

## INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. The Editors receive more than three times as much material as can be published in the BULLETIN; many meritorious papers can, therefore, not be accepted. Authors are asked to avoid, as far as possible the use of mathematical symbols in the title. Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive;
- (ii) the manuscript should be in publishable form, without revision.

Authors should submit three clean, high quality copies to

The Editorial Office, Bulletin of the Australian Mathematical Society,  
Department of Mathematics, The University of Queensland,  
Queensland 4072, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned.

### EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited is not readily accessible (for example, a preprint) a photocopy of the title page and relevant sections of the copy that you have used should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 200 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification.** Authors should include in their papers one or more classification numbers, following the 2000 Mathematics Subject Classification. Details of this scheme can be found in each Annual Index of Mathematical Reviews or on the web at <http://www.ams.org/msc>.

**4. Abstracts of Ph.D. Theses.** The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

**5. Electronic Manuscripts.** The Bulletin is produced using  $\text{AMS-TEX}$ . Authors who are able to do so are invited to prepare their manuscripts using  $\text{TEX}$ . (We accept Plain  $\text{TEX}$ ,  $\text{AMS-TEX}$  or  $\text{LATEX}$ .) Hard copy only should be submitted for assessment, but if the paper is accepted the author will be asked to send the text on an IBM PC compatible diskette or via e-mail to [ams@maths.uq.edu.au](mailto:ams@maths.uq.edu.au). [Typed manuscripts are, of course, still acceptable.]

# Bulletin of the Australian Mathematical Society

<b>On finite <math>G</math>-locally primitive graphs and the Weiss conjecture</b>	
Mohammad A. Iranmanesh	353
<b>Maximal averages along curves over the <math>p</math>-adic numbers</b>	
Keith M. Rogers	357
<b>Pointed Blaschke manifolds and geodesic normal sections</b>	
Dong-Soo Kim, Young Ho Kim and Eun Kyoung Lee	377
<b>The similarity problem for tensor products of certain <math>C^*</math>-algebras</b>	
Florin Pop	385
<b>On the orders of generators of capable <math>p</math>-groups</b>	
Arturo Magidin	391
<b>A remark on preinvex functions</b>	
Jianwen Peng and Xianjun Long	397
<b>On the injectivity of the Vassiliev homomorphism of singular Artin monoids</b>	
Noelle Antony	401
<b>Two necessary and sufficient conditions for Möbius subgroups to be <math>g</math>-discontinuous</b>	
Zheng-Wu Long and Xian-Tao Wang	423
<b>Existence and <math>L_\infty</math> estimates for a class of singular ordinary differential equations</b>	
J.M. Gomes	429
<b>Polynomial near-rings in <math>k</math> indeterminates</b>	
Enoch K.S. Lee and Nico J. Groenewald	441
<b>Quadratic reverses of the triangle inequality for Bochner integral in Hilbert spaces</b>	
Sever S. Dragomir	451
<b>Diametrically contractive mappings</b>	
Hong-Kun Xu	463
<b>A counterexample using 4-linear forms</b>	
David Pérez-García	469
<b>A note on Lagrange interpolation for <math> x ^\lambda</math> at equidistant nodes</b>	
Michael I. Ganzburg and Michael Revers	475
<b>Abelian groups as inner mapping groups of loops</b>	
Asif Ali and John Cossey	481
<b>A note on a continued fraction of Ramanujan</b>	
C. Adiga and N. Anitha	489
<b>Stability of Dhombres' equation</b>	
Bogdan Batko	499
<b>Properly embedded and immersed minimal surfaces in the Heisenberg group</b>	
Jih-Hsin Cheng and Jenn-Fang Hwang	507
<b>Hardy-type inequalities for means</b>	
Zsolt Páles and Lars-Erik Persson	521
<b>Author Index Volume 61 (2000) to Volume 70 (2004)</b>	529
