

## SUBSCRIPTION RATES

Subscription rates (post free) for volume 38 (2001) of the *Journal of Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;

US\$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

## NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

(1) *research papers* not exceeding 20 printed pages;

(2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

*Review papers, longer research papers* and *letters to the editor* are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

### Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,  
University of Sheffield, Sheffield S3 7RH, UK.**

## COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/01 \$00.70+ .20.

*Research Papers*

- 285 INGEMAR KAJ, STEPHEN M. KRONE AND MARTIN LASCoux. Coalescent theory for seed bank models
- 301 HSIAO-CHI CHEN AND YUNSHYOUNG CHOW. On the convergence of evolution processes with time-varying mutations and local interaction
- 324 ARKENDRA DE, MICHAEL FERGUSON, SUZANNE SINDI AND RICHARD DURRETT. The equilibrium distribution for a generalized Sankoff–Ferretti model accurately predicts chromosome size distributions in a wide variety of species
- 335 MENGXIANG TANG AND MICHAEL S. WATERMAN. Local matching of random restriction maps
- 357 I. KIPOURIDIS AND G. TSAKLIDIS. The size order of the state vector of discrete-time homogeneous Markov systems
- 369 MARK E. LEWIS. Average optimal policies in a controlled queueing system with dual admission control
- 386 BERND HEIDERGOTT. A weak derivative approach to optimization of threshold parameters in a multicomponent maintenance system
- 407 HENRY W. BLOCK AND TUHAO CHEN. Multivariate product-type lower bounds
- 421 SVANTE JANSON. Moment convergence in conditional limit theorems
- 438 F. MALLOR AND E. OMEY. Shocks, runs and random sums
- 449 OURANIA CHRYSAPHINOU AND EUTICHIA VAGGELATOU. Compound Poisson approximation for long increasing sequences
- 464 XIN GUO. An explicit solution to an optimal stopping problem with regime switching
- 482 SØREN ASMUSSEN AND JAN ROSIŃSKI. Approximations of small jumps of Lévy processes with a view towards simulation
- 494 S. F. JARNER AND R. L. TWEEDIE. Locally contracting iterated functions and stability of Markov chains
- 508 DEMETRIOS L. ANTZOULAKOS. Waiting times for patterns in a sequence of multistate trials
- 519 QI-MING HE AND MARCEL F. NEUTS. On the convergence and limits of certain matrix sequences arising in quasi-birth-and-death Markov chains
- 542 JI HWAN CHA. Burn-in procedures for a generalized model
- 554 JOHN L. SPOUGE. Finite-size corrections to Poisson approximations of rare events in renewal processes
- 570 RAFAŁ KULIK AND RYSZARD SZEKLI. Sufficient conditions for long-range count dependence of stationary point processes on the real line
- 582 ERIC BACH. Random bisection and evolutionary walks

*Short Communication*

- 597 PHILIP J. BOLAND. Signatures of indirect majority systems
- 604 Obituary: JACOB WILLEM COHEN
