

INDEX OF AUTHORS

ALLEY, RB	8	BUZZINI, P	119
Access of surface meltwater to beds of sub-freezing glaciers: preliminary insights		Culturable yeasts in meltwaters draining from two glaciers in the Italian Alps	
ALLEY, RB	139	CAREY, AE	200
Conditions for the reversal of ice/air surface slope on ice streams and shelves: a model study		Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event	
ANANDAKRISHNAN, S	8	CHRISTNER, B	145
Access of surface meltwater to beds of sub-freezing glaciers: preliminary insights		Incorporation of particulates into accreted ice above subglacial Vostok lake, Antarctica	
ANDERSON, RS	174	CSATHÓ, BM	200
Fault-dominated deformation in an ice dam during annual filling and drainage of a marginal lake		Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event	
ANDERSON, RS	237	CUNICO, M	174
The dynamic response of Kennicott Glacier, Alaska, USA, to the Hidden Creek Lake outburst flood		Fault-dominated deformation in an ice dam during annual filling and drainage of a marginal lake	
ANDERSON, SP	174	CUTLER, ES	163
Fault-dominated deformation in an ice dam during annual filling and drainage of a marginal lake		Observed surface snowmelt at high elevation in the Southern Alps of New Zealand	
ANDERSON, SP	237	D'AGATA, C	119
The dynamic response of Kennicott Glacier, Alaska, USA, to the Hidden Creek Lake outburst flood		Culturable yeasts in meltwaters draining from two glaciers in the Italian Alps	
ANDERSSON, L	95	D'AGATA, C	207
Detailed spatially distributed geothermal heat-flow data for modeling of basal temperatures and meltwater production beneath the Fennoscandian ice sheet		Calving processes and lake evolution at Miage glacier, Mont Blanc, Italian Alps	
ANSLOW, FS	52	DE BRABANDER, S	225
Hydrometeorological relationships on Haig Glacier, Alberta, Canada		Basal and thermal control mechanisms of the Ragnhild glaciers, East Antarctica	
BALDWIN, DJ	83	DIOLAIUTI, G	119
The use of salt injection and conductivity monitoring to infer near-margin hydrological conditions on Vestari-Hagafellsjökull, Iceland		Culturable yeasts in meltwaters draining from two glaciers in the Italian Alps	
BAUDER, A	20	DIOLAIUTI, G	207
Changes in geometry and subglacial drainage derived from digital elevation models: Unteraargletscher, Switzerland, 1927–97		Calving processes and lake evolution at Miage glacier, Mont Blanc, Italian Alps	
BAUDER, A	219	DORAN, PT	200
Numerical modeling investigations of the subglacial conditions of the southern Laurentide ice sheet		Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event	
BENN, DI	207	DUGUAY, C	113
Calving processes and lake evolution at Miage glacier, Mont Blanc, Italian Alps		Model simulation of the effects of climate variability and change on lake ice in central Alaska, USA	
BJÖRNSSON, H	83	DUGUAY, CR	195
The use of salt injection and conductivity monitoring to infer near-margin hydrological conditions on Vestari-Hagafellsjökull, Iceland		Lake ice growth and decay in central Alaska, USA: observations and computer simulations compared	
BJÖRNSSON, H	133	DUPONT, TK	8
Ice–water interactions during floods from Grænalón glacier-dammed lake, Iceland		Access of surface meltwater to beds of sub-freezing glaciers: preliminary insights	
BOCK, C	179	DUPONT, TK	139
A magnetic resonance study of temperature-dependent microstructural evolution and self-diffusion of water in Arctic first-year sea ice		Conditions for the reversal of ice/air surface slope on ice streams and shelves: a model study	
BØGGILD, CE	169	EBNET, AF	76
Meltwater retention in a transect across the Greenland ice sheet		A temperature-index model of stream flow at below-freezing temperatures in Taylor Valley, Antarctica	
BRAUN, A	20	EICKEN, H	179
Changes in geometry and subglacial drainage derived from digital elevation models: Unteraargletscher, Switzerland, 1927–97		A magnetic resonance study of temperature-dependent microstructural evolution and self-diffusion of water in Arctic first-year sea ice	
		EYRE, NS	83
		The use of salt injection and conductivity monitoring to infer near-margin hydrological conditions on Vestari-Hagafellsjökull, Iceland

MACAYEAL, DR	215	PARIZEK, BR	8
Surface melting on Larsen Ice Shelf, Antarctica		Access of surface meltwater to beds of sub-freezing glaciers: preliminary insights	
MALM, A	174	PATTYN, F	47
Fault-dominated deformation in an ice dam during annual filling and drainage of a marginal lake		Localized basal motion of a polythermal Arctic glacier: McCall Glacier, Alaska, USA	
MARSHALL, H-P	157	PATTYN, F	225
Estimating alpine snowpack properties using FMCW radar		Basal and thermal control mechanisms of the Ragnhild glaciers, East Antarctica	
MARSHALL, SJ	52	PAYNE, AJ	83
Hydrometeorological relationships on Haig Glacier, Alberta, Canada		The use of salt injection and conductivity monitoring to infer near-margin hydrological conditions on Vestari-Hagafellsjökull, Iceland	
MARSHALL, SJ	219	PFEFFER, WT	31
Numerical modeling investigations of the subglacial conditions of the southern Laurentide ice sheet		Evolution of subglacial water pressure along a glacier's length	
MARTINI, A	119	PFEFFER, WT	102
Culturable yeasts in meltwaters draining from two glaciers in the Italian Alps		Diurnal water-pressure fluctuations: timing and pattern of termination below Bench Glacier, Alaska, USA	
MCKNIGHT, DM	76	PRISCU, JC	145
A temperature-index model of stream flow at below-freezing temperatures in Taylor Valley, Antarctica		Incorporation of particulates into accreted ice above subglacial Vostok lake, Antarctica	
MICKELSON, DM	219	RABUS, B	47
Numerical modeling investigations of the subglacial conditions of the southern Laurentide ice sheet		Localized basal motion of a polythermal Arctic glacier: McCall Glacier, Alaska, USA	
MORRIS, K	113	REEH, N	169
Model simulation of the effects of climate variability and change on lake ice in central Alaska, USA		Meltwater retention in a transect across the Greenland ice sheet	
MORRIS, K	195	REMPEL, A	191
Lake ice growth and decay in central Alaska, USA: observations and computer simulations compared		Englacial phase changes and intergranular flow above subglacial lakes	
MURAV'YEV, YD	232	ROBERTS, MJ	133
Surface strain anomaly induced by the storage and drainage of englacial water in Koryto glacier, Kamchatka, Russia		Ice-water interactions during floods from Grænalón glacier-dammed lake, Iceland	
NAGORNOV, OV	61	ROYSTON-BISHOP, G	145
Reconstruction of past temperatures for Arctic glaciers subjected to intense subsurface melting		Incorporation of particulates into accreted ice above subglacial Vostok lake, Antarctica	
NAKAWO, M	128	SAMYN, S	185
Temporal isotope changes in wet snow layers in association with mass exchange between snow particles and liquid water in between the particles		Ice crystal properties of amber ice and strain enhancement at the base of cold Antarctic glaciers	
NARUSE, R	232	SCHLICHTING, RB	25
Surface strain anomaly induced by the storage and drainage of englacial water in Koryto glacier, Kamchatka, Russia		Observations of englacial water passages: a fracture-dominated system	
NÄSLUND, J-O	95	SERGIENKO, O	215
Detailed spatially distributed geothermal heat-flow data for modeling of basal temperatures and meltwater production beneath the Fennoscandian ice sheet		Surface melting on Larsen Ice Shelf, Antarctica	
NICHOLSON, L	207	SHEA, JM	52
Calving processes and lake evolution at Miage glacier, Mont Blanc, Italian Alps		Hydrometeorological relationships on Haig Glacier, Alberta, Canada	
Nick J. RUTTER	67	SHIMIZU, M	128
Impact of subglacial hydrology on the release of water from temporary storage in an Alpine glacier		Temporal isotope changes in wet snow layers in association with mass exchange between snow particles and liquid water in between the particles	
NOLAN, M	47	SIEGERT, MJ	145
Localized basal motion of a polythermal Arctic glacier: McCall Glacier, Alaska, USA		Incorporation of particulates into accreted ice above subglacial Vostok lake, Antarctica	
NYLEN, TH	1	SMIRAGLIA, C	119
The origin of channels on lower Taylor Glacier, McMurdo Dry Valleys, Antarctica, and their implication for water runoff		Culturable yeasts in meltwaters draining from two glaciers in the Italian Alps	
NYLEN, TH	15	SMIRAGLIA, C	207
The chemical composition of runoff from Canada Glacier, Antarctica: implications for glacier hydrology during a cool summer		Calving processes and lake evolution at Miage glacier, Mont Blanc, Italian Alps	
NYLEN, TH	76	SUGIYAMA, S	232
A temperature-index model of stream flow at below-freezing temperatures in Taylor Valley, Antarctica		Surface strain anomaly induced by the storage and drainage of englacial water in Koryto glacier, Kamchatka, Russia	
OHATA, T	123	SVENSSON, A	185
The influence of river ice on spring runoff in the Lena river, Siberia		Ice crystal properties of amber ice and strain enhancement at the base of cold Antarctic glaciers	
O'NEEL, S	31	TAKAHASHI, S	47
Evolution of subglacial water pressure along a glacier's length		Localized basal motion of a polythermal Arctic glacier: McCall Glacier, Alaska, USA	
PÁLSSON, F	133	TCHIJOV, V	61
Ice-water interactions during floods from Grænalón glacier-dammed lake, Iceland		Reconstruction of past temperatures for Arctic glaciers subjected to intense subsurface melting	

TRABANT, DC	174	VIRGINIA, RA	200
Fault-dominated deformation in an ice dam during annual filling and drainage of a marginal lake		Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event	
TRABANT, DC	237	WALDER, JS	174
The dynamic response of Kennicott Glacier, Alaska, USA, to the Hidden Creek Lake outburst flood		Fault-dominated deformation in an ice dam during annual filling and drainage of a marginal lake	
TRANter, M	15	WALDER, JS	237
The chemical composition of runoff from Canada Glacier, Antarctica: implications for glacier hydrology during a cool summer		The dynamic response of Kennicott Glacier, Alaska, USA, to the Hidden Creek Lake outburst flood	
TRANter, M	145	WALL, DH	200
Incorporation of particulates into accreted ice above subglacial Vostok lake, Antarctica		Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event	
TREMPER, CM	200	WEERTMAN, J	43
Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event		Slip event propagation direction in transition region of low surface slope	
TULACZYK, S	151	WELCH, KA	15
Trends in spring snowpack over a half-century of climate warming in California, USA		The chemical composition of runoff from Canada Glacier, Antarctica: implications for glacier hydrology during a cool summer	
TURCHETTI, B	119	WELCH, KA	200
Culturable yeasts in meltwaters draining from two glaciers in the Italian Alps		Groundwater seeps in Taylor Valley Antarctica: an example of a subsurface melt event	
TWEED, FS	133	YASUNARI, T	123
Ice–water interactions during floods from Grænalón glacier-dammed lake, Iceland		The influence of river ice on spring runoff in the Lena river, Siberia	
VAUGHN, BH	107	ZHOU, S	128
Stable isotopes and electrical conductivity as keys to understanding water pathways and storage in South Cascade Glacier, Washington, USA		Temporal isotope changes in wet snow layers in association with mass exchange between snow particles and liquid water in between the particles
