

Essential reading...

# Phonology

*Phonology* is the foremost publication and the only journal devoted to phonology. It combines theoretical and empirical interests to create a unique forum for the productive interchange in ideas. Each volume has two issues, containing the latest research in phonology. One of the two issues is usually a thematic issue covering one or two important topics. *Phonology* also contains detailed book reviews. Volume 7 was a special issue entitled 'Phonological Government'.

## Subscription Information

Volume 8, April and October, £44 for institutions, £25 for individuals, airmail £6.50 per year extra, ISSN 0952-6757

Please enter my subscription to *Phonology*, Volume 8 in 1991, published in April and October at

- £44 for institutions
- £25 for individuals
- Please send by airmail at £22 per year extra
- Please find enclosed a cheque for £\_\_\_\_\_

## **Language Development and Individual Differences**

A Study of Auxiliary Verb Learning

**BRIAN RICHARDS**

This study examines variation in children's early language development, focusing on the auxiliary verb, making this book of value to all those interested in language acquisition.

£32.50 net HB 0 521 36253 9 272 pp.

## **Conversational Competence and Social Development**

**IOANNA DIMITRACOPOULOU**

This book provides new insight into the development of the child's ability to become a competent participant in conversation. The author combines a pragmatic analysis of the functions language can perform with an innovative and extensive empirical investigation of the development of young children's language use and socio-cognitive skills.

£25.00 net HB 0 521 37551 7 178 pp.

## **The Acquisition of Two Languages from Birth: a Case Study**

**ANNICK DE HOUWER**

This book is one of the most detailed reports of bilingual first language acquisition to appear. It first provides a comprehensive review of previous studies of the subject, and then an account of one child's development of independent linguistic systems for the two languages the child is learning.

£30.00 net HB 0 521 36652 6 407 pp.

# International Journal of Behavioral Development

*Official Journal of the International Society for the Study of Behavioral Development*

**Editor: Linda Siegel, Ontario Institute for Studies in Education, Canada**

**Associate Editors: Janine Beaudichon, Université René Descartes Paris-V, France, Jesús Palacios, Universidad de Sevilla, Spain, Rainer K. Silbereisen, University of Giessen, Germany, Peter K. Smith, University of Sheffield, United Kingdom**

The International Journal of Behavioral Development exists to promote the discovery, dissemination and application of knowledge about developmental processes at all stages of the lifespan - infancy, childhood, adolescence, adulthood and old age. Established in 1978, the journal is a foremost international publication devoted to reporting interdisciplinary research, theoretical reviews, book reviews and other items of scientific communication. Commensurate with its international status, the journal publishes occasional state-of-the-art papers on behavior development research within particular geographical regions.

**Recent and Forthcoming Papers include:**

**M.H. Bornstein, H. Azuma, C. Tamis-LeMonda and M. Ogino** Mother and infant activity and interaction in Japan and the United States

**K.J. Sternberg, M.E. Lamb, C.P. Hwang, A. Broberg, R.D. Ketterlinus and F.L. Bookstein** Does out-of-home care affect compliance in pre-schoolers

**David Foulkes, Michael Hollifield, Brenda Sullivan, Laura Bradley and Rebecca Terry** REM dreaming and cognitive skills at ages 5-8: a cross-sectional study

**Jesús Palacios** Parents' ideas about the development and education of their children: answers to some questions

**Ellen A. Skinner** What causes success and failure in school and friendship? Developmental differentiation of children's beliefs across middle childhood

**David A. Saarnio** Schematic Knowledge and memory in young children

## **Subscription Information**

*Volume 14 (4 issues), 1991*

**ISSN 0165 0254**

## NOTES FOR CONTRIBUTORS

Articles, and papers for the Notes and Discussion section, should be sent to The Editor, Dr K. Perera, Department of Linguistics, University of Manchester, Manchester, M13 9PL, UK. All submissions are read by a member of the editorial team to check whether, with regard to readability and content, they are appropriate to send to referees. All eligible manuscripts are then sent, anonymously, to two referees. When the referees' reports are received, each manuscript is evaluated by the editorial team, and the Editor informs the author of their decision. Articles should be written in English and should not normally exceed 24 printed pages (roughly 10,000 words). Typescripts that conform to the following guidelines help to speed the production process. (For a more detailed style sheet, please write to the Editor.)

1. THREE copies should be submitted.
2. Submissions should be typed on A4 paper (or 21.6 cm), on one side of the paper only. The entire text should be double-spaced, with ample margins.
3. Each copy should have a separate title page giving the title, the full names of the author(s) with their affiliations, any acknowledgements, a full address for correspondence and – at the top – a running headline of not more than 40 characters. Other pages in the typescript should NOT carry the author's name.
4. Each copy should have an abstract on a separate sheet (not more than 150 words long for articles and 100 words for notes). The abstract should give the aims of the study, the general method and the principal conclusions.
5. Articles should be clearly divided into appropriately-labelled but unnumbered sections: often, but not necessarily, Introduction, Method, Results, and Discussion. Side headings should be used within these sections, e.g. *Subjects, Procedure*, etc.
6. Footnotes, which are expensive to set, should not be used unless absolutely necessary; they should not contain phonetic characters or other special symbols. They should be numbered and listed on a separate sheet at the end of the article.
7. Each table and figure should be on a separate sheet at the end of the article; their position in the text should be clearly indicated. They should have a title and should be numbered independently of any numbered examples in the text. Figures should, if possible, be camera-ready.
8. Ages should be stated in years, months and – if necessary – days, like this: 1;10.22.
9. Phonetic transcriptions should, wherever possible, employ the IPA symbols.
10. Emphasis and technical terms should be marked by double underlining (small capitals). Standard linguistic abbreviations should be in large capitals, e.g. AUX, NP. Language examples in the body of the text should be underlined (italics). Translations and glosses should be given between single inverted commas.
11. References in the body of the text should be made like this:  
According to Snow (1990: 698); OR, In the sixties and seventies, several authors published important work on combinatorial speech (Braine, 1963; Miller & Ervin, 1964; Bloom, 1970; Schlesinger, 1974).  
Note that such references are in DATE order, not alphabetical order, and that pairs of authors are joined by &.
12. All works referred to should be listed at the end of the article in alphabetical order, as in these examples:  
Cruttenden, A. (1986). *Intonation*. Cambridge: C.U.P.  
Karmiloff-Smith, A. (1986). Some fundamental aspects of language development after age five. In P. Fletcher & M. Garman (eds), *Language acquisition: studies in first language development*. Second edition. Cambridge: C.U.P.  
O'Grady, W., Peters, A. M. & Masterson, D. (1989). The transition from optional to required subjects. *Journal of Child Language* 16, 513–29.
