## QUALITY ASSURANCE IN HEALTH CARE

A Handbook

Roger Ellis and Dorothy Whittington

In recent years 'quality assurance' has come to have a high profile for health managers, patients or 'consumers', and the entire range of health care professionals. Techniques for assessing and improving the quality of care have been developed and there is therefore an urgent need to provide all health care professionals with up-to-date and comprehensive knowledge of techniques, approaches and issues in quality assurance.

*Quality Assurance in Health Care* has been specifically developed to:

- Provide an overview of quality assurance as it has developed in the health care and industrial contexts
- Provide a comprehensive inventory of all available quality assurance techniques with detailed accounts of each
- Give guidance on the selection of quality assurance techniques
- Give guidance on setting-up and managing health care quality assurance systems

**Contents** Quality assurance in health care. The development of quality assurance in health care. The development of quality assurance in industry. Techniques for quality assurance in health care - Part one: Quality specific techniques. Techniques for quality assurance in health care - Part two: Generic techniques. The management of quality assurance in health care. Future developments in quality assurance in health care.

## MANAGEMENT FOR CLINICIANS

A Handbook for Doctors and Nurses

Tony White

The demands of the modern health service make it essential for all professionals to learn and effectively use management skills. The first definitive study by a member of the medical profession, *Management for Clinicians* attempts to show how a spirit of co-operation in running a hospital is essential rather than the all too common attitudes of confrontation and conflict. Good management leads to good, cost-effective health care which must be the aim of everyone working in today's health service.

- Written by a clinician who is also an expert in hospital management structures
- Examines all areas of medical management

**Contents** Doctors' roles in management. Models of clinical management. Managing as clinical director. Nursing management issues. Managing audit. Managing change. Managing meetings. Managing the chair.
