* * *

THE SEMON LECTURE, 1929.

Dr Harris P. Mosher of Boston, U.S.A., has been invited by the Semon Lecture Board to give the Semon Lecture of the University of London. The address, which is entitled "The lower end of the Oesophagus at Birth and in the Adult," will be delivered in the Hall of the Royal Society of Medicine, 1 Wimpole Street, London, W. 1, on the afternoon of Thursday, 5th December, at 5 o'clock.

* * *

Sir James Dundas-Grant has been elected an Honorary Member of the Vienna Laryngological Society.

* * *

Professor Steurer has succeeded Professor Körner as Director of the Oto-rhino-laryngological Clinic at Rostock.

FOR THE DEAF

The ACOUSTICON—

The "AID" of REPUTE

Many old type Acousticons are in service to-day after 20 years' constant use. To-day we possess the Supreme Aid in our Silver Anniversary Model

Single Microphone, No. 28

Double Microphone, No. 56

with the tiny Dime Earpiece which fits in the ear together with the auxiliary loud earpiece for the very deaf or for long distance.

Every case is carefully tested and the correct aid either electrical or non-electrical is selected to suit the form and degree of deafness.

Home tests arranged, and by arrangement patients may receive a test in their consultants' rooms.

There is only one Acousticon and only made in one quality—*The Best.*

We invite inspection of our "aids" and methods.

The Acousticon is used in the Aural Department of the London Hospital, Royal Free Hospital, etc., etc.

Established with Predecessors since 1898

GENERAL ACOUSTICS LIMITED

(Entirely British Firm)

77 WIGMORE STREET, LONDON W.1. and Branches

TELEPHONE—MAYFAIR 1557

Technical Adviser—

Professor A. M. LOW, A.C.G.I., M.I.A.E., F.C.S., etc.

Models of the Labyrinth

These models (King's College Hospital pattern) were devised by

Mr A. H. CHEATLE

and

Mr NEGUS

for teaching purposes and for investigating labyrinthine diseases.

The pointers on the Head frame lie parallel with the Frankfort plane, so that when the frame is on the head the models lie in correct orientation in all respects. The patient's head can be put in any position and the exact relations of each of the canals are seen; rotation and caloric tests can be carried out with the frame in position.
