Are current warning and responses systems suitable to respond to emerging infectious diseases? – CORRIGENDUM

Claudia Fernandez de Cordoba Farini

<https://doi.org/10.1017/one.2023.10>, Published by Cambridge University Press, 23 August 2023.

In the article's published version, three typographical errors were corrected:

1. The incomplete email address of the author, now updated to: claudia.farini.18@ucl.ac.uk
2. On page 1, 'inegrated' was corrected to 'integrated' in the UNDRR's early warning system definition.
3. On page 2, 'Phlebotomus papatasi' was amended to 'Phlebotomus papatasi' in the discussion on visceral leishmaniasis.

The author apologises for any confusion these errors may have caused.
