ENVIRONMENTAL CONSERVATION

advocates timely action for the protection and amelioration of the environment of Man and Nature throughout the world: Topics range from pertinent case-histories of the past and present to rational use of resources, foreseeing ecological consequences, enlightened environmental policy, anti-pollution measures, low-impact development, environmental education and law, and ecologically sound management of all land and fresh water, sea and air, for the lasting future of Earth's fragile biosphere.

The following are the main types of contributions which may be accepted for publication in this Journal:

- Survey articles on important aspects of its subject;
- Research papers whether basic or 'confirmatory';
- Case-history accounts of wide significance and interest;
- Short Communications*: reports, comments, news, notes;
- Ecosystems for Conservation*: examples from around the world;
- Conferences & Meetings*: summary reports; important prospects;
- Reviews & Notices*: of new books etc.
