

INTERNATIONAL JOURNAL OF

MICROWAVE AND WIRELESS TECHNOLOGIES**CONTENTS**

RESEARCH PAPERS

Efficient technique for ultra broadband, linear power amplifier design

Ahmed Sayed, Sebastian Preis and Georg Boeck 559

Compact RF non-linear electro thermal model of SiGe HBT for the design of broadband ADC's

Alaa Saleh, Abdel Kader El Rafei, Mountakha Dieng, Tibault Reveyrand, Raphael Sommet, Jean-Michel Nebus and Raymond Quere 569

A 60 GHz eight-element phased-array receiver front-end in 0.25 μm SiGe BiCMOS technology

Mohamed Elkhoully, Chang-Soon Choi, Srdjan Glisic, Frank Ellinger and J. Christoph Scheytt 579

Design and characterization of 50 kW solid-state RF amplifier

Akhilesh Jain, P. R. Hannurkar, D. K. Sharma, A. K. Gupta, A. K. Tiwari, M. Lad, R. Kumar, P. D. Gupta and S. K. Pathak 595

Factors reducing the cut-off frequency of resonant tunneling diodes

Nikolay Alkeev, Stanislav Averin, Aleksey Dorofeev and Nadezda Gladysheva 605

Planar inverted-F antenna with J-shaped slot and parasitic element for ultra-wide band application

Saida Ibnyaich, Abdelilah Ghammaz and Moha M'rabet Hassani 613

Wide aperture circularly polarized antenna for small telemetry satellites

M. Koubeissi, E. Arnaud, M. Thevenot, T. Monediere, E. Peragin and H. Diez 623

Far-field formulation of a Cassegrain reflector using a novel illumination function and aperture field integration

Mohammad Asif Zaman and MD. Abdul Matin 629

Maximizing main-lobe to the side-lobe level for the non-uniform chaos game planar antenna array using an IWO algorithm

Ahmed Najah Jabbar, Ali Shaban Hasooni and Muthana Khalil Ibrahim 635

Modeling and simulating the nerve axon as a thin-film microstrip

A. Dueñas Jiménez, R. Magallanes Gómez, J.M. Dueñas Jiménez and S.H. Dueñas Jiménez 647
