

ZEISS

Throughout the world, ZEISS stands for the highest quality and reliability. Carl Zeiss Microscopy is part of the ZEISS group, a leading organization of companies worldwide in the optical and optoelectronics industries. As the world's only manufacturer of light, electron and x-ray microscopes, ZEISS offers tailor-made widefield, confocal, x-ray and electron/ion microscope systems for imaging in materials research, life sciences, biomedical research and industry.

- **FIB-SEM and Ion Microscopes:** Combine 3D imaging and analysis with focused ion beam milling to include nanotomography and nanofabrication with Crossbeam. Fabricate sub-10nm structures with ORION NanoFab.
- **Scanning Electron Microscopes:** Acquire high resolution surface information and superior materials contrast for applications in nanotechnology, materials analysis, semiconductor failure analysis, life sciences and quality assurance.
- **X-ray Microscopes:** Experience non-destructive, 3D imaging with industry-best resolution and contrast. With sub-micron and nanoscale 3D XRM systems, realize synchrotron quality tomographic imaging in your laboratory.
- **Confocal & Superresolution Microscopes:** The revolutionary ZEISS Airyscan detector for confocals improves your imaging with better signal-to-noise, speed and resolution. The ZEISS ELYRA superresolution system takes light microscopy to its resolution limit of 20nm.
- **Compound Microscopes:** From routine microscopes for quick inspections to fully motorized platforms for advanced research and automated imaging, ZEISS upright and inverted microscopes are configurable to your specific imaging needs.
- **Stereo and Zoom Microscopes:** Generate three-dimensional, laterally precise images. These products offer large object fields and allow extended working distances, ideal for observing large samples or analysis of rough materials surfaces.
- **Digital Microscopes:** ZEISS Smartzoom 5 is your smart digital microscope, ideal for quality control, quality assurance and failure analysis applications in virtually every field of industry.
- **Digital Slide Scanners:** Digitize your specimens and create high-quality virtual slides with ZEISS Axio Scan.Z1. Automatically image up to 100 slides in brightfield and fluorescence with a single push of a button.
- **Digital Cameras:** ZEISS offers color and monochromatic, entry-level to research grade digital cameras for microscopy for every application.

How to find us

Carl Zeiss Microscopy, LLC
One Zeiss Drive, Thornwood, NY 10594
Tel: +1 800 233-2343
Email: info.microscopy.us@zeiss.com

// PERFORMANCE
MADE BY ZEISS

Your FIB-SEM for High Throughput Nanotomography and Nanofabrication **ZEISS Crossbeam 340 and 540**

Highest 3D
Resolution

Enjoy High Productivity with an Open 3D Nano-Workstation

With ZEISS Crossbeam 340/540 you experience an outstanding combination of imaging performance and analytical power. Process and prepare any sample on a nanoscopic scale with the next-generation FIB. Observe your process in parallel with the superb optics of the GEMINI column. Enjoy demanding experiments with your Crossbeam especially designed for long-term stability.
