

INDEX OF SUBJECTS

	PAGE
Air, <i>see</i> Ventilation.	
Alexin, filterability of its components	522
Antibody, <i>see</i> Precipitation reaction.	
Apparatus, <i>see</i> Globe thermometer, Temperature.	
Avitaminosis, its influence on trypanosome infection	154
Bacteria:	
Bacteria, minimum temperature of growth of some	277
spoilng lean meat in cold storage	277
virulent haemophilic, in upper respiratory infections	195
Bacterial toxins, influence of oil and fat emulsions on lethal effects of	250
<i>Bacillus</i> (<i>see also</i> under <i>Salmonella</i>).	
<i>alkalescens</i> Andrewes, characters	70 <i>et seq.</i>
<i>coli</i>	38
in mussels, identification of	172
<i>see</i> Coliform.	
<i>coli anaerogenes</i> group	69
<i>coli communis</i> , anaerobic variants of	213
coliform bacilli in mussels	194
in water, soil, faeces, ice-cream	38
<i>diphtheriae</i> , <i>see</i> Bacterial toxins.	
<i>dispar</i> Andrewes, characters	70 <i>et seq.</i>
<i>dysenteriae</i> Sonne, characters	69 <i>et seq.</i>
<i>influenzae</i> , typical and atypical	196
<i>lactis aerogenes</i>	38
<i>see</i> Coliform.	
<i>paratyphosus B.</i> , some fermentative varieties of	203
anaerobic fermentation with	213
<i>tetani</i> , <i>see</i> Bacterial toxins.	
<i>tuberculosis</i> (bovine) survival in soil, dung, grass	372
<i>tuberculosis</i> , longevity in frozen milk	141
<i>typhosus</i> , <i>see</i> Disinfectants, Typhoid.	
<i>welchii</i> , <i>see</i> Bacterial toxins.	
Brucella spp., etc.:	
Reputed antigenic relationship between organisms (a) <i>Brucella</i> group and (b) <i>Pasteurella</i> , <i>Pfeifferella</i> and <i>Proteus</i> groups	361
<i>Brucella abortus</i> and <i>Br. melitensis</i>	242
<i>Clostridium oedematis maligni</i> , <i>see</i> Bacterial toxins.	
<i>Meningococcus</i> , <i>see</i> Carrier rates.	
<i>Neisseria meningitidis</i> , <i>see</i> Carrier rates.	
<i>Pasteurella</i> spp., <i>see</i> <i>Brucella</i> , etc.	
<i>Pfeifferella</i> spp., <i>see</i> <i>Brucella</i> , etc.	
<i>Proteus</i> spp., <i>see</i> <i>Brucella</i> , etc.	
Salmonella , <i>see also</i> under <i>Bacillus</i> (old nomenclature).	

Bacteria (continued):

	PAGE
Genus <i>Salmonella</i> Lignières, 1900. Subcommittee on its nomenclature	333 <i>et seq.</i>
(List of 44 species and varieties recognised by the Subcommittee)	
<i>abortus-equi</i>	340
<i>abortus-ovis</i>	340
<i>anatum</i>	347
<i>anatum</i> var. <i>muenster</i>	347
<i>bareilly</i>	343
<i>bovis-morbificans</i>	344
<i>brandenburg</i>	340
<i>cholerae-suis</i>	341
<i>cholerae-suis</i> var. <i>kunzensdorf</i>	341
<i>dar-es-salaam</i>	346
<i>derby</i>	340
<i>eastbourne</i>	346
<i>enteritidis</i>	344
<i>enteritidis</i> var. <i>danzysz</i>	345
<i>enteritidis</i> var. <i>dublin</i>	345
<i>enteritidis</i> var. <i>moscow</i>	345
<i>enteritidis</i> var. <i>rostock</i>	345
<i>gallinarum</i>	346
<i>heidelberg</i>	340
<i>london</i>	346
<i>muenchen</i>	344
<i>newport</i>	343
<i>newport</i> var. <i>kottbus</i>	344
<i>newport</i> var. <i>puerto-rico</i>	344
<i>oranienburg</i>	343
<i>panama</i>	346
<i>paratyphi-A</i>	338
<i>paratyphi-B</i>	339
<i>paratyphi-C</i>	341
<i>potsdam</i>	343
<i>pullorum</i>	346
<i>reading</i>	340
<i>sendai</i>	345
<i>senftenberg</i>	339
<i>senftenberg</i> var. <i>newcastle</i>	339
<i>stanley</i>	340
<i>thompson</i>	343
<i>thompson</i> var. <i>berlin</i>	343
<i>typhi</i>	344
<i>typhi-murium</i>	339
<i>typhi-murium</i> var. <i>binus</i>	339
<i>typhi-suis</i>	342
<i>typhi-suis</i> var. <i>voldagsen</i>	342
<i>virchow</i>	343
<i>Salmonella</i> spp. dealt with by J. Smith under Sporadic <i>Salmonella</i> infections	351
<i>Salmonella</i> , incidence of various types	353
<i>aberdeen</i> J. Smith, 1934, new type	357

	PAGE
Bacteria (<i>continued</i>):	
<i>Salmonella</i> (<i>continued</i>):	
<i>aertrycke</i>	354
<i>dublin</i>	355
<i>european suipestifer</i>	358
<i>gaertner</i>	358
<i>potsdam</i>	354
<i>thompson</i>	358
<i>Streptococcus haemolyticus</i> , <i>see</i> Dick reaction.	
<i>pyogenes</i> , serological classification of	542
Birth control, <i>see</i> Population, Contraceptives.	
Blood examinations against plumbism	295
Body exudates, <i>see</i> Digestive action of.	
Cancer, intrathoracic, incidence in Leeds and other towns	218, 223 <i>et seq.</i>
in various sites, incidence in Leeds	221
Carrier rates of <i>Meningococcus</i> in absence of meningitis cases	525
Carriers and droplet infection	1 <i>et seq.</i>
<i>Claviceps purpurea</i> and ergotism	235
Contraceptives, chemical, spermicidal powers of	474
Cork City, <i>see</i> Typhoid epidemic in.	
Cotton dust, <i>see</i> Histamine.	
Cotton operatives, <i>see</i> Dust, Histamine.	
Death-rates in Great Britain and Sweden, etc.	433
Dick reaction, anomalous features of	30
Digestive action of leucocytes, pus and body exudates	99
Dioxan (1 : 4), toxicity to animals	486
Diphtheria	6
Disinfectants, Chick-Martin test for	322
Droplet infection, theoretical considerations	1
Dust in carding-rooms of cotton mills found to contain histamine	317
Dysentery, <i>see</i> <i>Bacillus dysenteriae</i> Sonne.	
Enteric fever epidemic in Cork City, 1920	265
Epidemic curve of smallpox	10
Epidemic of typhoid, <i>see</i> Enteric.	
Epidemiology of influenza, outbreak in Leeds	407
Ergotism, convulsive, cause of	235
Faeces, coliform bacilli in	61, 69
Globe thermometer in study of heating and ventilation	458
Great Britain, <i>see</i> Death-rates.	
Haemophilic bacteria in respiratory infections	195
Heating and ventilation studies, use of globe thermometer	458
Histamine, examination of cotton, coir and esparto-grass dust for	317
in cotton dust, possibly important factor in causing respiratory trouble in operatives	317
Hydrocyanic acid vapour, absorption through skin	283

Index of Subjects

591

	PAGE
Ice-cream, coliform bacilli in	64, 69
Immunity, <i>see</i> Alexin, Precipitation reaction, Serological, etc.	
Infection, <i>see</i> Droplet.	
Influenza, epidemiology of outbreak in Leeds	407
Lathyrism in man	145
<i>Lathyrus</i> peas, chemistry and pharmacology of	145
poisoning in animals	145, 238
Leeds, <i>see</i> Cancer, Influenza.	
Leucocytes, <i>see</i> Digestive action of.	
Meat, cold stored, bacterial and yeast growth in	277
Methods, <i>see</i> Temperature measurement of skin	81
Milk, <i>see</i> Tuberculosis.	
Molluscs, edible, <i>see</i> Mussels.	
Mussels, bacteriological examination of	172
Plumbism, blood film examinations among shipbreakers in relation to prevention of	295
Poisoning, <i>see</i> Hydrocyanic acid, Lathyrism, <i>Lathyrus</i> , Plumbism.	
Poliomyelitis	1 <i>et seq.</i>
Population growth and birth control	502
Porcelain workers, silicosis in	166
Precipitation reaction, neutrality and maximal precipitation of mixtures of albumin and antiserum	118
Pus, <i>see</i> Digestive action of.	
<i>Salmonella</i> , <i>see</i> Bacteria.	
School children, weight, height and nutrition of	131
Serological classification of <i>Str. pyogenes</i>	542
Shellfish, <i>see</i> Molluscs.	
Shipbreakers, <i>see</i> Plumbism.	
Silicosis, a fatal case in a porcelain worker	166
Skin, hydrocyanic acid vapour, absorption through	283
Skin temperature, methods of measuring	81
Smallpox, epidemic curve of	10
in India	23
in London	13
variation in type	11
Soil, coliform bacilli in	55, 69
Spermicidal powers of chemical contraceptives	474
<i>Spirochaeta schaudinnii</i> , filtration experiments with	429
Streptococci, <i>see</i> Bacteria.	
Sweden, <i>see</i> Death-rates.	
Temperature minima and maxima for growth of bacteria and yeast spp.	279
of skin, methods of measuring	81
<i>see</i> Globe thermometer.	
Toxicity to animals of 1 : 4 dioxan	486

	PAGE
Toxins, bacterial, influence of oil and fat emulsions on lethal effects of	250
Trypanosomiasis, influence of avitaminosis on	154
Tuberculosis in dairy cattle, Vernes test for diagnosis	157
in the Hebrides, prevalence in man	141
absence in bovines	142
pulmonary, in Wales 1911-1931	380
Typhoid epidemic in Cork City, 1920	265
Undulant fever, sources of infection in	242
Ventilation, <i>see</i> Heating and.	
Vernes test for diagnosis of tuberculosis in dairy cattle	157
Vitamin A, influence on protozoal and bacterial infections	154
Wales, <i>see</i> Tuberculosis.	
Water, coliform bacilli in	41, 69
Weight, height and nutrition of school children	131
