American Branch: 32 East 57th Street, New York, N.Y. 10022

SUBSCRIPTION £6 net (U.S.A. \$21.00) per annual volume

SINGLE PARTS 47s. 6d. net (U.S.A. \$8.50)

GENETICAL RESEARCH

GENETICAL RESEARCH publishes original work on all aspects of genetics, or in any field of research which has an important bearing on genetics. Papers will be submitted to referees before acceptance. They will generally be printed in order of acceptance. In addition, short notes limited to 1500 words or the equivalent space including figures, etc., may be included if received 3 months before publication date.

EACH ANNUAL VOLUME will consist of three parts (to be published in February, July and November) plus an index.

SUBSCRIPTIONS may be sent to any bookseller or to the Cambridge University Press, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. should be sent to the American Branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £6 net (including postage) for an annual volume of three parts (\$21.00 in the U.S.A.), payable in advance; Separate parts 47s. 6d. or \$8.50 each (plus postage).

NOTES FOR CONTRIBUTORS

CONTRIBUTIONS will be welcomed from scientists of all nationalities, but must be written in English, with an English summary. An additional summary in French, German, Russian or Italian will be accepted. Papers should be sent to the Executive Editor, Dr. E. C. R. Reeve, Institute of Animal Genetics, West Mains Road, Edinburgh 9.

GENERAL. Submission of a paper or note will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers published in *Genetical Research* may not be reprinted or published in translation without permission from the Editorial Board. Papers should be as concise as clarity permits, and illustrations kept as few as possible. Attention to the following instructions will assist rapid publication.

TYPESCRIPTS. A top copy and one carbon copy should be submitted. They should be typed with double-spacing, on one side of the paper, leaving margins of about 1½ inches at the left-hand side and head of each sheet. Quarto is preferred to foolscap paper. Heavily corrected typescripts may have to be returned to the author for retyping. Papers should state the name and address of the author (or his proxy) to whom proofs are to be sent. The address of the laboratory at which the work was carried out will be printed with the authors' names at the head of the paper, and changes of address and sources of financial support may be added in footnotes.

A short title should be supplied for running headlines; this must not exceed 50 characters, counting each letter and space as one character.

(continued inside back of cover)

brain function, vol. II

RNA and Brain Function; Memory and Learning. Edited by MARY A. B. BRAZIER. An examination of the relationship between the coding and storage of genetic information and the phenomena of memory and learning. This book reviews the state of nucleic acid coding in genetics, re-examines some of the earlier attempts to identify a nucleic acid base code for information storage and retrieval in the nervous system, and discusses the concept that some of the advances made in the area of genetic coding can be carried over to the processes of memory and learning. Principal contributors: M. W. Nirenberg, H. Hydén, S. L. Palay, W. Hild, J. V. Luco, E. R. John, F. Morrell, L. Weiskrantz, W. R. Adey, W. H. Feindel, M. A. B. Brazier, M. Victor, and O. E. Reynolds. Introduction by H. W. Magoun.

UCLA FORUM IN MEDICAL SCIENCES, NO. 2

\$10.00

UCLA FORUM IN MEDICAL SCIENCES. General Editor: Victor E. Hall, M.D., Chairman of the Department of Physiology, School of Medicine, University of California, Los Angeles. Each volume in this series of books which report on symposia and conferences held in the School of Medicine of the University of California, Los Angeles is devoted to a single major field of active basic or clinical investigation. Previously published in this Series: BRAIN FUNCTION, VOLUME I: *Cortical Excitability and Steady Potentials*; *Relations of Basic Research to Space Biology*. UCLA FORUM IN MEDICAL SCIENCES, NO. 1.

CAMBRIDGE

Theory and Practice in Experimental Bacteriology

G. G. MEYNELL & ELINOR MEYNELL

A documented guide to basic bacteriological techniques. The authors provide both theory and working rules, and give tables to lessen the computation involved in standard procedures. Although the main emphasis is on bacteria, much of the material is applicable to micro-organisms of all sorts.

COMMONWEALTH BUREAU OF
ANIMAL BREEDING AND GENETICS

ANIMAL BREEDING ABSTRACTS

Issued quarterly in March, June, September and December

This journal provides comprehensive coverage of world literature on the reproduction and genetics of laboratory mammals (excluding primates) as well as of farm livestock, poultry, and other animals of economic importance. Theoretical and statistical genetics are covered in so far as these are concerned with principles of general application. In addition to abstracts the journal contains book reviews and review articles.

Recent review articles include "Behavioural responses in farm animals and their relevance to research techniques", by E. S. E. Hafez and D. R. Lindsay; "Genetic aspects of disease resistance", by H. T. Fredeen. The September issue will carry an article by R. C. Roberts on the contribution of the laboratory mouse to animal breeding research.

The Journal of General Microbiology

Editors: B. C. J. G. KNIGHT and A. F. B. STANDFAST

The *Journal of General Microbiology* is conducted by the Society for General Microbiology, whose aim is to promote the advancement of microbiology by providing a common meeting-ground for those working in all the various specialized fields, including, for example, medical, veterinary, agricultural and economic microbiology. The Society is concerned with the more fundamental aspects of the study of bacteria, viruses, micro-fungi, protozoa and microscopic algae in their various biological activities, its members being united by the common aim of developing scientific knowledge concerning micro-organisms.

*The subscription rate is 80s. net per volume of 3 parts. Single parts 35s. each, plus postage.
Four volumes will be issued each year. Orders should be sent to*

GENETICA AGRARIA

A Journal of "Genetics applied to Agriculture" edited by the Istituto di Zoologia of the University of Pavia with the support of the Società Italiana di Genetica Agraria (SIGA).

The Journal is issued four times a year. Price per volume of about 400 pages: from Vol. IX^o, Lit. 5,000 or \$8.5; from Vol. XV^o, Lit. 6,500 or \$10.5.

Miscellaneous papers, proceedings of special meetings and the Proceedings of the Annual Meeting of the SIGA are published:

Vol. XV^o; 1961, n. 1-2: Proceedings II^o National Meeting on:

"durum wheat", Foggia (June 1960).

1962, n. 3-4: Proceedings of the VIII^o Meeting of the SIGA in Bergamo on:
"Breeding for quality in cultivated plants".

Vol. XVI^o; 1963, n. 1-4: Proceedings of the VIII^o Meeting of the SIGA (continued) and miscellaneous contributions.

Vol. XVII^o; 1963, n. 1-4: Proceedings of the FAO Meeting on:

"Plant exploration and introduction", Rome 1961, edited by Julén.

Vol. XVIII^o; 1964, n. 1-2; 3: Proceedings of the IX^o Meeting of the SIGA (Palermo 1963).

Vol. XIX^o; 1965: Proceedings of the X^o Meeting of the SIGA (Rieti 1964) and miscellaneous papers (in press).

Orders may be sent to the Managing Editor or placed through booksellers.

Managing Editor: The Acting Director, Istituto di Zoologia, P. Botta,
PAVIA (Italy).

COMMONWEALTH BUREAU OF PLANT BREEDING AND GENETICS

SCHOOL OF AGRICULTURE, CAMBRIDGE, ENGLAND

Information on all topics concerned with the improvement of economic plants and microorganisms, in particular the methods and achievements of crop breeding, field trials, new varieties and strains, genetics and cytology, is given regularly in the journal

PLANT BREEDING ABSTRACTS

COMPILED FROM WORLD LITERATURE

Each volume contains over seven thousand abstracts from articles and reports in thirty to forty different languages, also reviews of new books and notices of new journals.

ANNUAL SUBSCRIPTION:

Rate to subscribers in Non-Contributing Countries 140s. (\$21.00)

Rate to subscribers in Contributing Countries 70s. per volume (including indexes)

Order through booksellers or to

INTERNATIONAL ABSTRACTS OF BIOLOGICAL SCIENCES

AIMS AND SCOPE

INTERNATIONAL ABSTRACTS OF BIOLOGICAL SCIENCES attempts to cover the more important papers in experimental biology, approaching the subject from the fundamental point of view, with emphasis on

ANATOMY
BIOCHEMISTRY
BIOPHYSICS
CYTOLOGY

GENETICS
IMMUNOLOGY
PHARMACOLOGY
PHYSIOLOGY

Also covered are BOTANY and ZOOLOGY, treated as experimental subjects; ANIMAL BEHAVIOUR; biochemical and physiological aspects of MICROBIOLOGY and PATHOLOGY; ODONTOLOGY, which includes DENTAL PATHOLOGY and DENTAL ANATOMY.

JOURNALS COVERED

A list of the journals (currently over 500) which are regularly scrutinized by the abstractors is given in the first number of each volume. In the majority of cases an indicative abstract of the paper is prepared, but in a few cases—for instance, if the paper is a preliminary communication or the subject matter is border-line—an expanded title only is given.

The total number of abstracts published in a year exceeds 26,400. Monthly issues contain over 2,200 abstracts each. Three issues and index of subjects and authors constitute a quarterly volume.

mentioning this journal*

PERGAMON PRESS Headington Hill Hall, Oxford

JOURNAL OF GENETICS

Editor: S. D. Jayakar, M.Sc.

18/1 BARRACKPORE TRUNK ROAD,
P.O. BELGHORIA (West Bengal), INDIA.

The Journal of Genetics publishes researches in genetics, as Bateson used that word, i.e., to mean "Heredity and Variation" in his letter of 18/4/1905 to Adam Sedgwick, and "The special physiology of Descent" in "Darwin and Modern Science" in 1909. Primarily a record of Research in the Commonwealth, it includes some outside contributions.

It has been possible to reduce the price of Journal of Genetics to R⁸.55, £4 5s, or \$15 per volume.

Subscriptions are accepted as per volume. Volume 59 is the current volume.

*All communications should be sent to "THE JOURNAL OF GENETICS",
18/1 Barrackpore Trunk Road, P.O. Belghoria, West Bengal, India*

Under the new title

GENETICS AND MAN

Professor C. D. Darlington, has now thoroughly revised and brought up to date **THE FACTS OF LIFE** of which *Discovery* said

'This courageous and satisfying book by the world's most eminent cytologist attempts to present a coherent story of what heredity means to man'

and *Sir Julian Huxley*

'This is a brilliant and stimulating book. The story of the growth of our knowledge and the defeat of our superstitions and prejudices about human reproduction and heredity has never been better told'

Illustrated 42s

ALLEN & UNWIN

JOURNAL OF REPRODUCTION AND FERTILITY

The Journal publishes original papers, abstracts of Proceedings, and occasionally reviews and bibliographies, dealing with the morphology, physiology, biochemistry and pathology of reproduction in man and animals, and with the biological, medical and veterinary problems of fertility and lactation. Numbers are issued bimonthly to give two volumes a year.

Papers to appear during 1965 include:

- C. W. EMMENS and L. MARTIN. Biological activities of U-11100A
- C. W. EMMENS. Oestrogenic, anti-oestrogenic and anti-fertility activities of various compounds
- R. A. GRANT. Chemical changes in the uterus of the rat during late pregnancy and post-partum involution
- C. A. FINN and J. R. HINCHLIFFE. Histological and histochemical analysis of the formation of implantation chambers in the mouse uterus.
- C. V. HULET, W. C. FOOTE and R. L. BLACKWELL. Relationship of semen quality and fertility in the ram to fecundity in the ewe
- A. B. KAR, V. P. KAMBOJ, A. GOSWAMI and S. R. CHOWDHURY. Effect of an intra-uterine contraceptive suture on the uterus and fertility of rats
- R. ELIASSON. Accurate determination of glucose in human semen
- R. ELIASSON. Effect of frequent ejaculations on the composition of human seminal plasma
- C. W. ALLISTON, B. HOWARTH, Jr. and L. C. ULBERG. Embryonic mortality following culture in vitro of one- and two-cell rabbit eggs at elevated temperatures

Brief Communications

- M. HAMMOND, M. A. BOONE, B. D. BARNETT and D. E. TURK. Studies of the composition of the deoxyribonucleic acid of the fowl spermatozoon
- A. MCLAREN. Placental weight loss in late pregnancy
- C. E. ADAMS and P. ECKSTEIN. Effect of intra-uterine silk threads on location and survival of conceptuses in the rabbit
- M. J. K. HARPER. Failure of various antihistaminic drugs to prevent implantation in rats
- R. C. GOODLIN. Non-disjunction and maternal age in the mouse
- C. POLGE and P. DZIUK. Recovery of immature eggs penetrated by spermatozoa following induced ovulation in the pig

Editorial correspondence should be sent to the Executive Editor, Journal of Reproduction and Fertility, 8 Jesus Lane, Cambridge, England, and business correspondence to the publishers.

The subscription rate for 1965 is £6 per volume or £12 per year (two volumes). U.S.A. and Canada \$20.00 per volume or \$40.00 per year.
