Honoré M. Catudal investigates the concept of nuclear deterrence and its evolution over the years, concluding that there is a growing body of evidence which suggests that "*nuclear deterrence does not deter — at least not as we think it does.*"

The *Journal of Philosophical Logic* is the only journal specializing in philosophical logic and utilizes formal methods of dealing with topics in logical theory. Subjects specifically included are:

- contributions to branches of logical theory directly related to philosophical concerns, such as inductive logic, modal logic, deontic logic, quantum logic, tense logic, free logic, logic of questions, logic of commands, logic of conditionals, many-valued logic, relevance logics;
- contributions to philosophical discussions that utilize the machinery of formal logic, as in recent treatments of abstract entities, non-existent possibles, essentialism, existence, propositional attitudes, meaning, and truth;
- discussions of philosophical issues relating to logic and the logical structure of language, as for example, conventionalism in logic, ontic commitment, logical or semantic paradoxes, the logic of hypotheses and of presuppositions, constructivism, and extensionality;
- philosophical work relating to special sciences (for example, linguistics, history of logic, or physics), with emphasis on foundational problems, and making use of logical theory. Treatments of this kind include universal grammar, pragmatics, conceptions of possibility, theories and mathematical truth in the history of philosophy, formalization of scientific theories, logical structures in quantum mechanics.

The Journal of Medicine and Philosophy

Editor

H. TRISTRAM ENGELHARDT, Jr., *Center for Ethics, Medicine, and Public Issues, Baylor College of Medicine, Houston, U.S.A.*

The Journal of Medicine and Philosophy continues to explore the shared themes and concerns of philosophy and the medical sciences. Not since Galen's time has the contact between medicine and philosophy been so widespread; the journal seeks to meet the challenge of this dialogue by providing a forum for philosophers, medical practitioners, educationists, and humanists to examine the problems and controversies stimulated by the engagement of these two disciplines.

The range of issues having philosophical import for medical research and practice is enormous. New developments in medical technology and expertise frequently create scientific and humanistic dilemmas, and medical decision making always involves philosophical presuppositions. Moreover, the concerns of philosophy often converge with those of medicine, as philosophers attempt to understand the nature of knowledge and the human condition. The purpose of the journal is to analyze this multifaceted relationship and to raise its discussion to a responsible and intellectually rigorous level.

Studies in Soviet Thought

A Review

Editors

THOMAS J. BLAKELEY (Managing Editor), *Dept. of Philosophy, Boston College, U.S.A.* **GUIDO KÜNG**, *Institut de l'Europe Orientale, Fribourg*; **NIKOLAUS LOBKOWICZ**, *University of Munich*

Founded in 1961 by Joseph M. Bocheński, the journal serves as an international medium for the publication of research papers, short notes, comments, reports, critical reviews, discussions, and other writings on Soviet philosophy.

Although the main interest is in modern and recent Soviet thought, the journal does not confine itself to this field and publishes articles dealing with pre-Revolutionary developments. In addition, the journal is useful to philosophers who do not specialize in Soviet studies but wish to be kept informed of philosophical developments inside the Soviet Union and Marxist movements.

Philosophical Studies

An International Journal for Philosophy in the Analytic Tradition

Editor-in-Chief

JOHN POLLOCK, *Dept. of Philosophy, University of Arizona, Tucson, U.S.A.*

Philosophical Studies was founded in 1950 by Herbert Feigl and Wilfrid Sellars to provide a periodical dedicated to work in analytic philosophy. The journal is devoted to the quick publication of analytical contributions, particularly (but not exclusively) in epistemology, philosophical logic, the philosophy of language, and ethics. Papers applying formal techniques to philosophical problems are particularly welcome. The principal aim is to publish articles that are models of clarity and precision in dealing with some significant philosophical issues. Articles in the journal are intelligible to philosophers whose expertise lies outside the subject matter of the article. It is intended that a diligent reader of the journal will be kept informed of the major problems and contributions of contemporary analytic philosophy.
