

Index of Subjects

- Abattoirs in Greece, *Salmonella* isolations in, 601
- Adhesive surface sampling technique for airborne viruses, 273
- Aerosols of rabbit pox of natural origin; method of sampling, 511
- African swine fever virus, excretion of by domestic pigs, 673
- Airborne viruses; an adhesive surface sampling technique for, 273
- Airborne excretion of foot-and-mouth disease virus, 557
- Antarctica, staphylococcal epidemiology in, 43
- Antibody status of a population following epidemic infection by influenza virus A2/Hong Kong/1/68, 497
- Antibody titres and carrier state during an outbreak of foot-and-mouth disease, 53
- Antibody, complement-fixing, to varicella-zoster virus in hospital patients and blood donors, 411
- Antibodies to rubella, postnatal decline of, 461
- Antigenic differences within the species *Mycoplasma hominis*, 469
- Anti-human globulin (Coombs) test and the complement fixation test in the diagnosis of brucellosis, 173
- Antistreptolysin O titres amongst children in a rural area of Ceylon, 13
- Arbovirus group B infections and the platelet aggregation test, 71
- Arboviruses in Egypt. Their contribution to the aetiology of undiagnosed fever among children, 491
- Avian infections bronchitis in chickens; the direct complement fixation test for, 211
- Bacterial colonization rates in an established burns centre, the effect of a changed environment on, 633
- Bactericidal properties of Tego 103S and Tego 103G, 343
- Bacteriophages, temperate, of *Escherichia coli* O 119: B 14, 447
- BCG immunization of Swiss albino mice; effect on tuberculous morbidity, 589
- Brucella abortus* and *Yersinia enterocolitica* in cattle; differentiation of the serological response to, 519
- Brucellosis; the anti-human globulin (Coombs) test and the complement fixation test in the diagnosis of, 173
- Burns centre; the effect of a changed environment on bacterial colonization rates in, 633
- Carrier state and related antibody titres during an outbreak of foot-and-mouth disease, 53
- Cleaning equipment in retail food premises; comparison of materials used for, 221
- Clostridial spores; the inhibitory properties of sodium thioglycollate in media for the recovery of, 131
- Complement fixation test, direct, with avian infectious bronchitis virus in chickens, 211
- Complement-fixing antibody to varicella-zoster virus in hospital patients and blood donors, 411
- Coombs test and the complement fixation test in the diagnosis of brucellosis, 173
- Cough/nasal swabs in the rapid diagnosis of respiratory syncytial virus infection by the fluorescent antibody technique, 283
- Coxsackie A6 virus; the laboratory transmission of by mosquitoes, 625
- Cross-infection control and isolation nursing; the irreducible minimum, 379
- Detergent treatment of influenza virus to obtain soluble antigens, 81
- Detergent, non-ionic, producing degradation of influenza virus, 77
- Differentiation of serological response to *Yersinia enterocolitica* and *Brucella abortus* in cattle, 519
- Drying and heating bacteria in glutamate foams, 457
- Effect of a changed environment on bacterial colonization rates in an established burns centre, 633

- Encephalitis following peripheral inoculation of West Nile virus in mice of different ages, 435
- Enumeration of bacteria on cleaned equipment and work surfaces in retail food premises, 221
- Enzootic pneumonia of pigs; the problem of isolating *Mycoplasma suis* pneumoniae from field cases, 313; the passive haemagglutination test and the possible diagnosis of, 327
- Extracellular antigens of *Micropolyspora faeni*: their significance in farmer's lung disease, 401
- Farmer's lung disease; the significance of the extracellular antigens of *Micropolyspora faeni*, 401
- Feline infectious enteritis (panleucopaenia) virus: determination of an optimal dilution for challenge purposes, 549
- Fish and shellfish marketed in The Netherlands; the occurrence of *Vibrio parahaemolyticus* on, 189
- Fluorescent antibody technique for the rapid diagnosis of respiratory syncytial virus infection from cough/nasal swabs, 283
- Food premises; comparison of materials used for cleaning equipment in, and of two methods for enumeration of bacteria on cleaned equipment and work surfaces, 221
- Foot-and-mouth disease epidemic of 1967-8; the relation of weather to spread of disease, 253
- Foot-and-mouth disease outbreaks; observations on the carrier state and related antibody titres, 53
- Foot-and-mouth disease vaccines; an *in vitro* method for safety testing, 159
- Foot-and-mouth disease virus; investigations on the airborne excretion of, 557
- Foot-and-mouth disease virus; its inhalation, persistence and dispersal by man, 565
- Freeze-drying and preservation of vaccinia virus; the effect of the suspending media, 29
- Frozen meat; the use of gamma radiation for the elimination of *Salmonella* from, 293
- Gamma radiation for the elimination of *Salmonella* from frozen meat, 293
- Glutamate foams; recoveries of bacteria after drying and heating in, 457
- Growth in chick chorioallantoic membranes of strains of Newcastle disease virus of differing virulence, 61
- Haemophilus influenzae* type b; nasopharyngeal carriage by children in Kampala, 337
- Immunofluorescence for the late detection of respiratory syncytial virus in cells of the respiratory tract, 575
- Inactivation methods for smallpox vaccine, 197
- Infectious mononucleosis in the North-East Regional Board area of Scotland, 393
- Influenza vaccination in Britain, 1968-9, 359
- Influenza B virus; immunization with, producing neutralizing activity in serum and nasal secretion, 233
- Influenza viruses, the effects of UK 2054 on their multiplication, 151
- Influenza virus vaccine; a comparison of the monovalent Hong Kong vaccine with those containing only pre-1968 Asian strains, 369
- Influenza virus A2/Hong Kong/1/68; changes in the antibody status of a population following epidemic infection, 497
- Influenza virus; degradation of by non-ionic detergent, 77
- Influenza virus, soluble antigens obtained by treatment with non-ionic detergent, 81
- Inhalation, persistence and dispersal of foot-and-mouth disease virus by man, 565
- Inhibitory properties of sodium thioglycollate in media for the recovery of clostridial spores, 131
- Measles vaccine, live, in Iran, 101
- Mercury resistance of *Staphylococcus aureus*, 121: its distribution among strains isolated from a hospital community, 111
- Micropolyspora faeni*; the extracellular antigens and their significance in farmer's lung disease, 401
- Molluscum contagiosum in Fijian children, 631
- Mosquitoes and the laboratory transmission of Coxsackie A6 virus, 625
- Mycobacterium xenopei* from water taps, 97

- Mycoplasma hominis*; antigenic differences within the species, 469
- Mycoplasma suis*pneumoniae from field cases of enzootic pneumonia in pigs, 313
- Mycoplasma suis*pneumoniae; the passive haemagglutination test for the detection of, 327
- Myxomatosis. The effect of age upon survival of rabbits of differing resistance infected with myxoma virus, 137
- Nasal acquisition of *Staphylococcus aureus* in a subdivided and mechanically ventilated ward, 417
- Nasal secretion and serum; the production of neutralizing activity in, following immunization with influenza B virus, 233
- Nasopharyngeal carriage of *Haemophilus influenzae* type b in children in Kampala, 337
- Nasopharyngeal secretions; respiratory syncytial virus neutralizing activity in, 581
- Neutralizing activity in serum and nasal secretion following immunization with influenza B virus, 233
- Newcastle disease virus; growth in chick chorioallantoic membranes of strains of differing virulence 61
- Ozonized olefins; comparative toxicity of, to bacteria suspended in air, 245
- Panleucopaemia virus; determination of an optimal dilution of, for challenge purposes, 549
- Papova (wart) virus; serological studies with, 479
- Passive haemagglutination test for the detection of *Mycoplasma suis*pneumoniae, and the possible diagnosis of enzootic pneumonia of pigs, 327
- Platelet aggregation test in group B arbovirus infections, 71
- Postnatal decline of maternally acquired rubella antibodies, 461
- Pox viruses; studies on the serological relationships between avian, sheep, goat and vaccinia, 349
- Pyoderma, streptococcal, spread by normal skin, 19
- Rabbit pox aerosols of natural origin, sampling method, 511
- Rabbits infected with myxoma virus; the effect of age upon survival, 137
- Recoveries of bacteria after drying and heating in glutamate foams, 457
- Respiratory disease in a colony of rats, 655
- Respiratory infections in R.A.F. personnel; viruses associated with, 647
- Respiratory syncytial virus; late detection of in cells of the respiratory tract by immunofluorescence, 575
- Respiratory syncytial virus infection; use of cough/nasal swabs in the rapid diagnosis by the fluorescent antibody technique, 283
- Respiratory syncytial virus neutralizing activity in nasopharyngeal secretions, 581
- Role of normal skin in the spread of streptococcal pyoderma, 19
- Rubella antibodies, postnatal decline of, 461
- Rubella virus vaccine; trials with the live attenuated Cendehill strain, 505
- Salmonella*, elimination of from frozen meat by gamma radiation, 293
- Salmonella* isolations in abattoirs in Greece, 601
- Salmonellosis investigated by sewer and drain swabbing, 611
- Salmonellosis in general practice. Observations of cases and their households in Enfield, 663
- Scotland, a survey of infectious mononucleosis in, 393
- Serological relationships between avian pox, sheep pox, goat pox and vaccinia viruses, 349
- Serological studies with human papova (wart) virus, 479
- Serotypes of sex pili, 683
- Sewer and drain swabbing as a means of investigating salmonellosis, 611
- Sex pili, serotypes of, 683
- Smallpox vaccine. A comparison of inactivation methods, 197
- Sodium thioglycollate in media for the recovery of clostridial spores, 131
- Staphylococcal epidemiology in Antarctica, 43
- Staphylococcal infection in subdivided general surgical wards, 531
- Staphylococcus aureus*, mercury resistance of, 111; 121

- Staphylococcus aureus*; nasal acquisition of in a subdivided and mechanically ventilated ward, 417
- Streptococcal pyoderma, the role of normal skin in the spread of, 19
- Subdivided general surgical wards, staphylococcal infection in, 531
- Suspending media, effect of on freeze-drying and preservation of vaccinia virus, 29
- Tego 103S and Tego 103G, bactericidal properties of, 343
- Temperate bacteriophages of *Escherichia coli* O119: B14, 447
- Testing foot-and-mouth disease vaccines for safety by *in vitro* method, 159
- Toxicity of various ozonized olefins to bacteria suspended in air, 245
- Tuberculous morbidity in Swiss albino mice immunized with BCG, 589
- UK 2054, effects of on the multiplication of influenza viruses, 151
- Vaccines: foot-and-mouth disease, 159; influenza, 359, 369; measles, 101; smallpox, 197; rubella, 505
- Vibrio parahaemolyticus* on fish and shellfish marketed in The Netherlands, 189
- Viruses associated with acute respiratory infections in Royal Air Force personnel, 647
- Viruses: African swine fever, 673; arbo, 71, 491; avian infectious bronchitis, 211; avian pox, 349; Coxsackie, 625; feline infectious enteritis, 549; foot-and-mouth, 557, 565; goat pox, 349; influenza, 77, 81, 151, 497; influenza B, 233; myxoma, 137; Newcastle disease, 61; panleucopaemia, 549; papova, 479; respiratory syncytial, 283, 575, 581; rubella, 505; sheep pox, 349; vaccinia, 29, 349; varicella-zoster, 411; West Nile, 435; wart, 479
- Water taps; isolation of *Mycobacterium xenopei* from, 97
- Weather in relation to spread of foot-and-mouth disease, 1967–8, 253
- Winter vomiting disease in Florida students, 1
- Yersinia enterocolitica* and *Brucella abortus*; differentiation of the serological response to in cattle, 519
