

Medical Geography in Historical Perspective

Nicolaas A Rupke (ed.)

The early practitioners of medical geography were concerned with the global distribution of human diseases as a function of large scale environmental conditions, and in Germany, France and Britain, large bodies of literature on the subject were produced. In recent years, medical geography has experienced a resurgence of popularity, and historians have begun examining the issues it raised. Most of the chapters in this book are based on papers presented at a symposium held in June 1996 in Göttingen. They cover a wide range of themes from European national practices and colonial discourses, to cartographic representations of disease, and the perceptions of colonists in the American West.

Medical History, Supplement No. 20

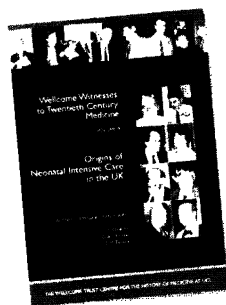

256 pages, 18 illustrations

New Publications Wellcome Witnesses

The Wellcome Trust Centre's History of Twentieth Century Medicine Group promotes interaction between medical scientists, clinicians and historians of twentieth century medicine. A component of the group's activities is to gather together significant figures in twentieth-century medicine to discuss specific discoveries or events and debate their achievements, their failings, and the consequences and impacts of their work.

The resulting debates are published in the Wellcome Witnesses to Twentieth Century Medicine seminar transcripts, two new volumes of which have just been published.

The first, volume 9, *Origins of Neonatal Intensive Care in the UK*, reviews the development and changes in care of the newborn in the UK over the past 50 years and includes contributions from many distinguished figures in this field.

The second new addition to the series, volume 10, *British Contributions to Medical Research and Education in Africa after the Second World War*, discusses the differences in health services between British East and West Africa over

the postwar period, along with great vector-borne diseases, including sleeping sickness and malaria, and helminth eradication.

Volumes cost £5 each and are available to order from the address below. Further information on the History of Twentieth Century Medicine Group and its work can be found on www.ucl.ac.uk/histmed.

Please send orders to:

Mrs Tracy Tillotson
Wellcome Library
