*Proceedings of the 1972 Biennial Meeting
of the Philosophy of Science Association*

Edited by

K. F. SCHAFFNER and R. S. COHEN

This volume contains papers which have been selected from symposia and contributed sessions of the 3rd Biennial Meeting of the Philosophy of Science Association, held at invitation of Michigan State University at Lansing, Michigan, on October 27–29, 1972. Symposia were devoted to: (1) Space, time and matter – the foundation of geometrodynamics; (2) Fundamental problems in the concept of randomness; (3) Values, ideology and objectivity in the social sciences; (4) Modality and the analysis of scientific propositions; (5) Discovery, rationality and progress in science. Further sessions were held on the full spectrum of current issues in the philosophical analysis and critique of the natural and the social sciences.
