British Journal for the History of Science

Published for the British Society for the History of Science

Editor

Jon Agar, *University College London, UK*

This leading international journal publishes scholarly papers and review articles on all aspects of the history of science. History of science is interpreted widely to include medicine, technology and social studies of science. Recent special issues include history of science sources available on the internet, book history and the sciences. *BJHS* papers make important and lively contributions to scholarship and the journal has been an essential library resource for more than thirty years. It is also used extensively by historians and scholars in related fields.

História Ciências Saúde MANGUINHOS

**A journal devoted to
the history of the
sciences and of health**

Published by the Oswaldo Cruz Foundation's Casa de Oswaldo Cruz, **História, Ciências, Saúde – Manguinhos** is a quarterly journal that features original articles in Portuguese, English, and Spanish, as approved by its Editorial Board and in ad hoc peer reviewers. Its departments include original articles and essays, research notes, documents pertinent to historical studies, images, interviews, debates, and book and film reviews. In addition to its four regular issues, it puts out at least one thematic supplement a year. The journal is ranked **A1 in the area of history by Capes' Qualis System**, which evaluates graduate courses and scientific journals. Its general profile can be summed up by the triad "history – sciences – health."

While the life sciences are the journal's first priority, it also welcomes contributions to the history of other sciences and social history research that enhance our understanding of processes related to the sciences and health.

The Fabric of the Human Body is a comprehensive translation of Andreas Vesalius' *De humani corporis fabrica*, one of the most important anatomical books in the history of medicine. For the first time, both the 1543 and the 1555 editions are translated with added notes from a never published third edition of Vesalius' masterpiece. Annotations give the reader keen insight into just how innovative *De humani corporis fabrica* was, and high-resolution digital scans of the 273 woodcut illustrations provide the images with a sharpness they never had before. With this translation, the modern scientist can now read and study the work of Vesalius for the first time even without having any knowledge of Latin.

INFORMATION FOR CONTRIBUTORS

The editor is pleased to receive manuscripts for publication in *Medical History*. For detailed submission instructions, see journals.cambridge.org/mdh/ffc

Contributions should be sent to the Editor, Professor Sanjoy Bhattacharya sanjoy.bhattacharya@york.ac.uk by email attachment. Contributions are considered on the understanding that they are unpublished and are not under consideration by another journal. Contributions should be submitted in electronic form as an email attachment, preferably in MS Word format.

Submission of articles

- Articles should preferably not exceed 12,000 words including notes.
- An abstract of up to 250 words should be included.
- A list of up to 6 keywords is required.
- The article should be submitted by email to the Editor sanjoy.bhattacharya@york.ac.uk
- Files to be in Microsoft Word Doc or RTF.

Style of presentation

- Give your name and address on a separate cover sheet, as reviews are double blind.
- Main text: Times, 12pt. Notes: Times, 11pt.
- Divide the text with sub-headings, centred and in bold.
- **Do not** use ALL CAPS.

Illustrations, photos and graphs

- Please note that the maximum printable area on a page is 120(w) x 180(h)mm. This does impose a limitation on the information content in tables/graphs, etc. as the font size must be sufficiently large enough to be readable.
- Images should be supplied with captions detailing their origin and date, with a clear indication of the text to which they refer. Copyright/permission details should be provided.
- Line artwork (graphs) should be saved at 1200 dpi and ideally saved as TIFF or EPS files. Halftones (photographs) should be saved at 300 dpi and ideally saved as TIFF files.
- Data for tables and graphs **must be supplied separately** in simple columns without table outlines or hyphens. Notes for tables must be separate from the main text of an article.
- **Do not** supply your images embedded in a Word Document.

Proofs

First proofs in PDF format only will be sent to the author who will be expected to return them to the Editor within three days. Authors should note that no substantive alterations or additions can be made to first proofs, and should, therefore, thoroughly check their final submission for accuracy.

Each author will receive a PDF file of his or her published article.

BOOK REVIEWS

Books for review should be sent to the Book Reviews Editor, Professor Akihito Suzuki, Department of Economics, Keio University, 4-1-1 Hiyoshi, Kohoku-ku, Yokohama-shi, Kanagawa 223-8521, Japan. Email: asuzuki@hc.cc.keio.ac.jp. Please note that the journal does not accept unsolicited reviews.
