

- 406 Money versus time: evaluation of flow control in terms of energy consumption and convenience
B. Frohnäpfel, Y. Hasegawa & M. Quadrio
- 419 Two-dimensional modal method for shallow-water sloshing in rectangular basins
M. Antuono, B. Bouscasse, A. Colagrossi & C. Lugni
- 441 Instability of compressible drops and jets
U. Miyamoto
- 459 The pollution of pristine material in compressible turbulence
L. Pan, E. Scannapieco & J. Scalò
- 490 Swept-wing boundary-layer receptivity
D. Tempelmann, A. Hanifi & D. S. Henningson
- 502 Hydraulic control of continuously stratified flow over an obstacle
K. B. Winters & L. Armi
- 514 Consistent subgrid scale modelling for lattice Boltzmann methods
O. Malaspinas & P. Sagaut

S indicates supplementary data or movies available online.

- 1 Dissipation and enstrophy statistics in turbulence: are the simulations and mathematics converging?
R. M. Kerr
- 5 Dissipation, enstrophy and pressure statistics in turbulence simulations at high Reynolds numbers
P. K. Yeung, D. A. Donzis & K. R. Sreenivasan
- S 16 Analysis of unsteady behaviour in shockwave turbulent boundary layer interaction
M. Grilli, P. J. Schmid, S. Hickel & N. A. Adams
- 29 Two-way coupled stochastic model for dispersion of inertial particles in turbulence
M. G. Pai & S. Subramaniam
- 63 Release of a viscous power-law fluid over an inviscid ocean
S. S. Pegler, J. R. Lister & M. G. Worster
- 77 Changes in turbulent dissipation in a channel flow with oscillating walls
P. Ricco, C. Ottonelli, Y. Hasegawa & M. Quadrio
