JFM ARCHIVE

Journal of
Fluid Mechanics
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

Journal of Plasma Physics

Editors

Bill Dorland, University of Maryland Honors College, USA

Alex Schekochihin, University of Oxford, UK

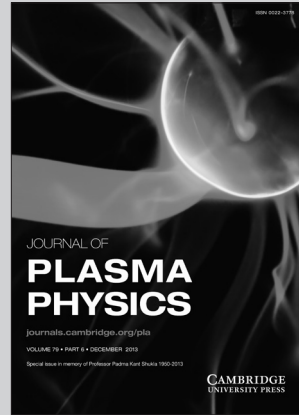

With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

The ANZIAM Journal

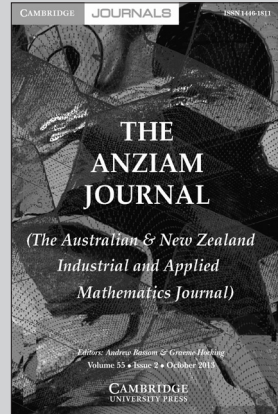

Published for the Australian Mathematical Society

Editors-in-Chief

A. Bassom, *The University of Western Australia, Australia*

G. C. Hocking, *Murdoch University, Australia*

The ANZIAM Journal considers papers in any field of applied mathematics and related mathematical sciences with the aim of rapid publication in print and electronic formats. Novel applications of mathematics in real situations are especially welcomed. All papers should include some indication of applicability, and an introduction that can be understood by non-specialist readers from the whole applied mathematical community.

CAMBRIDGE
UNIVERSITY PRESS

- S 523 Spatiotemporal measurement of surfactant distribution on gravity–capillary waves
S. L. Strickland, M. Shearer & K. E. Daniels
- 544 Solitary waves in forked channel regions
A. Nachbin & V. S. Simões
- 569 Effect of Prandtl’s ratio on balance in geophysical turbulence
D. G. Dritschel & W. J. McKiver
- 591 Scaling bounds on dissipation in turbulent flows
C. Seis
- 604 Can weakly nonlinear theory explain Faraday wave patterns near onset?
A. C. Skeldon & A. M. Rucklidge
- S 633 Mechanisms of flame stabilisation at low lifted height in a turbulent lifted slot-jet flame
S. Karami, E. R. Hawkes, M. Talei & J. H. Chen
- 690 High-speed X-ray imaging of a ball impacting on loose sand
T. Homan, R. Mudde, D. Lohse & D. van der Meer

JFM Rapids (online only)

- R1 Modulation of the velocity gradient tensor by concurrent large-scale velocity fluctuations in a turbulent mixing layer
O. R. H. Buxton
- R2 Faraday waves: their dispersion relation, nature of bifurcation and wavenumber selection revisited
J. Rajchenbach & D. Clamond
- S R3 Modelling water wave overwash of a thin floating plate
D. M. Skene, L. G. Bennetts, M. H. Meylan & A. Toffoli

S indicates supplementary data or movies available online.

- 1 Pearling, wrinkling, and buckling of vesicles in elongational flows
V. Narsimhan, A. P. Spann & E. S. G. Shaqfeh
- 27 Stability of a bi-layer free film: simultaneous or individual rupture events?
P. S. Stewart, J. Feng, L. S. Kimpton, I. M. Griffiths & H. A. Stone
- S 50 Microwave-heating laboratory experiments for planetary mantle convection
A. Limare, K. Vilella, E. Di Giuseppe, C. G. Farnetani, E. Kaminski, E. Surducun, V. Surducun, C. Neamtu, L. Fourel & C. Jaupart
- 68 Degeneration of internal Kelvin waves in a continuous two-layer stratification
H. N. Ulloa, K. B. Winters, A. de la Fuente & Y. Niño
- S 97 Fluid invasion of an unsaturated leaky porous layer
S. S. Pegler, E. L. Bain, H. E. Huppert & J. A. Neufeld
- 122 Experiments on standing waves in a rectangular tank with a corrugated bed
P. D. Weidman, A. Herczynski, J. Yu & L. N. Howard
- 151 Transport equation for the mean turbulent energy dissipation rate on the centreline of a fully developed channel flow
S. L. Tang, R. A. Antonia, L. Djenidi, H. Abe, T. Zhou, L. Danaila & Y. Zhou
- 178 Mixing-scale dependent dispersion for transport in heterogeneous flows
M. Dentz & F. P. J. de Barros
- 196 Early evolution of the compressible mixing layer issued from two turbulent streams
S. Pirozzoli, M. Bernardini, S. Marié & F. Grasso
- 219 Downstream decay of fully developed Dean flow
J. T. Ault, K. K. Chen & H. A. Stone
- 245 Growth and spectra of gravity–capillary waves in countercurrent air/water turbulent flow
F. Zonta, A. Soldati & M. Onorato
- 260 Wentzel–Kramers–Brillouin approximation for atmospheric waves
O. A. Godin
- 291 Unsteady flow structures around a high-drag Ahmed body
B. F. Zhang, Y. Zhou & S. To
- 327 The dynamics of spanwise vorticity perturbations in homogeneous viscoelastic shear flow
J. Page & T. A. Zaki
- 364 Performance considerations for expansion tube operation with a shock-heated secondary driver
D. E. Gildfind, C. M. James, P. Toniato & R. G. Morgan
- 408 Three-dimensional streaming flow in confined geometries
B. Rallabandi, A. Marin, M. Rossi, C. J. Kähler & S. Hilgenfeldt
- 430 Roughness receptivity and shielding in a flat plate boundary layer
M. S. Kuester & E. B. White
- 461 On the coupling between spin-up and aspect ratio of vortices in rotating stratified flows: a predictive model
M. Ungarish
- 482 Transport of a dilute active suspension in pressure-driven channel flow
B. Ezhilan & D. Saintillan
