NEW
**MANUAL OF THE TERMINOLOGY OF PUBLIC
INTERNATIONAL LAW (LAW OF PEACE) AND
INTERNATIONAL ORGANIZATIONS**

Multilingual edition: English/French/Russian/Spanish

By **Dr. I. Paenson**

"Dr. Paenson's Manual is a work of great value to all interested in the terminology of International Law.

I wish this Manual the wide audience it deserves. It can contribute to the unification—which seems useful—of the terminology of International Law."

Professor Chr. DOMINICE

Director, the Graduate Institute of International Studies, Geneva

"The Manual responds to a need for a working tool among the ever increasing numbers of lawyers, administrators, diplomats and officials who are concerned with the implementation and evolution of international law in their daily activity.

The gratitude of the entire international community is due to Dr. Paenson for this new work which once more testifies to his linguistic knowledge, his mastery of the substance of a complex field and his familiarity with the world of the United Nations."

Erik Suy

Under-Secretary-General

The Legal Counsel of the United Nations

This manual is based on a revolutionary principle. Multilingual terminology is no longer treated as a science devoted to the explanation of the meaning of terms in different languages, but as one built on the elucidation of the equivalence in the multilingual plane of identical concepts. The latter are the starting point of the investigation, not isolated single terms. Consequently, they must be presented within the framework of a coherent system of concepts, and that is the reason why Dr. Paenson's manual assumes, in fact, the form of concise treatises - centred on terminology - of the discipline considered. Thus, the search for the meaning of given words is replaced by the quest of terms to express a given idea.

This presentation of terms within their logical context forming part of a well-structured system of ideas has many advantages, particularly for terms pertaining to social sciences: these latter terms have very often several meanings and only their context can allow a rational choice. Within a logical system of terms the latter also shed light on each other. This approach, corresponding to the normal associative way of thinking, is also the only rational one from the mnemotechnical point of view: it facilitates the assimilation and memorization of terms. Last, but not least, it also makes it easier to expose varying - sometimes very widely - interpretations of a given term, conditioned by differences in philosophy and methods of expression.
