

# GENETICAL RESEARCH

EDITORIAL BOARD

C. H. WADDINGTON (*Chairman*)

CHARLOTTE AUERBACH    J. R. S. FINCHAM

W. HAYES    MARY F. LYON

R. RILEY    A. ROBERTSON

EXECUTIVE EDITOR

E. C. R. REEVE

ASSISTANT EXECUTIVE EDITOR

J. O. BISHOP

**Volume 12. 1968**

CAMBRIDGE  
AT THE UNIVERSITY PRESS

1968

PUBLISHED BY  
THE SYNDICS OF THE CAMBRIDGE UNIVERSITY PRESS

Bentley House, 200 Euston Road, London, N.W. 1  
American Branch: 32 East 57th Street, New York, N.Y. 10022

*Printed in Great Britain at the University Printing House, Cambridge*

# CONTENTS

## No. 1 (August 1968)

|   |        |
|---|--------|
| ZOUROS, E., TSAKAS, S. and KRIMBAS, C. B. The genetics of <i>Dacus oleae</i> .<br>II. The genetics of two adult esterases   | page 1 |
| McINTOSH, R. A. and BAKER, E. P. Cytogenetical studies in wheat. II. An<br>analysis of chlorophyll abnormalities in hexaploid wheat   | 11     |
| MAGUIRE, MARJORIE P. Chromosome pairing in altered constitutions and<br>models of synapsis and crossing-over  | 21     |
| LOUTIT, J. S., PEARCE, L. E. and MARINUS, M. G. Investigation of the<br>mating system of <i>Pseudomonas aeruginosa</i> strain 1. I. Kinetic studies                               | 29     |
| LOUTIT, J. S. and MARINUS, M. G. Investigation of the mating system of<br><i>Pseudomonas aeruginosa</i> strain 1. II. Mapping of a number of early<br>markers                     | 37     |
| LOPRIENO, N., ABBONDANDOLO, A., BONATTI, S. and GUGLIELMINETTI, R.<br>Analysis of the genetic instability induced by nitrous acid in <i>Schizo-</i><br><i>saccharomyces pombe</i> | 45     |
| DONCH, JOHN and GREENBERG, JOSEPH. Genetic studies of strain Bs8 of<br><i>Escherichia coli</i>  | 55     |
| RATNAYAKE, WINSTON E. Tests for an effect of the Y-chromosome on the<br>mutagenic action of formaldehyde and X-rays in <i>Drosophila melano-</i><br><i>gaster</i>                 | 65     |
| POULTER, R. T. M. and DEE, JENNIFER. Segregation of factors controlling<br>fusion between plasmodia of the true slime mould <i>Physarum poly-</i><br><i>cephalum</i>              | 71     |
| GRATIA, J. P. Multistep transduction of tryptophan ( <i>trp</i> ) genes in <i>Escherichia</i><br><i>coli</i>  | 81     |
| STEWART, JOHN S. S. Chimerism and genetic mapping   | 91     |
| HOLLIDAY, R. and HALLIWELL, R. E. An endonuclease-deficient strain of<br><i>Ustilago maydis</i>   | 96     |
| ROLFE, B. and HOLLOWAY, B. W. Genetic control of DNA specificity in<br><i>Pseudomonas aeruginosa</i>  | 99     |

## No. 2 (October 1968)

|   |     |
|---|-----|
| AHMAD, MAJEED, MOZAMDAR, A. and HENDLER, S. A new locus in the<br>tryptophan pathway of <i>Neurospora crassa</i>  | 103 |
| MOLINA, A. M., CALEGARI, L. and CONTE, G. Modification by an R determi-<br>nant for streptomycin of his <sup>sd</sup> phenotype in a mutant strain of <i>Escherichia</i><br><i>coli</i> B | 109 |

|  |          |
|--|----------|
| MCLAREN, ANNE and WALKER, P. M. B. The comparison of closely related groups of rodents by DNA/DNA annealing  | page 117 |
| MORRIS, T. The XO and OY chromosome constitutions in the mouse   | 125      |
| LOUTIT, J. S., MARINUS, M. G. and PEARCE, L. E. Investigation of the mating system of <i>Pseudomonas aeruginosa</i> strain 1. III. Kinetic studies on the transfer of the sex factor (FP)  | 139      |
| ERIKSSON-GRENNBERG, KERSTIN G. Resistance of <i>Escherichia coli</i> to penicillins. II. An improved mapping of the <i>ampA</i> gene   | 147      |
| NORDSTRÖM, KURT, ERIKSSON-GRENNBERG, KERSTIN G. and BOMAN, HANS G. Resistance of <i>Escherichia coli</i> to penicillins. III. <i>AmpB</i> , a locus affecting episomally and chromosomally mediated resistance to ampicillin and chloramphenicol | 157      |
| BOMAN, HANS G., ERIKSSON-GRENNBERG, KERSTIN G., NORMARK, STAFFAN and MATSSON, EVA. Resistance of <i>Escherichia coli</i> to penicillins. IV. Genetic study of mutants resistant to D,L-ampicillin concentrations of 100 µg/ml                    | 169      |
| PARRY, JAMES M. and COX, B. S. The effects of dark holding and photo-reactivation on ultraviolet light-induced mitotic recombination and survival in yeast   | 187      |
| RILEY, RALPH, CHAPMAN, VICTOR and JOHNSON, ROY. The incorporation of alien disease resistance in wheat by genetic interference with the regulation of meiotic chromosome synapsis  | 199      |

### No. 3 (December 1968)

|   |     |
|---|-----|
| OSMAN, H. EL SAYED and ROBERTSON, ALAN. The introduction of genetic material from inferior into superior strains  | 221 |
| FRANKHAM, R., JONES, L. P. and BARKER, J. S. F. The effects of population size and selection intensity in selection for a quantitative character in <i>Drosophila</i> . I. Short-term response to selection | 237 |
| JONES, L. P., FRANKHAM, R. and PARKER, J. S. F. The effects of population size and selection intensity in selection for a quantitative character in <i>Drosophila</i> . II. Long-term response to selection | 249 |
| FRANKHAM, R., JONES, L. P. and BARKER, J. S. F. The effects of population size and selection intensity in selection for a quantitative character in <i>Drosophila</i> . III. Analyses of the lines          | 267 |
| HETHERINGTON, C. M., WHITTINGTON, W. J., HOSSAIN, M. A. and PEAT, W. E. The genetics of the <i>Xasta</i> mutant of <i>Drosophila melanogaster</i>   | 285 |
| ENDRIZZI, J. E. and TAYLOR, T. Cytogenetic studies of <i>N Lc<sub>1</sub> yg<sub>2</sub> R<sub>2</sub></i> marker genes and chromosome deficiencies in cotton   | 295 |

Contents

v

|  |          |
|--|----------|
| LHOAS, POL. Growth rate and haploidization of <i>Aspergillus niger</i> on medium containing <i>p</i> -fluorophenylalanine                            | page 305 |
| ANDERSON, WYATT W. Further evidence for coadaptation in crosses between geographic populations of <i>Drosophila pseudoobscura</i>                    | 317      |
| PREER, JOHN R. JR. and JURAND, ARTUR. The relation between virus-like particles and R bodies of <i>Paramecium aurelia</i>                            | 331      |
| AYLING, P. D. and CHATER, K. F. The sequence of four structural and two regulatory methionine genes in the <i>Salmonella typhimurium</i> linkage map | 341      |
| HOWE, T. G. B. and DAWSON, G. W. P. Phage-enhanced suppression of the growth of revertants by auxotrophs in <i>Salmonella typhimurium</i>            | 355      |
| ZIMMERING, S. and FOWLER, G. L. Progeny: sperm ratios and non-functional sperm in <i>Drosophila melanogaster</i>                                     | 359      |
| <i>Index of subjects and authors</i>   | 365      |

PLATES should only be included where absolutely essential. They should be supplied as unmounted glossy prints; any lettering to be inserted on them is best indicated on a separate sketch. Please do not damage prints by writing heavily on their backs or by using paper clips.

DIAGRAMS should be about twice the size of the finished block, and the thickness of lines and size of points determined accordingly. They must be drawn in Indian ink on white Bristol Board or tracing linen; graph paper ruled in pale blue (but not other colours) is also acceptable. Lettering should be lightly inserted in soft pencil only, so that the printer can put in the finished lettering.

Legends to illustrations must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their position indicated on the typescript. It will hasten refereeing if a photograph of each diagram can be supplied with the carbon copy of the paper.

TABLES should each be typed on a separate sheet of paper and their approximate positions in the text indicated on the typescript. Each table should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion.

FOOTNOTES should be avoided where possible. They can often be incorporated into the text, in parentheses.

SYMBOLS. Italic letters should generally be adopted for both gene symbols and quantities in mathematical formulae. Bold letters add to printing costs, and should only be used where they are necessary to avoid confusion.

SPELLING should follow the *Concise Oxford Dictionary*.

REFERENCES should follow the normal usage in the journal. In the list of references at the end of the paper, titles of periodicals should be abbreviated according to the *World List of Scientific Periodicals* (fourth edition).

PROOFS. Two sets of single-sided page proofs, together with the typescript, of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

OFFPRINTS. Fifty offprints of each paper, including short papers, are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.
