

# THE VIRUS

*Life's Enemy*

By **KENNETH SMITH**

*20 Illustrations. 8s. 6d. net*

This, the third volume in The Cambridge Library of Modern Science, deals with a subject of which little was known or imagined until very recent times, but which may yet prove to be of paramount biological, economic, and philosophical importance. It has all the interest of stories of man's courageous and imaginative research, with the added importance that a proper understanding of virus diseases and viruses is essential for the future well-being of mankind.

THE FABRICIAN TYPES OF INSECTS IN  
THE HUNTERIAN COLLECTION, VOLUME II

## COLEOPTERA

By **ROBERT A. STAIG**

*31 plates in colour*

*27s. 6d. net*

(Glasgow University Publication)

This volume continues Dr Staig's systematic description and illustration of Hunter's collection of insects, made about 160 years ago and then classified by Fabricius, which was part of Hunter's bequest to Glasgow. The first volume was published in 1931 and began the description of Coleoptera, which this volume continues.

	PAGE
THORPE, W. H. A description of six new species of the genus <i>Cryptochaetum</i> (Diptera-Agromyzidae) from East Africa and East Indies; together with a key to the adults and larvae of all known species. (With 30 Figures in the Text) . . . . .	131
THORPE, W. H. The biology of <i>Cryptochaetum</i> (Diptera) and <i>Eupelmus</i> (Hymenoptera) parasites of <i>Aspidoproctus</i> (Coccidae) in East Africa. (With 26 Figures in the Text) . . . . .	149
FERRIÈRE, CH. A new coccid-parasite of the family Eupelmidae (Hym. Chalc.) . . . . .	169
DEORAS, P. J. Structure of <i>Hemimerus deceptus</i> Rehn. var. <i>ovatus</i> ; an external parasite of <i>Cricetomys gambiense</i> . (With 29 Figures in the Text) . . . . .	172
FANTHAM, H. B., PORTER, ANNIE and RICHARDSON, L. R. Some microsporidia found in certain fishes and insects in eastern Canada. (With Plate V, containing Figs. 1-74, and 1 Figure in the Text) . . . . .	186
CROFTON, H. DRAPER. A record of trematode parasites from <i>Mola mola</i> and <i>Raniceps raninus</i> (Linn.) . . . . .	209
MACLEOD, J. and CRAUFURD-BENSON, H. J. Casual beds as a source of louse infestation . . . . .	211
PANIKKAR, N. KESAVA and SPROSTON, NOBA G. Osmotic relations of some metazoan parasites . . . . .	214
BUXTON, P. A. Studies on populations of head-lice ( <i>Pediculus humanus capitis</i> : Anoplura). IV. The compositions of populations. (With 4 Figures in the Text) . . . . .	224
LEESON, H. S. The effect of temperature upon the hatching of the eggs of <i>Pediculus humanus corporis</i> de Geer (Anoplura). (With 1 Figure in the Text) . . . . .	243

---

*PARASITOLOGY* is published about four times a year. The numbers afterwards are issued in volumes each containing four numbers.

Papers for publication should be sent to Professor D. KEILIN, Sc.D., F.R.S., Molteno Institute, Downing Street, Cambridge. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editors for publication are understood to be offered to *PARASITOLOGY* alone, unless the contrary is stated.

Contributors receive twenty-five copies of their papers free. Additional copies, not exceeding one hundred (except in special cases), may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £2. 15s. per volume (post-free), payable in advance; single numbers 18s. 6d. net (double number 37s. net). Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, N.W. 1.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of *Parasitology* in the United States of America.
