

# THE SOCIETY OF DAIRY TECHNOLOGY

## SOCIETY PUBLICATIONS

*The following publications are currently available from the Society's offices*

### **Cream Processing Manual**

Price £2.00 incl. postage

### **Pasteurising Plant Manual**

Price £1.18 incl. postage

### **Quality Control of Milk Products**

Price £2.18 incl. postage

### **UHT Processing of Dairy Products**

Price £1.40 incl. postage

### **Bottle Washing Booklet**

Price 30p incl. postage

All enquiries to the Secretary, Society of Dairy Technology, 172A Ealing Road, Wembley, Middlesex, HA0 4QD.

The JOURNAL of the Society is published quarterly (January, April, July and October).

Subscription Rates: £14.00 per volume of four issues, single issues £4.00 (USA and Canada \$30.00 per vol.) single issues \$9. From the above address.

## INDIAN JOURNAL OF DAIRY SCIENCE

Volume XXX, No. 2

### CONTENTS

June 1977

1. Effect of aflatoxin B<sub>1</sub> on growth, titratable acidity and volatile fatty acids of some lactic acid bacteria by M. S. KALRA, RAJ PAL and AJIT SINGH
2. Changes caused in buffalo milk fat by lipolytic bacteria by AJIT SINGH, R. A. SRINIVASAN and A. T. DUDANI
3. Effect of stage of lactation on distribution of fat globules and phospholipids content of milk by T. K. KUCHROO and K. M. NARAYANAN
4. Estimation of biliverdin in milk by M. V. CHANDRAVADANA and E. V. DANIEL
5. Interaction of casein micelles with amino acids as revealed by radiotracer studies by S. R. CHAKRABARTI and N. C. GANGULI
6. Chemical composition and nutritive value of Jhanji (*Scirpus Articulatus*) - A semi aquatic plant by B. N. GUPTA and R. C. SAHA
7. Feeding value of alkali treated straw in crossbred heifers by D. G. NAIK
8. Effect of formaldehyde and alkali-weak acid treatments of groundnut cake on *in vitro* microbial degradation by NARENDRA SINGH, S. C. SUD and S. N. RAY
9. Haemoglobin polymorphism in relation to puberty and sexual maturity in gir heifers by D. P. VELHANKAR, N. S. TADPATRIKAR and C. R. SANE
10. Biometrical study of daily milking average in Friesian x Sahiwal crosses by SHRI RAM and A. L. CHAUDHARY
11. Role of Delhi Milk Scheme in generating employment and income in its milkshed areas by J. P. JAIN, K. G. ANEJA and K. P. S. NIRMAN

### *Short Communications*

Price: Rs. 40/- (\$10.00 or £4.00) per annum

Published by:

Indian Dairy Association, IDA House, Sector IV,

## HANNAH RESEARCH INSTITUTE

**The Hannah Research Institute 1928-1978: essays on the scientific work of the Institute.** Edited by J. H. MOORE and J. A. F. ROOK.

0 905151 27 5

345 pp

£10.00

This jubilee volume contains over 20 review articles by past and present members of staff on the major research topics in milk production and utilization with which the Hannah Research Institute has been concerned. In addition, there are chapters on the past and present organization of the Institute and its farm.

**A Brief History of the Hannah Research Institute.** By J. A. B. SMITH, C.B.E., former director of the Institute.

0 905151 28 3

135 pp

£3.50

This book, in a lighter vein, covers the personalities and events that have been an essential part of the Institute's half-century at Ayr. Contains over 50 black and white plates and other illustrations.

Both volumes have been published by The Hannah Research Institute as part of its 1978 Golden Jubilee celebrations and may be ordered from:

The Librarian  
The Hannah Research Institute  
Ayr KA6 5HL  
Scotland

# DIRECTIONS TO CONTRIBUTORS

## GENERAL

Two copies of manuscripts should be sent to Dr M. E. Sharpe (*The Journal of Dairy Research*), National Institute for Research in Dairying, Shinfield, Reading, RG2 9AT, England. Submission of a paper will be held to imply that it reports unpublished original work, that it is not under consideration for publication elsewhere, and that if accepted for the *Journal* it will not be published elsewhere in any language, without the consent of the Editors.

## FORM OF PAPERS

The author should follow these directions carefully, and consult a current issue of the *Journal* for guidance on details of typographical and other conventions.

Every paper should be headed with its title, the names and initials of the authors (each author supplying one given name) and the name and address of the laboratory where the work was done.

Papers should be in English, using the spelling of the *Shorter Oxford English Dictionary*. They should be typed with double spacing, on one side only of the sheets, and with ample margins for editorial annotations.

Papers should in general be divided into the following parts in the order indicated: (a) Summary, brief and self-contained; (b) Introductory paragraphs, briefly explaining the object of the work but without giving an extensive account of the literature; (c) Experimental or Methods; (d) Results; (e) Discussion and Conclusions; (f) Acknowledgements without a heading; (g) References. With some types of material headings other than (c), (d) and (e) may be preferable.

The use of footnotes should be avoided if possible. Underlining should be used only to indicate italics. Proper nouns, including trade names, should be given a capital initial letter. Wherever possible numerals should be used unless this leads to ambiguity. The typescript should carry the name and address of the person to whom the proofs are to be sent, and give a shortened version of the paper's title, not exceeding 45 letters and spaces, suitable for a running title in the *Journal*.

## TABLES

Tables should be numbered and should carry headings describing their content. They should be comprehensible without reference to the text. They should be typed on separate sheets and their approximate positions in the text indicated. *To minimize the cost of printing, the number and size of tables should be kept to an absolute minimum.*

## ILLUSTRATIONS

Line drawings, which must be originals, should be numbered as Figures and photographs as Plates, in Arabic numerals. Drawings should be in Indian ink, on Bristol board or cartridge paper. However, a technique which may be more convenient to authors is to use a double-sized piece of tracing paper, or translucent graph paper faintly lined in blue or grey, folded down the centre with the drawing on one half and the other half acting as a flyleaf.

Attached to every figure and plate there should be a translucent flyleaf cover on the outside of which should be written legibly: (a) title of paper and name of author; (b) figure or plate number; (c) the figures and lettering,

which are intended to appear on the finished block, in the correct positions relative to the drawing underneath. Each paper should have a separate typed sheet listing figure and plate numbers with their legends, and the approximate positions of illustrations should be indicated in the text.

The photographs and diagrams should be about twice the size of the finished block and not larger overall than the sheets on which the paper itself is typed. For a figure measuring 250 mm × 150 mm all lines, axes and curves should be 0.4 mm thick, thus ———. Graph symbols in order of preference are ○ ●, △ ▲, □ ■, × +, and for a 250 mm × 150 mm graph the circles should be 3 mm in diam. The triangles should be equilateral of 3 mm side, and the squares also of 3 mm side. The crosses should have lines 3 mm long at right angles. Scale marks on the axes should be on the inner side of each axis and should be 3 mm long.

## SHORT COMMUNICATIONS

Short communications or notes of not more than 2500 words or the equivalent space in print and without a summary will also be published.

## REFERENCES

In the text, references should be quoted by whichever of the following ways is appropriate: Arnold & Barnard (1900); Arnold & Barnard (1900a); Arnold & Barnard (1900a, b); (Arnold & Barnard, 1900). Give all the surnames of 3 authors at the first mention, but in subsequent citations and in all cases where there are more than 3 authors give only the first surname (e.g. Brown *et al.*) provided that there is no possible ambiguity.

References should be listed alphabetically at the end of the paper. Titles of journals should be given in full, authors' initials should be included, and each reference should be punctuated in the typescript thus: Arnold, T. B., Barnard, R. N. & Compound, P. J. (1900). *Journal of Dairy Research* 18, 158. References to books should include names of authors, year of publication, title, names of editors, town of publication and name of publisher in that order, thus: Arnold, T. B. (1900). *Dairying*. London: Brown and Chester.

It is the duty of the author to check all references.

## UNITS, SYMBOLS AND ABBREVIATIONS

SI units must be used, as explained in British Standards Institution publication PD 5686:1972, *The use of SI units*. Until SI units are widely understood, it is permissible to give the equivalent value in other units in parenthesis. Symbols and abbreviations used are those of British Standard 1991: Part 1: 1967. *Letter Symbols, Signs and Abbreviations*.

## DESCRIPTIONS OF SOLUTIONS

Normality and molarity should be indicated thus: N-HCl, 0.1 M-NaH<sub>2</sub>PO<sub>4</sub>. The term '%' means g/100 g solution. For ml/100 ml solution the term '% (v/v)' should be used and for g/100 ml solution the correct abbreviation is '% (w/v)'.

## REPRINTS

Order forms giving quotations for reprints are sent to authors with their proofs
