

Proceedings of the Glasgow Mathematical Association

Editorial Committee : T. M. MACROBERT, R. A. RANKIN, R. P. GILLESPIE, T. S. GRAHAM
Department of Mathematics, The University, Glasgow
Volume 4. Part 3. January 1960

- DALE H. HUSEMOLLER. A generalization of Hurwitz's Theorem.
C. R. PUTNAM. On differences of unitarily equivalent self-adjoint operators.
IAN. N. SNEDDON. The elementary solution of dual integral equations.
P. F. CONRAD and A. H. CLIFFORD. Lattice ordered groups having at most two disjoint elements.
T. M. MACROBERT. Applications of the multiplication formula for the gamma function to E -function series.
B. R. BHONSLE. Some recurrence relations and series for the generalised Laplace transform.
D. BORWEIN. On strong and absolute summability.
C. G. CHEHATA. An embedding theorem for groups.
IAN. N. SNEDDON. On some infinite series involving the zeros of Bessel functions of the first kind.

The proceedings are published twice yearly, four parts comprising a volume of about 200 pages. The subscription price per volume is £2 (\$6.00), post free, payable in advance. Single parts may be supplied at a cost of 10s. 6d. (\$1.50), post free.

Inquiries and subscription orders should be sent to the publishers

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give complete coverage of published papers in the field of statistical theory (including associated aspects of probability and other mathematical methods) and new published contributions to statistical method.

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics*; *Biometrika*; *Journal, Royal Statistical Society (Series B)*; *Bulletin of Mathematical Statistics*; *Annals, Institute of Statistical Mathematics*; and a further group of six journals are abstracted on a virtually complete basis as follows: *Biometrics*; *Metrika*; *Metron*; *Review, International Statistical Institute*; *Technometrics*; *Sankhyā*. There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about 400 words long—the recommendation of UNESCO for the “long” abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) are given in detail to facilitate contact in order to obtain further detail or request an off-print. The journal is published quarterly and contains approximately 1000 abstracts per year.

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. A unique aspect of this journal is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

<i>Annual Subscription</i>	£5 (U.S.A. and Canada \$16.00)
<i>Single Number</i>	30s. (U.S.A. and Canada \$4.50)

UNIVERSITY MATHEMATICAL TEXTS

General Editors

ALEXANDER C. AITKEN, D.SC., F.R.S., DANIEL E. RUTHERFORD, D.SC., DR. MATH.

The Series provides compact and inexpensive text-books on standard topics of mathematics, the aim being to carry the reader from an elementary or intermediate grade up to an honours grade in each subject.

<i>Determinants and Matrices</i>	PROF. A. C. AITKEN, D.SC., F.R.S.	7/6
<i>Statistical Mathematics</i>	PROF. A. C. AITKEN, D.SC., F.R.S.	7/6
<i>Theory of Ordinary Differential Equations</i>	J. C. BURKILL, SC.D., F.R.S.	8/6
<i>Waves</i>	PROF. C. A. COULSON, D.SC., F.R.S.	7/6
<i>Electricity</i>	PROF. C. A. COULSON, D.SC., F.R.S.	10/6
<i>Projective Geometry</i>	T. E. FAULKNER, PH.D.	7/6
<i>Integration</i>	R. P. GILLESPIE, PH.D.	7/6
<i>Partial Differentiation</i>	R. P. GILLESPIE, PH.D.	7/6
<i>Infinite Series</i>	PROF. J. M. HYSLOP, D.SC.	7/6
<i>Integration of Ordinary Differential Equations</i>	E. L. INCE, D.SC.	7/6
<i>Introduction to the Theory of Finite Groups</i>	W. LEDERMANN, PH.D., D.SC.	8/6
<i>Analytical Geometry of Three Dimensions</i>	PROF. W. H. MCCREA, PH.D., B.SC.	7/6
<i>A German-English Mathematical Vocabulary</i>	S. MACINTYRE, M.A., PH.D. AND E. WITTE	8/6
<i>Topology</i>	E. M. PATTERSON, PH.D.	8/6
<i>Functions of a Complex Variable</i>	E. G. PHILLIPS, M.A., M.SC.	7/6
<i>Volume and Integral</i>	PROF. W. W. ROGOSINSKI, DR. PHIL., F.R.S.	10/6
<i>Vector Methods</i>	D. E. RUTHERFORD, D.SC., DR. MATH.	7/6
<i>Classical Mechanics</i>	D. E. RUTHERFORD, D.SC., DR. MATH.	10/6
<i>Fluid Dynamics</i>	D. E. RUTHERFORD, D.SC., DR. MATH.	10/6
<i>Special Functions of Mathematical Physics and Chemistry</i>	PROF. I. N. SNEDDON, M.A., D.SC.	10/6
<i>Tensor Calculus</i>	BARRY SPAIN, B.A., M.SC., PH.D.	8/6
<i>Theory of Equations</i>	PROF. H. W. TURNBULL, F.R.S.	7/6
