# If you're looking for dramatic growth and consistent yields, this is where to put your money.

*Intevac MBE systems offer you demonstrably superior performance.*

**Record-setting growth** Widely renowned as the system to choose for consistently growing record-setting materials in the III-V, II-VI, and IV-VI groups. Now it's also available in configurations specifically designed for SiGe and SiC Group IV epitaxy.

**Highly cost-effective** A completely flexible and expandable system that can be tailored to your precise applications.

**Exceptional reliability, superb customer service** Unmatched system uptime levels and consistent yields of up to 2,000 wafers annually—backed by the industry's fastest response time.

**The Intevac bottom line** If you're seeking superior material growth plus the lowest cost of ownership, call us and we'll show you how a custom-configured MOD GEN II system will satisfy all your needs.
