Cryo Immuno
APPLICATIONS: The first cryo knife with a diamond platform, guarantees the best possible sectioning for sucrose infiltrated samples (Tokuyasu).
FEATURES: The diamond platform guarantees an easy and gentle section pick-up. The sections are collected directly from the diamond surface using a loop and a sucrose/methyl-cellulose droplet.

Company Profile

Applied Beams LLC

APPLIED BEAMS

Applied Beams LLC is a leading supplier of FIB and SEM consumables, custom-optimized systems, and micro-machining services, and we bring new life to your SEM and FIB systems with our reputation for critical and customer specific service. With 30+ years of experience with ion and electron beam systems design, manufacture and applications we provide a unique ability to meet customer needs with these powerful technologies.

We serve the semiconductor, materials analysis and research communities, and proudly support the US Government with our unique ability to develop and deliver custom FIB and SEM systems.

- **HyperFIB upgrade**—Our high-current HyperFIB system is the only plasma FIB upgrade on the market for legacy FIB tools, increasing available current for micro-machining, cross-sectioning and material deposition from just 20nA to over 70nA, an improvement of 350X!
- **Customization**—Our high quality, affordable consumables are direct fit replacements for original components, keeping your FIB, SEM and dual column FIB-SEM systems operating at optimum performance and on budget.
- **Scanning electron microscope**—We've brought the Cambridge Electron Optics electron microscope back to market and offer customized versions of the popular CEs series of SEMs. Derived from Cambridge Hitachi's® advanced, our Custom™ control system provides new features including up to 20 images displayed per Windows, ring and drag image open and save, and support for advanced techniques such as our Quantitative EDS Measurement System. Custom also brings your SEM into the 21st century with a clean service interface on the Microsoft Windows 7 operating system.
- **Micro-machining and analytical services**—Our micro-machining services utilize our unique HyperFIB systems. With up to 70nA of beam current this tool is perfect for preparing cross-sections of advanced semiconductor devices and delivering all as a portion of a semiconductor device.

Buy with confidence. Our customers include Fortune 500 companies, top research institutions and government laboratories.
