EMPAG 2000

7TH EUROPEAN MEETING ON PSYCHOLOGICAL ASPECTS OF GENETICS

MANCHESTER
21-23 September 2000

Deadline for Abstract submission:
31 March, 2000

Deadline for Registration:
15 June, 2000

All forms are now available on the website:
***[www.cmht.nwest.nhs.uk/directorate/
deptstmary/mdgenetic/empag2000.htm](http://www.cmht.nwest.nhs.uk/directorate/deptstmary/mdgenetic/empag2000.htm)***

Any problems accessing the website,
please visit www.cmht.nwest.nhs.uk
and select the conference on the hospital homepage

Conference Secretary: Barbara Egan, Dept. Clinical Genetics, St. Mary's Hospital,
Hathersage Road, Manchester, M13 0JH UK - Tel. ++44 (0) 161 276 6322

WORKSHOP ON TWIN STUDIES

BHOPAL

NOVEMBER 5-7 2000

ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE

TWIN RESEARCH Instructions for Authors

ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE: TWIN RESEARCH will accept original investigations, case reports, short notes, and letters to the editor. Authors who wish to submit review articles should first contact the editor's office. Manuscripts and all editorial correspondence should be sent to the Editor, Gregor Mendel Institute, Piazza Galeno 5, 00161 Rome, Italy.

Manuscripts: All manuscripts must be in English. Authors whose "first" language is not English should arrange for their manuscripts to be written in idiomatic English prior to submission. Submit the original and two clear copies of all elements (including tables and figures) typed on one side of good quality 22×28 cm (8½"×11") paper with at least 30 mm (1") margins. Double space everything. Start a new page for each major division of the manuscript. Number all pages in sequence beginning with the title page. Arrange the copy in the following order:

Title page: This should contain the complete article title, names and affiliations of all authors, institution at which the work was performed, acknowledgments of funding, name and address for all correspondence, and a running head of not more than 45 characters.

Abstract: This should summarize the major findings and conclusions in the paper in not more than 200 words preferably compressed into a single paragraph.

Key words: Submit six to twelve key words or phrases that will adequately index the subject matter of the article.

Text: The text should follow the format: Introduction, Materials and Methods (or, for clinical reports, Case History), Results, Discussion, Conclusions, and Acknowledgments. Use subheadings and paragraph titles whenever possible. Avoid footnotes whenever possible. Place statements that might be appropriate for footnotes to text, inside parentheses, within the text. For abbreviations, follow the guidelines in Council of Biology Editors Style Manual, 4th Edition (available from the American Institute of Biological Sciences, 3900 Wisconsin Avenue NW, Washington, DC 20016, USA). Define all unusual abbreviations at first mention. Units of measure must be abbreviated according to the International System of Units (SI) based on the metric system.

References: In the text, references should be cited as numerals in brackets. The final list should first be alphabetized and then numbered and include only references cited in the text. They must include names of all authors, complete title of the work cited, and inclusive page numbers. Abbreviate periodical titles according to the bibliographic Guide for Editors and Authors (BIOSIS et al, 1974). If there are particular problems with the reference system, authors can make special arrangements with the editor. In the following examples, note the punctuation, capitalization, and order of information:

1. Borgaonkar DS (1977): "Chromosomal Variation in Man: A Catalog of Chromosomal Variants and Anomalies, 2nd Ed." New York: Alan R. Liss.
2. Perez GL, Kelth L (1978): Electrocardiograms of twins. In Nance WE, Allen G, Parisi P (eds): "Twin research: Part C, Clinical Studies." New York: Alan R. Liss, pp. 39-48.
3. Wiener AS (1977): Blood group mythology. Present status. *Acta Genet Med Gemellol* 26: 3-15.

Tables: Each table must be typed on a separate page, be numbered in order of appearance with Arabic numerals, have a title, and be keyed into the text.

Illustrations: Use illustrations sparingly; They should not duplicate information already made clear in the text. When possible, they should be grouped as plates. Glossy black and white photographs 5"×7" or 8½"×10" in size are preferred (a charge will be made for color). All lettering must meet professional standards and be legible after reduction in size. Illustrations must be numbered in order of appearance with Arabic numerals and be keyed into the text. Name of author, figure number, and an arrow indicating orientation should be typed on a gummed label and affixed to the back of each illustration.

Legends: A legend must accompany each illustration and must define all abbreviations used therein.

All manuscripts submitted to **ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE: TWIN RESEARCH** must be the original results of the author's own work. They must be submitted solely to this Journal, may not have been published in any part or form (except as a meeting abstract) in another publication of any type, professional or lay, and become the property of the publisher. Any material reproduced or adapted from any other published or unpublished source must be duly acknowledged. It is the author's responsibility to obtain permission to reproduce copyrighted material. Upon acceptance of a manuscript for publication, the author will be requested to sign an agreement transferring copyright to the publisher, who reserves copyright. No published material may be reproduced or published elsewhere without the written permission of the publisher and the author. The journal will not be responsible for the loss of manuscripts at any time. All statements in, or omissions from, published manuscripts are the responsibility of the authors.
