JFM ARCHIVE

**Journal of
Fluid Mechanics**

Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

European Journal of Applied Mathematics

Co-Editors-in-Chief

S. D. Howison, *University of Oxford, UK*

A. A. Lacey, *DPMMS, Heriot-Watt University, UK*

M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

CAMBRIDGE
UNIVERSITY PRESS

Journal of Mechanics

Published on behalf of The Society of Theoretical and Applied Mechanics, R.O.C.

Editor-in-Chief

K. C. Wu, National Taiwan University, Taiwan

The objective of the *Journal of Mechanics* is to provide an international forum to foster exchange of ideas among mechanics communities in different parts of world. The Journal publishes original research in all fields of theoretical and applied mechanics.

The *Journal of Mechanics* especially welcomes papers that are related to recent technological advances, such as micro/nanomechanics, medical and biological systems, and microscale heat transfer. The contributions, which may be analytical, experimental or numerical, should be of significance to the progress of mechanics. Papers which are merely illustrations of established principles and procedures will generally not be accepted. Reports that are of technical interest are published as Short articles. Review articles are published only by invitation.

CAMBRIDGE
UNIVERSITY PRESS

Journal of Plasma Physics

Editors

Bill Dorland, University of Maryland Honors College, USA

Alex Schekochihin, University of Oxford, UK

With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

JFM Rapids (online only)

- R1 Amplitude modulation of all three velocity components in turbulent boundary layers
K. M. Talluru, R. Baidya, N. Hutchins & I. Marusic
- R2 Non-existence of three-dimensional travelling water waves with constant non-zero vorticity
E. Wahlén
- R3 Moffatt vortices induced by the motion of a contact line
E. Kirkinis & S. H. Davis
- S* R4 Tunable fall velocity of a dense ball in oscillatory cross-sheared concentrated suspensions
F. Blanc, E. Lemaire & F. Peters

S indicates supplementary data or movies available online.

- 1 Ship waves and Kelvin
F. Dias
- 5 On the self-similar exact MHD jet solution
R. I. Mullyadzhanov & N. I. Yavorsky
- 31 Speeding up thermocapillary migration of a confined bubble by wall slip
Y.-C. Liao, Y.-C. Li, Y.-C. Chang, C.-Y. Huang & H.-H. Wei
- 53 Solving the Boltzmann equation deterministically by the fast spectral method: application to gas microflows
L. Wu, J. M. Reese & Y. Zhang
- 85 The temperature spectrum generated by frictional heating in isotropic turbulence
W. J. T. Bos
- 99 New scaling laws for turbulent Poiseuille flow with wall transpiration
V. Avsarkisov, M. Oberlack & S. Hoyas
- 123 Multiple finger propagation modes in Hele-Shaw channels of variable depth
A. B. Thompson, A. Juel & A. L. Hazel
- 165 Numerical study of acoustic radiation due to a supersonic turbulent boundary layer
L. Duan, M. M. Choudhari & M. Wu
- 193 Formation of particle clouds
B. Zhao, A. W. K. Law, E. E. Adams & J. W. Er
- 214 Motion and coalescence of sessile drops driven by substrate wetting gradient and external flow
M. Ahmadelouydarab & J. J. Feng
- 236 The opening of wind-driven polynyas
M. A. Morales Maqueda, A. J. Willmott & I. A. Walkington
- 273 Slender axisymmetric Stokesian swimmers
S. Toppaladoddi & N. J. Balmforth
- 300 On the damped oscillations of an elastic quasi-circular membrane in a two-dimensional incompressible fluid
M. Martins Afonso, S. Mendez & F. Nicoud
- 332 How strain and spin may make a star bi-polar
L. K. Forbes
- S 368 Resonance-driven oscillations in a flexible-channel flow with fixed upstream flux and a long downstream rigid segment
F. Xu, J. Billingham & O. E. Jensen
- 405 Steady turbulent density currents on a slope in a rotating fluid
G. E. Manucharyan, W. Moon, F. Sévellec, A. J. Wells, J.-Q. Zhong & J. S. Wettlaufer
- 437 A shallow-water sloshing model for wave breaking in rectangular tanks
M. Antuono, A. Bardazzi, C. Lugni & M. Brocchini
- 466 Analytical solutions of compacting flow past a sphere
J. F. Rudge
- 498 Entrainment and mixing in a laboratory model of oceanic overflow
P. Odier, J. Chen & R. E. Ecke
- 536 Turbulent drag reduction through oscillating discs
D. J. Wise & P. Ricco
- 565 The influence of non-polar lipids on tear film dynamics
M. Bruna & C. J. W. Breward
- 606 Fractional dynamics of tethered particles in oscillatory Stokes flows
E. A. Lim, M. H. Kobayashi & C. F. M. Coimbra
