JOURNALS

PNS

PROCEEDINGS OF THE NUTRITION SOCIETY

Editor-in-Chief

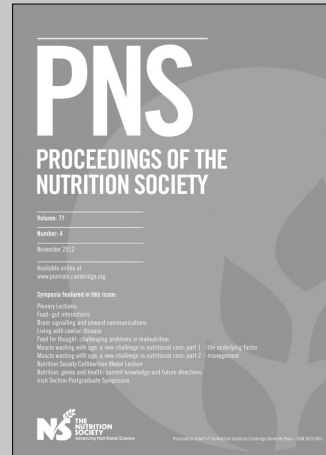

Maria O'Sullivan

Trinity College Medical Centre, Republic of Ireland

Proceedings of the Nutrition Society publishes papers and abstracts presented by members and invited speakers at the scientific meetings of The Nutrition Society. The journal provides an invaluable record of the scientific research currently being undertaken, contributing to 'the scientific study of nutrition and its application to the maintenance of human and animal health.'

Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 17, 2014 (12 issues):
Internet/print package: £1063/\$2040 Americas only/€1704 EU only
Internet only: £790/\$1497 Americas only/€1256 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

Notes for Authors are available from the publisher at the given address and can be found inside the back cover.

Offprints: The author (or main author) of an accepted paper will receive a free PDF of their paper. Additional offprints are available for a fee and must be ordered at proof stage. **No page charges are levied by this journal.**

Copyright: As of 1 January 2001 the copyright of all articles submitted to *Public Health Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Editorial Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London, W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Neither the Society, nor Cambridge University Press accepts responsibility for any trade advertisement included in this publication.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

- Profiling foods and diets
M Tseng and A Hodge 2625

HOT TOPIC – Profiling foods and diets

- The nutrient density approach to healthy eating: challenges and opportunities
TA Nicklas, A Drewnowski and CE O'Neil 2626

- When nutrient profiling can (and cannot) be useful
P Scarborough and M Rayner 2637

- Perceived and objective diet quality in US adults: a cross-sectional analysis of the National Health and Nutrition Examination Survey (NHANES)
TM Powell-Wiley, PE Miller, P Agyemang, T Agurs-Collins and J Reedy 2641

- Consumption of predefined 'Nordic' dietary items in ten European countries – an investigation in the European Prospective Investigation into Cancer and Nutrition (EPIC) cohort
N Roswall, A Olsen, K Boll, J Christensen, J Halkjær, TIA Sørensen, CC Dahm, K Overvad, F Clavel-Chapelon, MC Boutron-Ruault, V Cottet, B Teucher, R Kaaks, H Boeing, A von Ruesten, A Trichopoulos, E Oikonomou, E Vasilopoulou, V Pala, C Sacerdote, A Mattiello, G Masala, PHM Peeters, HB Bueno-de-Mesquita, D Engeset, G Skeie, LA Åsli, P Amiano, P Jakszyn, E Ardanaz, JM Huerta, JR Quirós, E Molina-Montes, LM Nilsson, I Johansson, E Wirfält, I Drake, AA Mulligan, KT Khaw, D Romaguera, A-C Vergnaud, T Key, E Riboli and A Tjønneland 2650

- Development of the Eating Choices Index (ECI): a four-item index to measure healthiness of diet
GK Pot, M Richards, CJ Prynne and AM Stephen 2660

- Determining minimum food intake amounts for diet diversity scores to maximize associations with nutrient adequacy: an analysis of schoolchildren's diets in rural Kenya
CA Gewa, SP Murphy, RE Weiss and CG Neumann 2667

- Capturing changes in dietary patterns among older adults: a latent class analysis of an ageing Irish cohort
JM Harrington, DL Dahly, AP Fitzgerald, MS Gilthorpe and IJ Perry 2674

Monitoring and surveillance

- Prevalence of overweight, obesity and underweight in Western Australian school-aged children; 2008 compared with 2003
K Martin, M Rosenberg, IS Pratt, M Miller, G McCormack, B Giles-Corti, A Magarey, F Bull and A Devine 2687

- Comparison of energy balance-related behaviours and measures of body composition between Turkish adolescents in Turkey and Turkish immigrant adolescents in the Netherlands
G Akbulut, M Yildirim, N Sanlier, MM van Stralen, N Acar-Tek, S Bilici, J Brug, JSB de Meij, M Gezmen-Karadag, E Koksas, A Oenema, AS Singh, SJ te Velde, H Yildiran and MJM Chinapaw 2692

Assessment and methodology

- Validation and reproducibility of dietary assessment methods in adolescents: a systematic literature review
G Tabacchi, E Amodio, MD Pasquale, A Bianco, M Jemni and C Mammìna 2700

- Dressed or undressed? How to measure children's body weight in overweight surveillance?
L Censi, A Spinelli, R Roccaldo, N Bevilacqua, A Lamberti, V Angelini, P Nardone and G Baglio 2715

Epidemiology

- Cross-sectional examination of physical and social contexts of episodes of eating and drinking in a national sample of US adults
A Oh, T Erinoshio, G Dunton, FM Perna and D Berrigan 2721

- Time for change? Food choices in the transition to cohabitation and parenthood
C Hartmann, S Dohle and M Siegrist 2730

- Independent associations of income and education with nutrient intakes in Brazilian adults: 2008–2009 National Dietary Survey
MC Araujo, EV Junior, WL Junger and R Sichieri 2740

- Socio-economic disparities in Australian adolescents' eating behaviours
P Niven, M Scully, B Morley, D Crawford, LA Baur and M Wakefield for the NaSSDA Study Team 2753

- A longitudinal analysis of maternal depressive symptoms and children's food consumption and weight outcomes
TW Morrissey and RK Dagher 2759

Nutrition and health

- Mediterranean diet and health status: an updated meta-analysis and a proposal for a literature-based adherence score
F Sofi, C Macchi, R Abbate, GF Gensini and A Casini 2769

- Investigating the historic long-term population health impact of the US National School Lunch Program
C Peterson 2783

- Dietary patterns and breakfast consumption in relation to insulin resistance in children. The Healthy Growth Study
K Karatzi, G Moschonis, A-A Barouti, C Lionis, GP Chrousos and Y Manios on behalf of the Healthy Growth Study Group 2790

- Liver intake in 24–59-month-old children from an impoverished South African community provides enough vitamin A to meet requirements
J Nel, ME van Stuijvenberg, SE Schoeman, MA Dhansay, CJ Lombard and LM du Plessis 2798

Interventions

- Adherence in a 1-year whole foods eating pattern intervention with healthy postmenopausal women
NC Peters, IR Contento, F Kronenberg and M Coleton 2806

- Successful implementation of a laboratory iodization quality assurance system in small-scale salt production facilities in India
K Yadav, R Kumar, CS Pandav and MG Karmakar 2816

Public policies

- Strategies to improve the dietary quality of Supplemental Nutrition Assistance Program (SNAP) beneficiaries: an assessment of stakeholder opinions
SJ Blumenthal, EE Hoffnagle, CW Leung, H Lofink, HH Jensen, SB Foerster, LWY Cheung, M Nestle and WC Willett 2824

Special groups

- Malnutrition in older adults on financial assistance in an urban Asian country: a mixed methods study
YX Koo, ML Kang, A Auyong, GZ Liau, J Hoe, M Long, A Koh, F Koh, R Liu and G Koh 2834

- Usual dietary fatty acid intakes and red-blood-cell membrane fatty acid composition in Inuit children attending child-care centres in Nunavik, northern Québec, Canada
R Blanchet, J Lauzière, D Gagné, C Vézina, P Aytte and HT O'Brien 2844

- Infant feeding patterns in families with a diabetes history – observations from The Environmental Determinants of Diabetes in the Young (TEDDY) birth cohort study
S Hummel, K Vehik, U Uusitalo, W McLeod, CA Aronsson, N Frank, P Gesualdo, J Yang, JM Norris, SM Virtanen and the TEDDY Study Group 2853
