	PAGE
Report of the Council: 1970-71 . . . . .	1015
Income and Expenditure Account and Balance Sheet . . . . .	1049
OBITUARY, PROFESSOR J. S. ALEXANDROWICZ . . . . .	1007
ANDERSON, A.	
Intertidal activity, breeding and the floating habit of <i>Hydrobia ulvae</i> in the Ythan Estuary . . . . .	423
ANDREWS, P. and WILLIAMS, P. J. LEB.	
Heterotrophic utilization of dissolved organic compounds in the sea. III. Measurement of the oxidation rates and concentrations of glucose and amino acids in sea water . . . . .	111
BAYNE, B., <i>see</i> WIDDOWS and BAYNE . . . . .	827
BLAXTER, J. H. S., WARDLE, C. S. and ROBERTS, B. L.	
Aspects of the circulatory physiology and muscle systems of deep sea fish . . . . .	991
BOALCH, G. T.	
The typification of the diatom species <i>Coscinodiscus concinnus</i> Wm. Smith and <i>Coscinodiscus granii</i> Gough . . . . .	685
BONE, QUENTIN	
On the Scabbard Fish <i>Aphanopus carbo</i> . . . . .	219
BOYDEN, C. R.	
A comparative study of the reproductive cycles of the cockles <i>Cerastoderma edule</i> and <i>C. glaucum</i> . . . . .	605
BRANDER, K. M., <i>see</i> WALLEY, WHITE and BRANDER . . . . .	489
BRYAN, G. W. and HUMMERSTONE, L. G.	
Adaptation of the polychaete <i>Nereis diversicolor</i> to estuarine sediments containing high concentrations of heavy metals . . . . .	845
BUCHANAN, J. B., <i>see</i> WARWICK and BUCHANAN . . . . .	355
BURTON, J. D. and MASSIE, K. S.	
The occurrence of tantalum in some marine organisms . . . . .	679
CLARE, J., JONES, D. and O'SULLIVAN, A. J.	
On the occurrence of detached spherical colonies of the hydroids <i>Sarsia tubulosa</i> and <i>Tubularia larynx</i> in Morecambe Bay . . . . .	495
COLLINS, J. D., <i>see</i> SEGAR, COLLINS and RILEY . . . . .	131
CRISP, MARY	
Structure and abundance of receptors of the unspecialized external epithelium of <i>Nassarius reticulatus</i> [Gastropoda, Prosobranchia] . . . . .	865
CROTHERS, J. H.	
Further observations on the occurrence of 'teeth' in the dog-whelk <i>Nucella lapillus</i> . . . . .	623
DEMIR, NECLÂ	
On the occurrence of grey mullet postlarvae off Plymouth . . . . .	235

	PAGE
DEMIR, NECLÂ and RUSSELL, F. S.	
On the postlarva of the goby <i>Lebetus</i> . . . . .	669
See also RUSSELL and DEMIR . . . . .	127
DENTON, E. J. and GILPIN-BROWN, J. B.	
Further observations on the buoyancy of <i>Spirula</i> . . . . .	363
DENTON, E. J., MUNTZ, W. R. A. and NORTHMORE, D. P. M.	
The distribution of visual pigment within the retina in two teleosts . . . . .	905
DROOP, M. R. and PENNOCK, J. F.	
Terpenoid quinones and steroids in the nutrition of <i>Oxyrrhis marina</i> . . . . .	455
EGGLESTON, D.	
Synchronization between moulting in <i>Calocaris macandreae</i> [Decapoda] and reproduction in its epibiont <i>Tricella koreni</i> [Polyzoa Ectoprocta] . . . . .	409
EVANS, P. D., RUSCOE, C. N. E. and TREHERNE, J. E.	
Observations on the biology and submergence behaviour of some littoral beetles . . . . .	375
FINCHAM, A. A.	
Ecology and population studies of some intertidal and sublittoral sand-dwelling amphipods . . . . .	471
FOGG, G. E., see SAMUEL, SHAH and FOGG . . . . .	793
FOLKARD, A. R., see JONES and FOLKARD . . . . .	159
FORSTER, G. R.	
Line-fishing on the continental slope. III. Mid-water fishing with vertical lines . . . . .	73
FORSTER, J. R. M. and GABBOTT, P. A.	
The assimilation of nutrients from compounded diets by the prawns <i>Palaemon serratus</i> and <i>Pandalus platyceros</i> . . . . .	943
FOXTON, P. A.	
A new species of the genus <i>Acanthephyra</i> [Crustacea: Natantia]: first discovered and described in MS notes by Dr Stanley W. Kemp . . . . .	33
FRETTER, VERA and PILKINGTON, MARGARET, C.	
The larval shell of some prosobranch gastropods . . . . .	49
GABBOTT, P. A.

# THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

## TERMS OF MEMBERSHIP

		£
Annual Members, receiving the Journal . . . . .	per annum	3.00
Annual Members, without the Journal . . . . .	per annum	1.05
Junior Members, receiving the Journal . . . . .	per annum	1.05
Life Members . . . . .	Composition fee	45.00
Founders . . . . .		100.00
Governors . . . . .		500.00

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a much reduced rate; they are admitted to view the laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.
