AUSTRALIAN MATHEMATICAL SOCIETY

Volume 32 Number 2 **October 1985**

Meromorphic univalent functions with positive coefficients
by M. L. Mogra, T. R. Reddy and O. P. Juneja **161**
Some properties of the lattice of subalgebras of a Boolean algebra
by Ivo Düntsch **177**
Blaschke-type maps and harmonic majoration on Riemann surfaces
by Shinji Yamashita **195**
Radon polymeasures
by Brian Jefferies. **207**
Starlike integral operators
by Faiz Ahmad **217**
Topological vitali measure spaces
by D. N. Sarkhel and T. Chakbraborti **225**
On the implicit complementarity problem in Hilbert spaces
by G. Isac **251**
The kernel of the cup product
by Jonathan A. Hillman **261**
Quadratic equations and applications to Chandrasekhar's and related equations
by Ionnais K. Argyros **275**
Nilpotent injectors in finite groups
by Peter Förster **293**
A complete classification of dynamical symmetries in classical mechanics
by Geoff Prince **299**

ABSTRACTS OF AUSTRALASIAN PhD THESES

On the computational algorithms for time-lag optimal control problems
by Kar Hung Wong **309**
The N-dimensional diophantine approximation constants
by Sam Krass **313**
The equivalence of linear systems
by David John Cullen **317**

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
