EARTH-ORIENTED APPLICATIONS OF SPACE TECHNOLOGY

Editor-in-Chief
L.G. NAPOLITANO University of Naples

Space technology has now progressed from the initial phase of exploration to encompass four major areas of utilization which have reached varying degrees of development:

- * Telecommunications
- * Monitoring Earth's resources and environment
- * Using the space environment to further scientific research into natural phenomena and the production of new products and techniques
- * Fulfilment of mankind's energy needs

This progress, however, has created significant and steadily increasing information gaps between developers and users of space technology, between system designers and specialists, between policy makers and suppliers. The journal will provide the much needed information-bridge between these parties. The journal will offer surveys, trend analyses, strength and weakness assessments, cost-benefit analyses and will also cover legal aspects and social implications. The journal's emphasis will be on practical applications, system's performance and factual information.

A selection of papers

APPLE—Indian experimental geostationary communication satellite, U R RAO & R M VASAGAM.

Analysis of the 23 November, 1980 earthquake as a design basis for satellite emergency communication, G BERRETTA *et al.*

SARSAT: A satellite aided search and rescue system for location of distress radio beacons, D LUDWIG *et al.*

Economy of small reusable LEO satellite platforms, D E KOELLE.

The potential evolution of the Space Transportation System, I BEKEY.

Shuttle uprating and the evolution into derivative vehicles, F L WILLIAMS.

Impact of space development on educational motivation, H I THORSHEIM & K K DYBDAL.

Manned space stations—a perspective, J H DISHER.

Satellite servicing from the shuttle orbiter, R L KLINE & R J ADORNATO.

Environmental enhancement of the oceans by increased solar radiation from space, J KLASSI.

Annual survey of spacelight safety systems: 11th supplement survey period: July 1980-June 1981, N E BROWN & J W BROWN.

Towards a grand strategy for the species, M A G MICHAUD.

The development of satellite communications and its socio-economic implications, A LEBEAU.
