
INSTRUCTIONS TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance, but only in exceptional circumstances will systematic or taxonomic studies be acceptable.

Manuscripts, which must be in English or French (with an English summary) should be accompanied by a letter signed by *all* the authors and should be addressed to:

The Editor, Journal of Helminthology,
CAB International Institute of Parasitology,
395A Hatfield Road,
St Albans, Herts AL4 0XQ.
England.

Three copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief Introduction; Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Research Notes should also be preceded by a brief abstract. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the Journal. The maximum size an illustration will be printed is 12.0×20.0 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale (preferably a scale bar) should normally be given on the figure. Photocopies of illustrations should be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the Journal (maximum size 12.0×20.0 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

DUKE, B. O. L. (1971) The ecology of onchocerciasis in man and animals. In: *Ecology and Physiology of Parasites* (editor, A. M. Fallis) pp. 213–222. Adam Hilger Ltd.: London.

JAMES, C. & WEBBE, G. (1973) A comparison of Egyptian and East African strains of *Schistosoma haematobium*. *Journal of Helminthology*, **47**, 49–59.

25 offprints are provided free of charge; additional copies may be ordered at the proof stage.

Contents

	Pages
Abnormal patterns of embryogenesis in <i>Dirofilaria immitis</i> treated with ivermectin. J. B. LOK, T. HARPAZ and D. H. KNIGHT	175-180
Chemotherapy of <i>Onchocerca lienalis</i> microfilariae in mice: a model for the evaluation of novel compounds for the treatment of onchocerciasis. S. TOWNSON, A. DOBINSON, C. CONNELLY and R. MULLER	181-194
Surface carbohydrate changes in <i>Onchocerca lienalis</i> larvae as they develop from microfilariae to the infective third-stage in <i>Simulium ornatum</i> . P. J. HAM, A. J. SMAIL and B. K. GROEGER	195-205
Immunization of chicks at various ages with irradiated infective eggs of <i>Ascaridia galli</i> . H. C. MALVIYA, T. K. VARMA and P. DWIVEDI	207-212
Transmission of urinary schistosomiasis in Sukumaland, Tanzania. 1. Snail infection rates and incidence of infection in school children. N. J. S. LWAMBO	213-217
The occurrence of <i>Rhabditis (Rhabditella) axei</i> in the faeces of a chicken in Egypt. (Research Note) O. M. E. EL-AZAZY, H. M. EL-GAWADY and M. S. NADA	219-220
Immunity to adult <i>Heligmosomoides polygyrus (Nematospiroides dubius)</i> : survival or rejection of adult worms following transplantation to mice refractory to larval challenge. M. ROBINSON, J. M. BEHNKE and D. J. L. WILLIAMS	221-231
First report of <i>Galactosomum ussuriense</i> Oshmarin, 1963 (Trematoda: Heterophyidae) from the shore birds of Visakhapatnam, India. (Research Note) G. G. MANI and R. MADHAVI	233-234
Experimental infection in a human subject by a possibly undescribed species of <i>Taenia</i> in Taiwan. D. CHAO, M. M. WONG and PING-CHIN FAN	235-242
Haemonchosis in sheep and goats in Sierra Leone. M. F. ASANJI	243-249
The effect of cyclosporin A on the course of <i>Paragonimus miyazakii</i> infection in rats. Y. HASHIGUCHI and Y. OKAMURA	251-256
Antigenicity of a proteolytic enzyme of <i>Fasciola hepatica</i> . G. C. COLES and D. RUBANO	257-260
Up to what point are cercariogenesis and sporocystogenesis reversible in schistosomes? N. KECHEMIR and C. COMBES	261-264
<i>Dracunculus insignis</i> : experimental infection in the ferret, <i>Mustela putorius furo</i> . M. L. EBERHARD, E. RUIZ-TIBEN and S. V. WALLACE	265-270
Book review	250
Announcements	206, 218
