### PARADIGMS AND REVOLUTIONS: Appraisals and Applications of Thomas Kuhn's Philosophy of Science

*Gary Gutting, editor*

Thomas S. Kuhn's *The Structure of Scientific Revolutions* may well be the most influential academic book of the past two decades. Kuhn's ideas have entered a wide range of disciplines from political science, economics and sociology, to history, philosophy of science and theology. Here, for the first time, is a judicious selection of the major evaluations and applications of Kuhn's work in these diverse fields of inquiry.

### STRATEGIES OF POLITICAL EMANCIPATION

*Christian Bay*

Christian Bay, also author of a classic book on freedom, *Structure of Freedom*, seeks to establish in *Strategies of Political Emancipation* a connection between freedom and need: if people are to be free, their basic, natural needs must be filled. Thus Bay argues for a politics of emancipation which would support and encourage the solidarity of human communities in the fulfillment of their basic needs.
