BBL® Crystal™ MRSA ID.

In 4 Hours, A New Age Dawns.

It's a significant development for your laboratory and your hospital. **BBL® Crystal™ MRSA ID.** The first 4-hour test that accurately identifies methicillin-resistant *Staphylococcus aureus* strains (MRSAs). So your lab can rapidly identify nosocomial infections. Your physicians can start effective patient therapy sooner. And your hospital can deliver better patient care.

With **BBL® Crystal™**, all you do is prepare the

broth, inoculate the wells, snap on the lid and incubate 4 hours. Under a UV light source, MRSAs visibly fluoresce bright orange. That's all there is to it!

Join the new age. For tremendous ease of use, speed, and time and money savings in fighting infection, use **BBL® Crystal™ MRSA ID.**

Available now from your Becton Dickinson Microbiology Systems distributor.

Put a uvex better breathing™ HEPA-Tech™ respirator between you and TB.

Please read all warnings on literature and packaging materials. Not for use against any other airborne or bloodborne pathogens.

With tuberculosis on the rise you're at significant risk of being exposed if you're in contact with patients in an enclosed location. The **uvex better breathing HEPA-Tech 3010** disposable respirator fully meets the CDC and OSHA guidelines for preventing the transmission of TB in healthcare environments. The HEPA-Tech is not only effective, it's comfortable. Choose from **three sizes** (small, medium, and large) with soft, formed-foam sealing

surfaces and adjustable headbands. The unique **"fit-check cup"** assures a reliable fit every time. And with HEPA-Tech, breathing resistance is so low there's **no need for an exhalation valve**, making it more attractive and less threatening. HEPA-Tech is NIOSH certified (No. TC-21C-604). For more information and a free sample, mail or fax the coupon along with your business card. And start breathing easier about TB exposure.

Please include your business card. Mail or fax to uvex at 800-232-9674. Access Code 4293808##. D

Send me more information and a free sample of the uvex better breathing™ HEPA-Tech™ respirator (Offer expires 7/31/94)

TUBEX® BLUNT POINTE™ STERILE CARTRIDGE UNIT: ONE-PIECE SIMPLICITY MAKES IV SAFETY EASY.

A simple approach to IV safety—the TUBEX® Blunt Pointe™ sterile cartridge unit.

A prefilled cartridge unit with no assembly. Simple insertion into a “needle-less” IV set.* And needlestick accidents can be eliminated because the point is not sharp.

TUBEX® Blunt Pointe™ prefilled cartridge unit was designed to meet OSHA's engineering and work practice controls and FDA's recommendations for IV administration sets.^{1 2}

For IV safety, simplicity, and convenience, choose TUBEX® Blunt Pointe™—the only “needle-less” sterile cartridge unit that's compatible with all these IV sets.
