OBSERVING CHINA

WILD LILY, PRAIRIE FIRE

China's Road to Democracy,
Yan'an to Tian'anmen, 1942–1989

Edited by Gregor Benton
and Alan Hunter

Gregor Benton and Alan Hunter provide here a source book of documents of democratic dissent under Chinese Communism, most of them previously untranslated and difficult to find in the West. Ranging from eye-witness accounts of a massacre to theoretical critiques of Chinese Marxist thought, these essays are among the most powerful and important works of Chinese dissident literature written in this century.

The story of Chinese Communism has often been reduced to uniformity not only by political bureaucrats in China but by Western scholarship derived from official Chinese histories. *Wild Lily, Prairie Fire* paints a far richer picture.

THE CHINESE REASSESSMENT OF SOCIALISM, 1976–1992

Yan Sun

Just as Deng Xiaoping's experiment with market-based reforms has challenged Marxist-Leninist dogma on economic policy, the years since the death of Mao Zedong have seen a profound reexamination of a more basic question: to what extent are the root problems of the system due to Chinese socialism and Marxism generally?

Here Yan Sun gathers a remarkable group of primary materials, drawn from an unusual range of sources, to present the most systematic and comprehensive study of post-Mao reappraisal of China's socialist theory and practice.

CULTURAL REALISM

Strategic Culture and Grand Strategy
in Chinese History

Alastair Iain Johnston

Cultural Realism is an in-depth study of premodern Chinese strategic thought that has important implications for contemporary international relations theory. In applying a Western theoretical debate to China, Iain Johnston advances rigorous procedures for testing for the existence and influence of "strategic culture."

Johnston sets out to answer two empirical questions. Is there a substantively consistent and temporally persistent Chinese strategic culture? If so, to what extent has it influenced China's approaches to security? The focus of his study is the Ming dynasty's grand strategy against the Mongols (1368–1644). The findings of this book challenge dominant interpretations of traditional Chinese strategic thought.

The Waning of the Communist State

Economic Origins of Political Decline in China and Hungary

Edited by Andrew G. Walder

This collection of essays offers a compelling explanation for the decline of communism in the two countries that went the furthest with economic reforms—China and Hungary. China: A Nation in Transition

Debra Soled, editor

New book sets contemporary China against an historical backdrop

As the twentieth century draws to a close, China is in the midst of a great transition. The radical changes occurring in China's social, political, and economic environments make it crucial to have a thorough understanding of the country as it was, as it is, and as it may become.

China: A Nation in Transition balances an exploration of the historical tradition of China with an examination of recent developments. This compact yet comprehensive collection of essays analyzes China's contemporary political, economic, military, and foreign policy scenes against the backdrop of Chinese history.

Among the prominent scholars who have contributed to *China* are: Wendy Abraham, J. Ray Bowen, II, Chi Wang, Sidney Greenblatt, Gregory K.S. Man, Maria R. Ristaino, Thomas W. Robinson, and Robert Sutter.

The book features maps, tables, charts of the Chinese government and Chinese Communist Party structure, original documents, a detailed chronology of events from 1911 through 1995, key documents, and biographical sketches of important figures of the past and present. The expanded hardbound library edition contains additional appendix material, including an expanded, in-depth chronology and additional documents.

"This volume is a much-needed and welcome handbook, with all the basic historical and current facts needed to get a good grasp of the basic elements of today's China. . . . I recommend that you have this volume at hand on your bookshelf."

CHINA

In 1978 China was economically and politically exhausted. By 1994, after one of the most successful examples of economic reform ever witnessed, the country has emerged as a major force in the world economy. This issue of the *Oxford Review of Economic Policy* takes a succinct look at all the important elements in the continuing reform process and attempts on that basis to evaluate China's economic prospects. Contributions examine:

- what is happening to the governance and performance of China's large state-owned enterprises and the prospects of reform to reduce or eliminate losses.
- the closely related questions of how reform of the financial system is proceeding and whether this can deliver both monetary control and efficient integration with the industrial sector.
- the consequences and prospects for China's exchange-rate regime and trade capital flows with the rest of the world.

Inextricably linked to these are a number of other issues which have received rather less attention in the West, but which are crucial to a full understanding of China's position. These include:

- China's rural development, in agriculture but also in industrial development through Township and Village enterprises.
- China's labour problems and the obstacle to development of a social security system and housing reform.
- China's chronic problems in the energy sector and in developing the human capital necessary to maintain the country's growth performance.

Overlapping many of these issues is that of growing regional disparities and regional fragmentation, and the increasing inability of the central authorities to tackle the inequalities which these are causing. Also addressed are the overall implications for macroeconomic stability and stabilisation policy, for economic growth and for the process of reform itself.
