

Instructions to authors

Detailed instructions to authors are available online here:
[cambridge.org/core/journals/journal-of-glaciology/information](https://www.cambridge.org/core/journals/journal-of-glaciology/information)

The *Journal of Glaciology* publishes three types of paper:

- Articles - concerning new findings and theories, or new instruments and methods, in glaciology; or review articles that offer an up-to-date, coherent account of a glaciological subject that is developing rapidly or has been neglected
- Letters - identical in form and general content to Articles, but of reduced length, and carrying substantially reduced processing charges
- Communications - short pieces without abstracts that could be, e.g., comments on published articles/letters, book reviews, or short correspondence on topics of interest to the community

Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

Length

Papers should be concise. Lines and pages should be numbered. Letters are limited to five *Journal* pages (one *Journal* page = about 1000 words).

Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct (you will have to pay for any substantial alterations made at this stage).

Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
 - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
 - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

General points

- Title should be concise
- Abstract should be less than 200 words

- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
 - be one or two column widths: up to 85 mm or up to 178 mm
 - not be in boxes
 - use strong black lines (avoid tinting if possible)
 - use SI units in labels
 - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
 - be set in MathType or advanced equation editor
 - NOT be embedded as graphics in the text
- Tables should
 - be numbered in Arabic
 - be referred to in text (as Table 1 etc.)
 - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
 - be concise
 - be complete and accurate, including doi numbers
 - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
 - be arranged in alphabetical order by first author's surname
 - include works accepted but not published as 'in press'
 - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,320 for a regular article (of 6 published pages or more), £660 for a letter (of 5 published pages or fewer) and communications (of 2 published pages or fewer). IGS members receive a 10% discount on these charges.

Figures quoted here are correct for 2019.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

Journal of GLACIOLOGY

CONTENTS Vol 65 No 252 2019

523–530 **Spatio-temporal variations in seasonal ice tongue submarine melt rate at a tidewater glacier in southwest Greenland**

A.N. Moyer, P.W. Nienow, N. Gourmelen, A.J. Sole, D.A. Slater, M. Truffer, M. Fahnestock

531–541 **Effects of microparticles on deformation and microstructural evolution of fine-grained ice**
Tomotaka Saruya, Koki Nakajima, Morimasa Takata, Tomoyuki Homma, Nobuhiko Azuma, Kumiko Goto-Azuma

542–556 **Area changes of glaciers on active volcanoes in Latin America between 1986 and 2015 observed from multitemporal satellite imagery**

Johannes Reinthaler, Frank Paul, Hugo Delgado Granados, Andrés Rivera, Christian Huggel

557–564 **Constitutive equations with pressure-dependent rheological parameters for describing ice creep**

Martina Arcangioli, Angiolo Farina, Lorenzo Fusi, Giuseppe Saccomandi

565–579 **Terminus advance, kinematics and mass redistribution during eight surges of Donjek Glacier, St. Elias Range, Canada, 1935 to 2016**

William Kochtitzky, Hester Jiskoot, Luke Copland, Ellyn Enderlin, Robert McNabb, Karl Kreutz, Brittany Main

580–594 **Influence of North Atlantic climate variability on glacier mass balance in Norway, Sweden and Svalbard**

David Brooking Bonan, John Erich Christian, Knut Christianson

595–604 **Observations of surface mass balance on Pine Island Glacier, West Antarctica, and the effect of strain history in fast-flowing sections**

Hannes Konrad, Anna E. Hogg, Robert Mulvaney, Robert Arthern, Rebecca J. Tuckwell, Brooke Medley, Andrew Shepherd

605–616 **Mass balance of Trambau Glacier, Rolwaling region, Nepal Himalaya: in-situ observations, long-term reconstruction and mass-balance sensitivity**

Sojiro Sunako, Koji Fujita, Akiko Sakai, Rijan B. Kayastha

617–632 **Supraglacial ice cliffs and ponds on debris-covered glaciers: spatio-temporal distribution and characteristics**

Jakob F. Steiner, Pascal Buri, Evan S. Miles, Silvan Ragettli, Francesca Pellicciotti

633–644 **Cryoconite on a glacier on the north-eastern Tibetan plateau: light-absorbing impurities, albedo and enhanced melting**

Yang Li, Shichang Kang, Fangping Yan, Jizu Chen, Kun Wang, Rukumesh Paudyal, Jingshi Liu, Xiang Qin, Mika Sillanpää

645–661 **The sensitivity of Northern Hemisphere ice sheets to atmospheric forcing during the last glacial cycle using PMIP3 models**

Lu Niu, Gerrit Lohmann, Sebastian Hinck, Evan J. Gowan, Uta Krebs-Kanzow

662–674 **Summer surface melt thins Petermann Gletscher Ice Shelf by enhancing channelized basal melt**

Peter Washam, Keith W. Nicholls, Andreas Münchow, Laurie Padman

675–688 **Surface and basal boundary conditions at the Southern McMurdo and Ross Ice Shelves, Antarctica**

C. Grima, I. Koch, J.S. Greenbaum, K.M. Soderlund, D.D. Blankenship, D.A. Young, D.M. Schroeder, S. Fitzsimons

689–699 **Subglacial water pressure and ice-speed variations at Johnsons Glacier, Livingston Island, Antarctic Peninsula**

Shin Sugiyama, Francisco J. Navarro, Takanobu Sawagaki, Masahiro Minowa, Takahiro Segawa, Yukihiko Onuma, Jaime Otero, Evgeny V. Vasilenko
