June 1968 Issue

Current plans call for including papers concerned with the "random walk" hypothesis.

The editor would be pleased to hear from anyone working in this area.

Stephen H. Archer

Computer Programs

Abstracts of computer programs of interest to subscribers may be submitted to the *Journal*. Descriptions should not exceed 100 words. The equipment used and the name and affiliation of submitter should be added.

Instructions to Authors

Manuscripts in the areas of finance and quantitative analysis should be sent to the editor. Two copies should be enclosed and the authors' names should not appear on the manuscript to preserve anonymity. The manuscripts will then be forwarded to the appropriate associate editors. Manuscripts should be typed on 8-1/2 x 11 paper and should be double-spaced. Mathematical notation should be kept as simple as possible. Where at all possible use common typewriter characters such as primes, slashes, asterisks, etc. Use power 1/2 rather than square root.

Footnotes should be numbered consecutively and typed in a separate list at the end of the paper. Do not use footnotes on mathematical symbols. Reference material should be listed alphabetically on a separate sheet at the end of the manuscript.

The following subject matter areas are representative of the interest of the *Journal*. The list is not all inclusive nor are the areas listed mutually exclusive.

Business Finance	Statistics
Investments	Operations Research
Banking	Management Science
Financial Institutions	Computers
Monetary Theory and Policy	Information Theory and Technology
Credit	Risk and Uncertainty Analysis
Consumer Finance	Decision Theory
Real Estate Finance	Insurance
International Finance	Financial Aspects of Non-Profit Organizations
