons under twenty-five years of age studying at a recognized school or university with a view to making navigation, or an allied interest, their career.

(6) CORPORATE MEMBERS: Organizations such as universities, navigation schools, government departments or companies, here and abroad, who are directly or indirectly interested in the science of navigation. Corporate Members are entitled to send representatives to all Institute meetings and to receive six copies of its publications. They are encouraged to take an active part in the Institute's work. Applications should be sent by letter addressed to the Director.

(7) RETIRED MEMBERS: Fellows or Members of 65 years of age or over who have paid no fewer than 6 annual subscriptions.

There is also Associateship of the Institute, which gives entitlement of Membership to one Special Interest Group SIG, but not to receipt of the *Journal of Navigation*.

Subscriptions

Annual subscriptions to the Institute are payable in advance as follows (prices are inclusive of vat):

Fellows	£128
Associate Fellows	£123
Members	£118
Student Members	£15

THE JOURNAL OF NAVIGATION

VOLUME 63 NUMBER 3 JULY 2010

CONTENTS

- Simplified Dead Reckoning on a Tortuous Path** 379
David Robertson
- A Non-singular Horizontal Position Representation** 395
Kenneth Gade
- Assessment of Radio Frequency Compatibility Relevant to the Galileo E1/E6 and Compass B1/B3 Bands** 419
Wei Liu, Gang Du, Xingqun Zhan and Chuanrun Zhai
- Alternative Sources of Energy in Shipping** 435
Fernández Soto J. L., Garay Seijo R., Fraguela Formoso J. A., Gregorio Iglesias G. and Carral Couce L.
- Discovering Knowledge from AIS Database for Application in VTS** 449
Ming-Cheng Tsou
- Receiver Interface Requirements for Deep INS/GNSS Integration and Vector Tracking** 471
Paul D Groves and Christopher J Mather
- INS/GPS Tightly-coupled Integration using Adaptive Unscented Particle Filter** 491
Junchuan Zhou, Stefan Knedlik and Otmar Loffeld
- A Hybrid GNSS Integrity Design Leveraging a Priori Signal Noise Characteristics** 513
James DiLellio
- Locata Performance Evaluation in the Presence of Wide- and Narrow-Band Interference** 527
Faisal A. Khan, Chris Rizos and Andrew G. Dempster
- Experiences with Compasses in the Mid-20th Century** 545
John Kemp
- Great Circle Navigation with Vectorial Methods** 557
Vincenzo Nastro and Urbano Tancredi
- FORUM**
- Optimal Ship Routing with Ocean Current Included** 565
S. J. Bijlsma
