## Executive Decree Authority

**John M. Carey and Matthew Soberg Shugart, Editors**

Executives increasingly take (or are given) the authority to act without concurrent legislative action. This book offers a theory of political institutions that predicts when executives should turn to decree and when legis-

latures should accept—or even prefer—this method of making policy. Extensive case studies demonstrate how decree has been used and abused in widely different political environments.

## Civil Society in Yemen

The Political Economy of Activism in Modern Arabia

**Sheila Carapico**

Carapico traces the complexities of Yemen's history over the past fifty years, considering its response to the colonial encounter and to years of civil unrest. Challenging the stereotypical view of conservative Arab Muslim society, she demonstrates how the country is actively seeking to develop the political, economic and social structures of the modern democratic state.

## Politics and Uncertainty

Theory, Models and Applications

**Claudio Cioffi-Revilla**

Rather than treating the uncertainty of politics as a mystery, this book provides an original and direct treatment of political uncertainty as a scientifically-knowable phenomenon. The author shows how probability and mathematical modeling can play a central role in understanding a range of complex and fundamental issues in both domestic and international politics.

## Political Parties, Growth and Equality

Conservative and Social Democratic Economic Strategies in the World Economy

**Carles Boix**

The current literature on political economy maintains that, due to the globalization of the economy and each country's institutional structures, parties hardly affect the economy. Examining all advanced countries since the 1960s, Boix shows instead that partisanship and electoral politics play a fundamental role in the selection of policies to generate long-term growth and economic competitiveness.

How the Courts Reformed America's Prisons

**Malcolm M. Feeley and Edward L. Rubin**

*"This is an ambitious project—systematic in its development and sweeping in its scope. Feeley and Rubin stake out controversial ground and defend that ground with empirical data, exhaustive research, and insightful analysis and argument.... This is certainly the best book anyone has ever written about the prison cases. It is also the best book anyone has written about judicial policy making."* — Larry W. ## The Politics of Oligarchy

Institutional Choice in Imperial Japan

**J. Mark Ramseyer and Frances M. Rosenbluth**

This book examines a key question of modern Japanese politics: why the Meiji oligarchs were unable to design institutions capable of protecting their power. The authors argue that it was the oligarchs' very inability to agree among themselves on how to rule that prompted them to cut the military loose from civilian control—a decision that was to have disastrous consequences not only for Japan but for the rest of the world.

## Nations at War

A Scientific Study of International Conflict

**Daniel S. Geller and J. David Singer**

*Nations at War* provides a scientifically-derived explanation of war. It develops this explanation by reviewing data-based studies of international conflict, analyzing war from the fifteenth to the twentieth centuries, and identifying factors such as geography, regimes, military capabilities, alliances, and trade associated with both the onset and destructiveness of these conflicts.

## Dismembering the Body Politic

Partisan Politics in England's Towns, 1650-1730

**Paul D. Halliday**

This book is a major survey of how towns were governed in late Stuart and early Hanoverian England. England's civil wars in the 1640s broke apart a society that had been used to political consensus. This book explains how war unleashed a long cycle of purge and counter-purge and how society found the means to absorb divisive politics peacefully.

## Avoiding Politics

How Americans Produce Apathy in Everyday Life

**Nina Eliasoph**

Civic groups are said to be the fount of democracy, but these vivid portraits of American life reveal an intriguing culture of political avoidance. Eliasoph accompanied volunteers, activists and recreation club members, listening to them talk—and not talk—politics, in a range of private and public settings. *Avoiding Politics* shows how citizens create and communicate political ideas in everyday life, and the hard work it takes to produce apathy in a democracy.

## Speaking for the People

Party, Language and Popular Politics in England, 1867-1914

**Jon Lawrence**

*Speaking for the People* examines the popular appeal of Liberal, Tory and Labour politics between 1867 and 1914. The main theme of the book is a recognition, and exploration, of the problematic relationship between political parties and the people they sought to represent. The book challenges traditional ideas about the "triumph of party" after 1867, suggesting that politics remained much more fluid and unpredictable than historians have often allowed.

## THE COLD WAR

An International History, 1947-1991  
S. J. BALL

This study provides a fresh assessment of the entire course of the Cold War, and is based on insights into the structure of postwar international politics revealed by the collapse

of the Soviet Union. Drawing on newly released material and scholarly research from both the West and former communist states, it argues that the Cold War can only be understood by exploring the interplay between ideology, domestic politics, and military security—not only in the US and the Soviet Union, but in other states and movements with a capacity for significant military and political action.

A Structural Perspective  
OSCAR H. GANDY, Jr.

This book provides a comprehensive review of scholarly approaches to understanding the place of race and ethnicity in the evolving systems of information

media. It explores the concept of race through three facets of analysis: media systems and institutions; communication frames and symbolic representations; and social constructions. Borrowing insights from behavioral science, political economy, and the more interpretative strands of contemporary cultural studies, the book fully and directly enters the contemporary debate about structure and agency.

## WHEN WOMEN LEAD

Integrative Leadership in State Legislatures  
CINDY SIMON ROSENTHAL

"When Women Lead is a study of politics, gender, leadership, and the institution of the legislature. Rosenthal thoughtfully and carefully takes on this challenging tangle of issues in order to understand whether and how women are associated with a distinctive type of legislative leadership. Rosenthal knows her subject well. She brings to this study of women's leadership in legislatures a scholar's intellectual distance as well as a staff member's practical proximity—a combination which both grounds and enriches her conclusions."—Ruth B. Mandel, Rutgers University

This study of women who chair state legislative committees examines one of America's largest cohorts of women in institutional leadership roles, thus making an important contribution to our understanding of gender, organizational leadership, and state legislatures.

## RETHINKING THE NEW DEAL COURT

The Structure of a Constitutional Revolution  
BARRY CUSHMAN

"A meticulous craftsman, Cushman builds a convincing case for his revisionist thesis. His

book is a smooth blend of intellectual and political history; he is equally at home with the nuances of legal doctrine on the Court and the political battles going on outside it. He brings out of the large unruly mass of constitutional cases decided between 1870 and 1937 a strong, clear story, powerful in its simplicity and very persuasive. After this book no one will be able to talk about the 'Constitutional Revolution of the New Deal' in quite the same way again."

It offers fresh perspectives on standard treatments of state politics and is extraordinarily well-researched. It is both a comprehensive survey of the field of American state politics and a fresh theoretical primer for understanding state policy dynamics."—Robert B. Albritton, Northern Illinois University

## The Agony of the Russian Idea

Tim McDaniel

In a fascinating account for anyone interested in Russia's political struggles, Tim McDaniel explores the inability of all its leaders over the last two centuries to create the foundations of a viable modern society.

"Readers seeking to understand Russia's identity crisis and how it relates to the underlying consequences of Yeltsin's efforts to change the country have in this book a succinct, elegant, historically sensitive guide."

## Does Conquest Pay?

The Exploitation of Occupied Industrial Societies

Peter Liberman

Can foreign invaders successfully exploit industrial economies? The resurgence of nationalism has led many policymakers and scholars to doubt that conquest still pays. Peter Liberman demonstrates that expansion can, in fact, provide rewards to aggressor nations and suggests that the international system is more war-prone than many optimists claim.

"An outstanding piece of multilingual historical and economic research in the service of social science."—*Foreign Affairs*

## Cultural Realism

Strategic Culture and Grand Strategy in Chinese History

Alastair Iain Johnston

*Cultural Realism* is an in-depth study of premodern Chinese strategic thought that has important implications for contemporary international relations theory. Its findings challenge dominant interpretations of traditional Chinese strategic thought.

"Johnston is correct that many actual Chinese uses of force look far more like 'realism' than many Sinologists have realized. His stress on the 'realist' thread in the classics is likewise very illuminating."

## Constitutional Rights and Powers of the People

Wayne D. Moore

In a book that will radically reorient thinking about the Constitution, Wayne Moore moves away from an exclusive focus on courts and judges and examines a number of questions: Who is included among the "people"? How are the people politically configured? How may the people act? And how do the people relate to government? In answering these questions, Moore offers new insights into central problems of constitutional history, theory, and law.

"The entire package within which these familiar positions take shape is often refreshingly original. . . . There is much in Moore's work that merits attention from constitutional theorists."—Gary Jeffrey Jacobsohn, *The Law and Politics Book Review*

**Mistaken Identity**

The Supreme Court and the Politics of Minority Representation

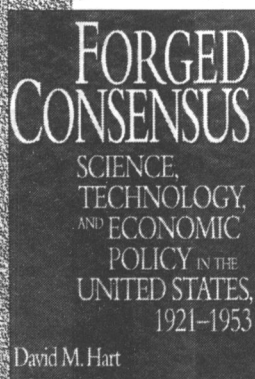

**Keith J. Bybee**

Is it ever legitimate to redraw electoral districts on the basis of race? The U.S. Supreme Court has treated race-conscious redistricting either as a requirement of political fairness or as an exercise in corrosive racial quotas. Cutting through these contradictory positions, Keith Bybee examines the theoretical foundations of the Court's decisions and the ideological controversy those decisions have engendered. He uncovers erroneous assumptions about political identity on both sides of the debate and formulates new terms on which minority representation can be pursued.

"Throughout this book, Keith Bybee presents a fine balance of historical, legal, and political philosophical argument. He knows what he is doing in each genre; this is an impressive display of scholarly mastery."

**Forged Consensus**

Science, Technology, and Economic Policy in the United States, 1921-1953

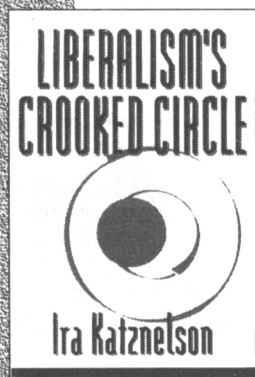

**David M. Hart**

In this thought-provoking book, David Hart challenges the creation myth of post-World War II federal science and technology policy. According to this myth, the postwar policy sprang full-blown from the mind of Vannevar Bush in the form of *Science, the Endless Frontier* (1945). Hart puts Bush's efforts in a larger historical and political context, demonstrating in the process that Bush was but one of many contributors to this complex policy.

Hart places these policy entrepreneurs in the broad scheme of American political development, and shows that policymakers today are still grappling with the legacies of the forged consensus.

## COLLECTIVE CONFLICT MANAGEMENT AND CHANGING WORLD POLITICS

*Joseph Leggold and Thomas G. Weiss, editors*

"This book is very helpful in making sense of the potential for multilateral military action in the post Cold War world. In particular, the chapters on the UN, NATO and the American military were very well done and informative. They provided conceptual background and solid empirical study.

"I came away with a much better understanding of the future for collective conflict management—both the specific tools available to states and the international community and the international political context in which those actions might take place." — Elizabeth Kier, University of California, Berkeley

## THE POLITICS OF INTERNATIONAL HEALTH

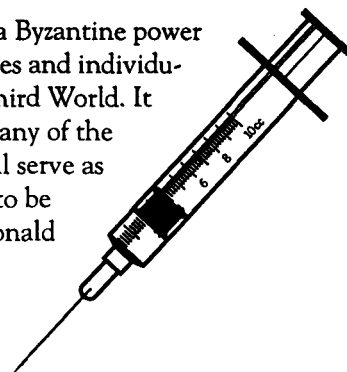

### The Children's Vaccine Initiative and the Struggle to Develop Vaccines for the Third World

*William Muraskin*

"The author, in a carefully researched effort, illuminates the anatomy of a Byzantine power struggle among otherwise well-meaning but competing international agencies and individuals who are endeavoring to develop and provide vaccines throughout the Third World. It is a remarkably even-handed effort, incorporating candid observations by many of the principal participants which are otherwise unavailable. This book could well serve as an exemplar of the difficulties surrounding what would superficially appear to be rather straightforward solutions to important international problems." — Donald A. Henderson, Johns Hopkins University Medical School

"This is an excellent book. From a public health point of view, it is a very important story. Not only are the basic facts well documented, but the psychosocial side of the story is vivid, utilizing well the selected interviews. Muraskin has fulfilled the historical scholar's job, and framed it in a clear, articulate story." — Samuel W. Bloom, Mount Sinai School of Medicine

## NEW DIRECTIONS IN OLD-AGE POLICIES

*Janie S. Steckenrider and Tonya M. Parrott, editors*

This book explores the changed political environment in the United States and what it means for the policies and programs benefiting the elderly and their families. It includes chapters written by distinguished contributors, such as Fernando Torres-Gil, Assistant Secretary for Aging, Clinton Administration, and discusses specific, realistic policy options for the future.

"Most policy oriented books tend to be quite specialized—on Social Security only, or Medicare only. This is truly the first I've seen that covers the whole range of aging policy issues. The essays are well-written, the topics are timely, and the contributors are top notch. There is nothing like it on the market." — Jill Quadagno, Pepper Institute on Aging and Public Policy, Florida State University

## DEMOCRATIC ARTWORKS

### Politics and the Arts from Trilling to Dylan

*Charles Hersch*

Focusing on a period in which the meaning of democracy came to the forefront of public debate, the fifties and sixties, the author argues that the arts can strengthen democracy by politically educating citizens. Hersch addresses this issue by first looking at the ideas of Lionel Trilling and the New York Intellectuals in the 1950s, as expressed through literature and social commentary, and then by showing how jazz and rock musicians in the 1960s, through their individual songs and performances, expressed the ideas and ideals of the political movements of that decade. *Democratic Artworks* is the first to consider the New York Intellectuals, sixties jazz, or Bob Dylan from the perspective of political theory and to focus on their contributions to democracy.

## Killing Detente

*The Right Attacks the CIA*  
ANNE HESSING CAHN

"*Killing Detente* is a fascinating and important historical 'post-mortem' on a neglected episode in the history of the decline and fall of the U.S.-Soviet detente of the 1970s. Using newly declassified documents, it recounts an important page in intelligence-policy relations. It is not only good history but also provides valuable advice for the present and the future."

ROBERT W. SPEEL

"This book fills an important void in the literature on party realignment by looking at Northern states over the past four decades. Speel's notion of a 'federalized' realignment in which voters favor one party at the presidential level but another at the state level is quite novel and likely to be of interest to students of realignment, elections, and political parties."

## Nationalism and the International Labor Movement

*The Idea of the Nation in Socialist and Anarchist Theory*  
MICHAEL FORMAN

"This timely study draws on the heritage of democratic nationalism to enrich current conceptions of internationalism and globalization. Forman's discussion of the 'nationalities' question, and the way he links it to individual choice and agency, are excellent. He also develops an internationalized conception of 'class' and makes an important contribution to our understanding of the politics of nation-building in the late 1990s."

## Between Two Nations

MICHAEL JONES-CORREA

Cohen shows how the widespread use of the U.S. dollar outside its borders, the push for a common European currency, and growing cross-border competition worldwide require a new consideration of 'the role that money plays in today's world.' ## Community Denied

*The Wrong Turn of Pragmatic Liberalism*

JAMES HOOPES

GWENDOLYN MINK

"At last—a serious counter-thrust against the popular self-interested praise for welfare reform. Mink . . . offers a positive argument for welfare as a fundamental right. . . . Hutchcroft addresses the political obstacles to Philippine development. 7 photos, 5 tables. \$39.95

## THE GOOD CITIZEN

A History of American Public Life

**Michael Schudson**

“An astonishing tour de force... provides a fresh way of thinking about the changing trajectory and dynamics of political culture in the United States. Schudson's work of creative synthesis could not be more timely, and it achieves notable clarity of exposition. It should be required reading for every American citizen—above all for cynics and skeptics who assume that meaningful participation in the polity is now beyond our ken.”

—**Michael Kammen**, author of *People of Paradox*

1998 ISBN: 0-684-82729-8 \$27.50

## THE POLITICS OF BAD FAITH

The Radical Assault on America's Future

**David Horowitz**

“Lays bare, with surgical precision, the ways in which American radical intellectuals have managed to disguise themselves as liberals and to marginalize the ideas of genuine liberals. The author reveals something quite unexpected, namely the survival in academe of Marxist illusions, even after the collapse of Marxism in the Soviet Union. Fascinating reading.”

—**Richard Pipes**, Harvard University

1998 ISBN: 0-684-85023-0 \$25.00

## SOMEONE ELSE'S HOUSE

America's Unfinished Struggle for Integration

**Tamar Jacoby**

“The best documentation yet of how—after the '60s—a burgeoning black power came into sharp conflict with the very racial idealism that had opened the way for it to emerge. With much journalistic empathy and a novelistic feel for detail, Jacoby takes us through the devolution of the integrationist dream into the aggressive, race-based, urban politics of New York, Detroit, and Atlanta during the '70s, '80s, and '90s. A penetrating work of social criticism; it is also the finest history of this period yet written.”

—**Shelby Steele**, author of *The Content of Our Character: A New Vision of Race in America*

1998 ISBN: 0-684-80878-1 \$30.00

## CREATED UNEQUAL

The Crisis in American Pay

**James K. Galbraith**

“An eye-opener...provocative, important, and readable. Policies tolerating high unemployment have fueled the huge growth in damaging wage inequality and its associated social and political maladies, Galbraith argues. Really full employment is key to a cure. Galbraith offers not just argument but a wealth of good evidence to support his case.”

—**Robert Eisner**, author of *The Misunderstood Economy: What Counts and How to Count It*

1998 ISBN: 0-684-84988-7 \$26.00

## THE UNMAKING OF AMERICANS

How Multiculturalism Has Undermined The Assimilation Ethic

**John J. Miller**

“A compact, spirited, and incisive analysis of immigration in contemporary America. John Miller defends the traditional American melting pot ideal against critics on both the right and the left. This book belongs on any short list of the best books on current political and social issues.”

—**Stephan Thernstrom**, Harvard University, coauthor of *America in Black and White: One Nation, Indivisible*

1998 ISBN: 0-684-83622-X \$25.00

## AUTOPSY OF AN EMPIRE

The Seven Leaders Who Built the Soviet Regime

**Dimitri Volkogonov**

“An engaging book, painstakingly documented throughout, compels us to pose: How did a system that methodically placed the bottom of society at the very top manage to survive for all of 70 years? And what failure of will led the West to behave so timidly, pursuing unobtainable friendship and detente with doddering mediocrities who engaged in the ceaseless accumulation of arms and who recklessly lit bonfires around the globe?”

—*The Wall Street Journal*

1998 ISBN: 0-684-83420-0 \$30.00

## THOSE DIRTY ROTTEN TAXES

The Tax Revolts That Built America

**Charles Adams**

“In his original, entertaining, and infuriating history, Charles Adams shows us that the only thing more American than politicians and their taxes is citizens and their tax revolts.”

—**David Boaz**, Executive Vice President, CATO Institute, author of *Libertarianism: A Primer*

1998 ISBN: 0-684-84394-3 \$25.00

## FOR THE PEOPLE

What the Constitution Really Says About Your Rights

**Akhil Reed Amar** and **Alan Hirsch**

“Eloquently sets out a vision of a 'populist' Constitution. Although even the most knowledgeable scholar can profit from the book, they write in a style that should be accessible to every citizen in the land. No reader will ever think of the Constitution in quite the same way again, and America will be better for this.”
