

Models of Man

Philosophical Thoughts on Social Action

MARTIN HOLLIS

All social theorists and philosophers who seek to explain human action have a 'model of man', a metaphysical view of nature. Some make man a plastic creature of nature and nurture, some present him as the autonomous creator of his social world, some offer a compromise. Martin Hollis illustrates the conflicts and contrasts involved in these views and then develops a 'model of man' of his own.

Aristotle's Concept of Dialectic

J. D. G. EVANS

Dr Evans offers here the first systematic account of Aristotle's theory. He explores how dialectic is related to other forms of enquiry, both scientific and philosophical, and demonstrates the central part which dialectic occupies in Aristotle's thought. **£5.90 net**

THE PIETY OF THINKING Essays by Martin Heidegger

Translation, Notes and Commentary by JAMES G. HART and JOHN C. MARALDO

In the debates ranging over the last fifty years there have been many proponents and critics of both the early and later Heidegger, but Heidegger himself has rarely had his say. This book presents the first English translations of relatively unknown but important texts in which Heidegger has discussed theology and religion.

INTENTIONALITY A Study of Mental Acts

RICHARD E. AQUILA

This book is a critical and analytical survey of the major attempts, in modern philosophy, to deal with the phenomenon of intentionality. By coordinating the semantical, metaphysical, and phenomenological approaches to the phenomenon, Dr Aquila undertakes to provide a basis for dialogue among philosophers of different persuasions.

ALIENATION, PRAXIS, AND TECHNE IN THE THOUGHT OF KARL MARX

By Kostas Axelos

Translated by RONALD BRUZINA

In this study of Marx and the role of technology in the modern world, Axelos interprets Marx from his own distinctive, thought-provoking, philosophical position. The book provides a meaningful interpretation of Marx and an introduction to Axelos's own philosophical thought.

The Emergence of Norms

Edna Ullmann-Margalit

This book shows how rational beings cannot avoid accepting certain kinds of rules, or norms, in order to deal with certain sorts of social situations, and it examines three paradigmatic types of interaction: prisoners' dilemma, co-ordination, and inequality situations. It includes interesting discussions of the generalization argument in moral philosophy and of Hobbesian social contracts. £8 *Clarendon Library of Logic and Philosophy*

Two Theories of Morality

Stuart Hampshire

Stuart Hampshire deals here with two radically different conceptions of morality: those of Aristotle and Spinoza. He discusses the relationship between ordinary moral institutions and moral theory, emphasizing that moral philosophy ought to lead to moral conversion in the individual. £3

The Honest Mind

The Thought and Work of Richard Price

D. O. Thomas

The author surveys Price's writings to find out whether his various activities were inspired by the same principles or ideals, and concludes that an understanding of his theology and moral philosophy is essential to the appreciation of his political ideals, particularly the defence of representative institutions and national autonomy. £12.50

Divine Substance

G. C. Stead

The concept of substance plays an important part in ancient philosophy no less than in the classical statements of Christian theology. This book covers the whole field in detail and gives a critical account of the development of the Christian doctrine of God. £12.50

Ethics, Value & Reality

Selected Philosophical Papers of Aurel Kolnai

introduced by BERNARD WILLIAMS & DAVID WIGGINS

Though rooted in the phenomenology of Husserl (under whom he studied), Kolnai had a profound sympathy for such English philosophers as W. D. Ross, G. E. Moore and J. L. Austin, and he did much of his best work after arriving in England in the 1950s. It is from this period that ten papers have been chosen (two previously unpublished) as representative of his best work in ethics and in related areas of social philosophy and aesthetics.

The Collected Works of Jeremy Bentham

A Comment on the Commentaries & A Fragment on Government

edited by J. H. BURNS & H. L. A. HART

A Fragment on Government was Bentham's first substantial publication, wherein he asserted the principle of utility; it was a by-product of a larger enterprise for a sustained critique of the view of law exhibited in William Blackstone's influential *Commentaries on the Laws of England*. These two of Bentham's works, of great importance for an understanding of his thought and of the development of English legal theory, are here presented in a single volume in newly established texts with full annotation and indexing. Bentham's long autobiographical preface to the *Fragment* is included and for the first time printed in its entirety.

Legal Obligation

J. C. SMITH

Through the technique of ordinary language analysis Professor Smith probes some core issues of jurisprudence, presenting an original theory of law based on the concept of obligation. His study of the nature and meaning of obligation is also used to clarify such topics as the rule of law, equality before the law and fundamental rights.
