The Medical Triangle

Physicians, Politicians, and the Public
Eli Ginzberg

"A recognized authority on medical education and health care delivery collects twenty late-80s articles on major problems that must be faced now or in the near future...Ginzberg cuts through the prolix fog of official publications and media statements to pinpoint the real issues, and then, documenting them well, provides the basic facts and trends needed for rational discussion. Patients, physicians, insurers, and politicians would do well to read and explore the ramifications of these pieces."

Selling Hope

State Lotteries in America

Charles T. Clotfelter and Philip J. Cook

In the first comprehensive account of state lotteries in America, Clotfelter and Cook place modern lotteries in historical context and demonstrate that lottery sales are concentrated among those who can least afford them.

"Good researchers that they are, Clotfelter and Cook let the specifics of their study—heavily loaded with charts and graphs and footnotes—sustain the message without sermonizing. *Selling Hope* should be required reading for anybody in a position to decide such issues."

The Reading Crisis

Why Poor Children Fall Behind

Jeanne S. Chall, Vicki A. Jacobs,
and Luke E. Baldwin

Using Chall's widely applied model of reading development, the authors examine the strengths and weaknesses in the reading, writing, and language development of children from low-income families in an attempt to identify the onset of their difficulties. According to Chall's findings, lack of specific literacy skills—not cognitive factors—explains the deceleration in the reading and writing development of low-income children and the crucial point occurs in fourth grade. The authors outline a range of realistic suggestions for teachers, parents, and the community for fostering literary development.

Political Ethics and Public Office

Dennis F. Thompson

"[Thompson's] arguments distill the best of classical political and moral theory into a form that can be applied to public office in a democratic society. That makes [this book] must reading for the press ethics scholar and for the journalist as well..."

Thompson debunks the myth that there is some relevant connection between personal morality and public decision-making." —Deni Elliott,

environment and planning c

government & policy

Editors: **R Bennett and H Wolman**

Government and Policy is the third member of Pion's highly successful Environment and Planning series. Since it began in 1983, it has become recognized as a major international journal concerned with the economics and politics of public policy, policy analysis, and policy research. The journal is particularly concerned with cross-national or comparative research on public policy issues and with policy issues which, while focusing on a single country, are of relevance and interest to other countries. It also features papers concerned with general issues of policy research, analysis, or theory. Policy-related questions are examined by scholars and researchers from a wide variety of countries. Differing analytical perspectives are encouraged, providing they represent high-quality research and scholarship. Papers have dealt with policies and comparisons of policy in many countries, including the United States, United Kingdom, France, Norway, Denmark, Poland, Japan, Australia, Canada, and Zimbabwe.

Recent articles have included:

NOTES TO CONTRIBUTORS

GUIDELINES

The distinctive readership of the *Journal*, cutting across academic disciplines and national boundaries, makes the following points of particular importance to contributors.

*Whatever the specific subject matter, the relevance of conclusions to a broad understanding of policymaking should be made explicit.

*Whatever the national setting, the extent to which conclusions are generalizable to many nations should be explicitly discussed.

*Each article should show an awareness of the constraints that public institutions place upon policymaking.

*Jargon should be avoided; technical terms not widely understood should be clearly defined; and the conclusions of statistical analyses should be set out in prose, as well as being supported by quantitative information in tables, footnotes and text as appropriate.

PREPARATION OF MANUSCRIPT

The entire manuscript, including footnotes and references, should be typed double-spaced on one side only of A4 size paper, with a left-hand margin of at least 1½ inches (4½ cm). Manuscript pages should be numbered consecutively.

The title of the article and the author's name and address should be typed on a separate page at the beginning of the article.

The second page should contain an abstract of not more than 150 words and the title of the article, but *not* the author's name.

Tables and Figures should be numbered consecutively in separate series. Each table or figure should be typed or drawn on a separate sheet. Every table or figure should have a title or caption and at least one reference in the text to indicate its approximate location.

STYLE

Spelling, capitalization and punctuation should be consistent within each article. Detailed advice on all matters of style is contained in Judith Butcher's book, *Copyediting*, Cambridge University Press (1975).

Headings of not more than two grades should be used and they should be typed on separate lines.

Numbered footnotes should be avoided; citation of references in the text is the norm. If there are a few points that require discussion in the article but not in the body of the text, numbered footnotes may be used. They may also be useful for technical details, e.g. statistical points that would interrupt the flow of the text. Numbered footnotes should be typed consecutively, double-spaced, at the end of the paper, starting on a new page.

References to publications should be placed in the text. Examples of correct styling for biblio-

graphic citation where the author's name is mentioned in the text are Alford (1975), Biller (1976, 136-7), May and Wildavsky (1978), Ostrom, Parks and Whitaker (1978) and subsequently Ostrom *et al.* (1978).

At the end of the paper, all references should be consolidated in a single alphabetical list starting on a new page. Authors are particularly requested to verify that each text reference appears in the list, and vice versa. In addition to author(s) surname and first name(s) or initial(s), and the title of the book or article, references to books should *always* include the city of publication and publisher, and for journal articles the volume and part number. For example:

Alford, R. (1975) *Health Care Politics*. Chicago: University of Chicago Press.

Biller, R. (1976) *On tolerating policy and organizational termination: some design considerations*, *Policy Sciences*, 7, 2, 133-49.

Campbell, D. (1971) *Reforms as experiments*. In F. Caro (ed.), *Readings in Evaluation Research*. New York: Russell Sage.

May, J. and A. Wildavsky (eds.) (1978) *The Policy Cycle*, Beverly Hills: Sage.

SUBMISSION

Please submit the original manuscript *plus* three copies to: Professor Richard Rose, *Journal of Public Policy*, Centre for the Study of Public Policy, University of Strathclyde, Livingstone Tower, Glasgow, G1 1XH, Scotland.

COPYEDITING AND PROOF-READING

The editor and publishers reserve the right to copyedit and proof all items accepted for publication. Authors will review their copyedited manuscripts only if substantial changes have been made. Manuscripts which do not conform to the requirements about style and format may be returned for retyping.

Page proofs of articles will be sent to authors for correction of typographical errors only. Authors must notify the editorial office of any corrections within one week of receipt or approval will be assumed.

Submission of an article or other item implies that it has not been published or accepted for publication elsewhere. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors of material accepted for publication will be asked to assign their copyrights to Cambridge University Press.

Each author will receive 50 offprints of his article without charge. Additional copies may be purchased if ordered at proof stage.
