

PROCEEDINGS
OF
THE ROYAL SOCIETY
OF
EDINBURGH.

VOL. XXIV.

NOVEMBER 1901 TO JULY 1903.

EDINBURGH:
PRINTED BY NEILL AND COMPANY, LIMITED.
MDCCCIV.

CONTENTS.

	PAGE
Election of Office-Bearers, Session 1901-2,	1
Chairman's Opening Address. By the Hon. Lord M'Laren, <i>Vice-President</i> ,	2
On an Instrument for Trisecting any Angle. By Jas. N. Miller. <i>Communicated by Professor Chrystal</i> . Issued separately February 12, 1902,	7
Note on the Mathematical Theory of Miller's Trisector, and its Relation to other Solutions of the Problem of Trisection. By Professor Chrystal. Issued separately February 12, 1902,	9
On the Relation of Miller's Trisector to the Quartic Trisectrix, with a Description of a Seven-bar Limaçonograph. By Professor Chrystal. Issued separately February 17, 1902,	17
The Condition of the Iron in the Spleen. By William Brodie Brodie, M.D., F.R.S.E., Muirhead Demonstrator of Physiology in the University of Glasgow. Issued separately February 17, 1902,	21
A Theoretical Representation leading to General Suggestions bearing on the Ultimate Constitution of Matter and Ether. By John Fraser, Ordnance Survey. <i>Communicated by Professor Chrystal</i> . Issued separately February 21, 1902,	26
On the Existence within the Liver Cells of Channels which can be directly injected from the Blood-Vessels. By E. A. Schäfer. Issued separately March 8, 1902,	65
Quaternion Binaries: an Extension of Quaternions to give an Eight-element System applicable to Ordinary Space. By Dr W. Peddie. Issued separately March 8, 1902,	70
Certain Considerations regarding Algol Variation, with special reference to C.P.D.—41°4511. By Alexander W. Roberts, D.Sc., F.R.A.S. (With Two Plates.) Issued separately March 31, 1902,	71
Suggested Modifications of the Sign of Equality for use in Chemical Notation. By Hugh Marshall, D.Sc. Issued separately March 21, 1902,	85
The Action of Silver Salts on Solutions of Ammonium Persulphate. By Hugh Marshall, D.Sc., and J. K. H. Inglis, M.A., B.Sc. Issued separately March 31, 1902,	88
Magnetic Shielding in Hollow Iron Cylinders. By James Russell. (<i>Abstract</i> .) Issued separately March 31, 1902,	94
A New Specifying Method for Stress and Strain in an Elastic Solid. By Lord Kelvin. Issued separately April 1, 1902,	97

	PAGE
Note on Selected Combinations. By Thomas Muir, LL.D. Issued separately April 1, 1902,	102
A Continuant Resolvable into Rational Factors. By Thomas Muir, LL.D. Issued separately April 1, 1902,	105
The Plague Research Laboratory of the Government of India, Parel, Bombay. By W. B. Bannerman, M.D., B.Sc., Major, Indian Medical Service, Superintendent of the Laboratory. Communicated by Professor C. Hunter Stewart. Issued separately May 1, 1902,	113
Observations on the Amount of Dissolved Oxygen in Water required by young Salmonidæ. By D. Noël Paton, M.D., F.R.C.P.E. (From the Laboratory of the Royal College of Physicians of Edinburgh.) Issued separately May 2, 1902,	145
The Theory of Jacobians in the Historical Order of its Development up to 1841. By Thomas Muir, LL.D. Issued separately June 9, 1902,	151
Functional Inertia, a Property of Protoplasm. By David Fraser Harris, M.D., B.Sc. (Lond.), Lecturer on Physiology and Histology, University of St Andrews. Issued separately June 9, 1902,	196
On the Functional Inertia of Plant Protoplasm. By R. A. Robertson, M.A., B.Sc., Lecturer on Botany, University of St Andrews. Communicated by Dr Fraser Harris. Issued separately June 9, 1902,	200
Molecular Dynamics of a Crystal. By Lord Kelvin. (With Seven Diagrams.) Issued separately June 9, 1902,	205
Does the Spectrum-place of the Sodium Lines vary in different Azimuths? By the late Professor C. Piazzi Smyth, Astronomer-Royal for Scotland. Communicated by Professor J. G. MacGregor. Issued separately July 18, 1902,	225
The Dissociation of the Compound of Iodine and Thio-urea. By Hugh Marshall, D.Sc. Issued separately July 18, 1902,	233
Some Identities connected with Alternants and with Elliptic Functions. By Professor W. H. Metzler. Issued separately August 14, 1902,	240
The Theory of Orthogonants in the Historical Order of its Development up to 1832. By Thomas Muir, LL.D. Issued separately August 18, 1902,	244
Experimental Observations on Leucolysis. By Alexander Goodall, M.D., M.R.C.P.E., and Edward Ewart, M.B., Ch.B. Communicated by Dr D. Noël Paton. (With a Plate.) Issued separately August 19, 1902,	289
Amorphous Sulphur and its Relation to the Freezing Point of Liquid Sulphur. By Professor Alexander Smith, Ph.D., D.Sc. Issued separately August 19, 1902,	299
Application of Miller's Trisector to the Quinquesection of any Angle. By James N. Miller. Communicated by Dr Knott. Issued separately August 19, 1902,	302
Thallic Sulphates and Double Sulphates. By Hugh Marshall, D.Sc. Issued separately August 30, 1902,	305
On Superposed Magnetic Inductions in Iron. By James Russell. (Abstract.) Issued separately October 7, 1902,	312

	PAGE
On the Use of Quaternions in the Theory of Screws. By Dr W. Peddie. Issued separately October 7, 1902,	314
Contributions to Scottish Mineralogy. (Part I.) By J. G. Goodchild, of the Geological Survey, F.G.S., F.Z.S. <i>Communicated by F. Grant Ogilvie</i> . Issued separately November 15, 1902,	321
On Causes which determine the Formation of Amorphous Sulphur. By Professor Alexander Smith, B.Sc., Ph.D. Issued separately November 15, 1902,	342
Quaternion Notes. By the late Professor Tait. <i>Communicated by Professor C. G. Knott</i> . (With a Plate.) Issued separately January 17, 1903,	344
The Electric Conductivities and Relative Densities of certain Samples of Sea-Water. By J. J. Manley, Daubeny Curator, Magdalen College, Oxford. <i>Communicated by Sir John Murray, K.C.B.</i> Issued separately January 24, 1903,	347
Freezing-Point Depression in Electrolytic Solutions. By James Walker, F.R.S., and A. J. Robertson, B.Sc., University College, Dundee. Issued separately January 28, 1903,	363
Note on Pure Periodic Continued Fractions. By Thomas Muir, LL.D. Issued separately February 28, 1903,	380
The Generating Functions of certain Special Determinants. By Thomas Muir, LL.D. Issued separately February 28, 1903,	387
Some Observations on Cyanosis. By G. A. Gibson, M.D., D.Sc., F.R.C.P. Edin., Physician to the Royal Infirmary, Edinburgh. Issued separately April 4, 1903,	393
On the Isoclinal Lines of a Differential Equation of the First Order. By J. H. Maclagan-Wedderburn. <i>Communicated by Professor Chrystal</i> . Issued separately April 4, 1903,	400
On the General Scalar Function of a Vector. By J. H. Maclagan-Wedderburn. <i>Communicated by Dr W. Peddie</i> . Issued separately June 5, 1903,	409
On the Equation of a Pair of Tangents to a Conic. By Professor A. H. Anglin, Queen's College, Cork. (<i>Abstract.</i>) Issued separately June 5, 1903,	413
Suggestion as to the Cause of the Earth's Internal Heat. By George Romanes, C.E. With Notes by Professors A. Gray and C. G. Knott. <i>Communicated by Dr C. G. Knott</i> . (With a Plate.) Issued separately June 5, 1903,	415
The Occurrence of the Sperm Whale or Cachalot in the Shetland Seas, with Notes on the Tympano-petrous Bones of Physeter, Kogia, and other Odontoceti. By Sir William Turner, K.C.B., F.R.S. Issued separately June 5, 1903,	423
Some Observations on the Young Scales of the Cod, Haddock and Whiting before Shedding. By Mr Alex. Wallace Brown, St Andrews. <i>Communicated by Dr A. T. Masterman</i> . Issued separately August 3, 1903,	437
On the Series—	
$y = 1 + F([\alpha][\beta][\gamma]) \cdot \frac{x^{[1]}}{[1]!} + F([\alpha][\beta][\gamma]) \cdot F([\alpha][\beta][\gamma] + 1) \frac{x^{[2]}}{[2]!} + \dots$	
and its Differential Equation. By the Rev. F. H. Jackson. Issued separately August 3, 1903,	439

	PAGE
The Theory of Colour Vision. By Dr W. Peddie. Issued separately August 3, 1903,	448
A Direct Electrical Method of Determining Latent Heat of Evaporation at the Boiling Point. By A. Cameron Smith, M.A., B.Sc., Lecturer in Physics, Heriot-Watt College, Edinburgh. Communicated by Professor F. G. Baily. Issued separately August 8, 1903,	450
The Wild Horse (<i>Equus prjevalskii</i> , Poliakoff). By J. C. Ewart, M.D., F.R.S., Professor of Natural History, University of Edinburgh. Issued separately August 8, 1903,	460
Statistical Evidence regarding the Influence of Artificial Propagation upon the Salmon of the American Rivers. By William Murray. Communicated by Dr D. Noël Paton. Issued separately August 8, 1903,	469
October Salmon in the Sea. By D. Noël Paton, M.D. (With Three Plates.) Issued separately August 28, 1903,	486
Note on a Method of Bringing Together the Two Spectra Compared in the Ordinary Spectrophotometer. By J. R. Milne, B.Sc. Communicated by Professor J. G. MacGregor. Issued separately August 28, 1903,	496
Note on Resistance Change accompanying Transverse Magnetisation in Nickel Wire. By Professor C. G. Knott, D.Sc., and Mr Peter Ross, M.A. Issued separately August 28, 1903,	501
On the Abdominal Viscera of <i>Cercocetus fuliginosus</i> and <i>Lagothrix humboldti</i> . By O. Charnock Bradley, M.B. (With Three Plates.) Issued separately October 21, 1903,	505
The Molecular Condition of Iron Demagnetised by Various Methods. By James Russell. Issued separately October 17, 1903,	544
A Special Circulant considered by Catalan. By Thomas Muir, LL.D. Issued separately October 21, 1903,	547
The Theory of Axisymmetric Determinants in the Historical Order of Development up to 1841. By Thomas Muir, LL.D. Issued separately December 28, 1903,	555
On the Origin of the Pineal Body as an Amesial Structure, deduced from the Study of its Development in Amphibia. By John Cameron, M.B. (Edin.), M.R.C.S. (Eng.), Carnegie Fellow, Demonstrator of Anatomy, United College, University of St Andrews. Communicated by Dr W. G. Aitchison Robertson. (With a Plate.) Issued separately December 28, 1903,	572
Meetings of the Royal Society—Sessions 1901–1903,	582
Donations to the Library,	612
OBITUARY NOTICES,	642
Abstract of Accounts for Session 1902–1903,	650
INDEX,	661
