“In *Planet in Peril*, Michael Bess brings his singular voice, intellectual courage, and good judgment to bear on the four megadangers facing humankind – climate change, nuclear weapons, pandemics, and artificial intelligence. He avoids the simplistic thinking that characterizes too much of the public debate on these issues and offers insightful, viable solutions. It is one of those rare books that is both a joy to read and a roadmap for solving daunting problems.”

Michael Vandenbergh, *Vanderbilt University*

Earth and Environmental

Books and Journals from
Cambridge University Press

Cambridge University Press publishes across the full spectrum of sub-disciplines that comprise the Earth and Environmental Sciences – everything from soil science to space physics and from palaeontology to petroleum geoscience.

We are particularly well known for our comprehensive and world-leading book lists in climate change and solid Earth geophysics.

We publish books ranging in level from undergraduate and graduate textbooks to research monographs, reference volumes, and handbooks for industry practitioners.

We also have an ever-expanding journals portfolio including the prestigious journals of the Paleontological Society from 2015.

NET ZERO EMISSIONS IS ONLY THE BEGINNING

“With careful explanations of the technologies, policies, governance issues, and ethical dilemmas involved, Pandora’s Toolbox emerges as ‘must reading’ for all who seek to understand the pathways to a successful global response to climate change.”
DAN ESTY, Hillhouse Professor of Environmental Law and Policy, Yale University and editor of *A Better Planet: 40 Big Ideas for a Sustainable Future*

“At last, a realistic and unflinching view of the hard reality of climate choices that are coming. Smith’s treatise is that avoiding a dystopian nightmare future requires levels of political courage in our scientific convictions not seen since the Second World War.” JOHN MOORE, Chief Scientist at the College of Global Change and Earth System Science, Beijing Normal University

“In the Greek myth Pandora was curious and she opened a box thus releasing evils into the world. Here we explore the contents of the box more carefully. In it we find tools useful for climate repair. This great book gives us a ray of hope in a situation where everything looks rather bleak.” HUGH HUNT, Fellow of Trinity College, University of Cambridge

“An overview of climate change and the array of possible responses that manages to be simultaneously comprehensive, detailed, and accessible. It’s jam-packed with the sort of specific, practical detail that is usually missing in such overviews. A valuable contribution and an impressive achievement.” EDWARD A. PARSON, Dan and Rae Emmett Professor of Environmental Law and Faculty Director, Emmett Institute on Climate Change and the Environment

“A well written, accurate and entertaining guide to climate change and climate intervention techniques that gives the readers all the arguments to make up their own mind on the topic.” OLIVIER BOUCHER, Climatologist, Sorbonne Université / CNRS

COMMENTS

Unregulated sales of fishing nets: consequences and possible solutions in Brazil

Roberto Ferrazi, Guilherme Correia-Silva, Maria Eduarda P Bonan, Tommaso Giarrizzo, Carolina V Silva, Philip M Fearnside and Valter M Azevedo-Santos 199

Brazil: environment under attack

Marcelo Dutra da Silva and Philip Martin Fearnside 203

RESEARCH PAPERS

Governments commit to forest restoration, but what does it take to restore forests?

Stephanie Mansourian, Hermine Kleymann, Valerie Passardi, Susanne Winter, Mercy Afua Adutwumwaa Derkyi, Anita Diederichsen, Mónica Gabay, Pablo Pacheco, Daniel Vallauri and Christian A Kull 206

Terrestrial protected areas do not fully shield their streams from exogenous stressors

Victor Hugo dos Santos Mollmann, Sandro Santos, Gracieli Fernandes, Emerson Contreira Mossolin, Marcelo Marchet Dalosto, Sônia Maria Vaz Sanches Cardoso, Osmar Damian Prestes, Renato Zanella and Marlise Ladvocat Bartholomei-Santos 215

Assessment of the effect of landowner type on deforestation in the Brazilian Legal Amazon using remote sensing data

Ana IR Cabral, Anne Elisabeth Laques and Carlos Hiroo Saito 225

Integrating human and species habitat preferences in conservation in heterogeneous urban settings

Heather A Sander, Cody B Hodson and Brandon M Macdougall 234

Forest land-cover trends in the Monarch Butterfly Biosphere Reserve in Mexico, 1994–2017

José López-García, Rafael María Navarro-Cerrillo and Lilia de Lourdes Manzo-Delgado 244

A machine learning approach to mapping canopy gaps in an indigenous tropical submontane forest using WorldView-3 multispectral satellite imagery

Colbert M Jackson and Elhadi Adam 255

Impact of soil and water conservation measures on farm productivity and income in the semi-arid tropics of Bundelkhand, central India

Bishwa Bhaskar Choudhary, Inder Dev, Priyanka Singh, Ramesh Singh, Purushottam Sharma, Khem Chand, Kaushal K Garg, KH Anantha, Venkataradha Akuraju, Sreenath Dixit, Sunil Kumar, Asha Ram and Naresh Kumar 263

Complex spatiotemporal changes in land-use and ecosystem services in the Jeju Island UNESCO heritage and biosphere site (Republic of Korea)

Jihwan Kim, Heejoon Choi, Wonhyeop Shin, Jiweon Yun and Youngkeun Song 272
